

The TIAA logo consists of the word "t" in red and "iaaa" in blue, all in a lowercase sans-serif font, set against a white rounded square background.

PRAETORIAN

Counter Terrorism Maturity Framework Assessment Tool

Praetorian, developed by TIAA, helps UK organisations strengthen counter-terrorism readiness. Though not a compliance tool, it aligns with the aims of the Terrorism (Protection of Premises) Act 2025 by guiding organisations to assess and improve security measures through a structured, proactive approach.

Key Features

- **Evaluate Maturity:** Assess your organisation's readiness across seven key areas—ranging from compliance and emergency planning to stakeholder engagement.
- **Clear Preparedness Levels:** Understand where you stand with a five-tier scale, from basic to optimal, offering a clear view of your current security posture.

Benefits

- **Stronger Security:** Identify and close gaps in counter-terrorism readiness to better protect people and premises.
- **Preparedness Support:** Strengthen internal security in line with the Terrorism (Protection of Premises) Act—without implying legal compliance.
- **Ongoing Improvement:** Use insights to regularly refine measures and build a resilient, proactive security culture.

How It Works

1. **Assessment:** Review preparedness across seven key areas to boost resilience and safety.
2. **Improvement:** Identify strengths and gaps to guide targeted actions and foster a vigilant culture.
3. **Reporting:** Receive a five-level rating—from basic to optimal—showing how well counter-terrorism strategies are embedded.

Suitability

Ideal for Security Managers, Facility Managers, and Organisational Leaders looking to strengthen security protocols, ensure legal compliance, and make informed decisions to protect their people and premises.
