workflows for investigation teams

INNAXYS

DEMS

MANAGE DIGITAL EVIDENCE WITH CONFIDENCE

UK-made Innaxys DEMS supports the secure management of digital evidential assets and ensures chain of custody from initial collection through to disposition. The system offers a user-friendly environment for greater collaboration across teams who are working on digital evidence gathering, analysis, and bundling for as part of their cases and investigations.

- ✓ User access control & authentication
- ✓ Compliant with GDPR & MoPI
- ✓ Data security & encryption
- ✓ All actions traceable & auditable
- ✓ Public & third-party secure uploads
- ✓ Extensibility to link with other systems
- ✓ Alerts & notifications
- ✓ Reporting & dashboards

INGEST, STORE & MANAGE

Capture digital evidence from any source and benefit from flexible ingestion options

- Automation of bulk uploads to reduce user waiting times
- Files ingested as original preserves evidential integrity
- Be notified of evidence uploads to cases, including from third parties and public crowdsourcing
- Use our AI-powered Ingestion Wizard to vet content before it enters the system
- Flexible workflows for allocating evidence and applying metadata
- Configurable rules and restrictions to reject unauthorised or malignant content

ANALYSE & PREPARE

Review content rapidly with features to promote team collaboration and accelerate case progression

- Allocate, structure, and view evidence per case
- Establish priorities with assessment markers for key evidence
- Monitor progress through live exhibit status, job requests, and disclosure workflows
- Expose patterns and gain insights with map, timeline, and network views
- Editing suites to explore footage and save redacted versions
- AI-assisted video analytics to identify key moments and redact at speed

SHARE & CONCLUDE

Share prepared evidence bundles to internal and external teams.

- Choose from a variety of sharing formats to suit different purposes and recipients
- Protect content by restricting sharing permissions to authorised users
- Keep track of evidence movement: all shares and exports are audited
- Close cases without the fear of losing content – archive, retain, or delete in line with policy
