The D30 Defiance LT 384 PTZ enhances the capabilities of nocturnal hunters and law enforcement professionals who have previously had to use thermal handheld devices on foot and through vehicles, which obscured their views through windows and windshields. Mounted on top of a vehicle, the D30 Defiance offers a 360° field of view, allowing users to survey their surroundings with unparalleled clarity and precision. This elevated perspective not only provides a broader and clearer view but also enhances detection and target tracking without users needing to stop or dismount.
