

Training Courses **List**

Course	Overview	Duration
Missing Persons Search Technician	Provides search volunteers with key skills in missing persons behaviour, tactics, and techniques, delivered to National Policing Search Standards.	5
Rope Rescue Operator	Training for working at height and rope rescue operations, covering safe systems of work and legislation.	5
Rope Rescue Supervisor	Prepares supervisors to manage rope rescue operations, risk assessments, and advanced rescue techniques.	5
Introduction to Incident Command	Introduces roles, responsibilities, and command structures for managing incidents effectively.	1
Breathing Apparatus Training	Practical training in safe use of BA sets, communication, and survival techniques in restricted conditions.	1
Inert Entry Training & Familiarisation	Covers use of life support systems, safe working practices, and rescue techniques in inert environments.	1.5
Low Risk Confined Space	Competency training for safe entry and work in low-risk confined spaces, including emergency procedures.	1
Medium Risk Confined Space	Teaches safe systems and rescue skills for working in medium-risk confined spaces.	2
High Risk Confined Space	Advanced training for high-risk confined spaces using breathing apparatus, rescue skills, and risk controls.	3
Management of Confined Spaces	Equips managers with knowledge to plan, supervise, and manage confined space operations safely.	2

Training Courses **List**

Course	Overview	Duration
Emergency Rescue and Recovery	Develops skills to perform advanced confined space rescues as part of a team.	1
Crane Rescue	Practical training on self-evacuation and casualty rescue from cranes and tall structures.	0.5
Working at Height Basic Safety Harness	Introduction to harness use, inspection, and safety when working at height.	0.5
Working at Height Competent Worker	Builds competence in selecting and using fall protection equipment and rescue planning.	1
Management of Work at Heights	Focus on planning, supervising, and managing work at height activities.	1
Fire Marshal	Training on safe use of fire extinguishers with live-fire demonstrations.	0.5
Fire Extinguisher	Prepares fire wardens to perform proactive and reactive fire safety duties.	0.5
Fire Safety Awareness	Provides theoretical understanding of fire hazards and extinguisher use.	0.5
Evacuation Chair Training	Teaches safe use of evacuation chairs for moving casualties.	1
IOSH Working Safely	Accredited course introducing health and safety essentials for all employees.	1
IOSH Managing Safety	Accredited course for managers on handling health and safety responsibilities.	3
Safe Moving and Handling	Teaches safe techniques for moving and handling people to reduce injury risk.	0.5

Training Courses List

Course	Overview	Duration
Tier 1 First Aid	Entry-level training in CPR and AED use for workplace emergencies.	0.5
Tier 2 First Aid	Basic first aid course covering workplace incidents and life support.	1
Tier 3 First Aid	Comprehensive workplace first aid training, covering a wide range of illnesses and injuries.	2
Tier 4 First Aid	Advanced training in immediate life support and trauma management.	3
Tier 5 First Aid: ROAMER Standard	Amongst the most advanced medical courses offered to non-healthcare professionals on the market today.	3
GWO First Aid	Provides basic first aid skills and knowledge to meet GWO standards.	1
GWO Enhanced First Aid	Advanced first aid training with scenario-based practice in renewables environments.	3
GWO Fire Awareness	Basic fire safety training for wind industry workers, covering prevention and response.	0.5
GWO Working at Height & Manual Handling	Basic training in working safely at height and safe manual handling in renewables sector.	2
GWO Advanced Rescue Training	Provides advanced rescue capabilities in renewable environments, including wind turbines.	3
