## GOLD STANDARD TRAINING & COMPLIANCE SOLUTIONS

## WHY REDKITE

### Mission-Critical Software for Airport Fire and Rescue, Critical Infrastructure, and Industrial Sites

Redkite® is the globally trusted platform for managing training, assets, and incidents in Airport Rescue and Fire Fighting Services (ARFF), critical infrastructure and industrial sites. Designed for high-risk, high-compliance environments, Redkite helps teams stay ready, compliant, and efficient—24/7.

- **20+** countries served
- **60+** airport clients
- **ISO9001** certified
- **CAP699** compliant
- **ICAO9137** compliant  
**Annex 14**

#### ✓ Built for Aviation and Compliance-critical Environments

Redkite is purpose-built to meet critical infrastructure and industrial site requirements and the unique demands of ARFF operations. It supports compliance with standards like CAP 699, ICAO, and IAFPA regulations.

#### ✓ Fully Integrated Platform

Connects competency management, asset tracking, and incident logging into one seamless, cloud-based system, and integrates with learnPro LMS for further e-learning support—eliminating silos and manual processes.

#### ✓ Trusted Worldwide

Used in 60+ airports and large-scale infrastructure sites across 20+ countries, including civil, military and private aerodromes, and major critical infrastructure and industry environments.

#### ✓ Real-Time Operational Readiness

Ensure every firefighter and other critical-skills employees are trained, every asset is operational, and every incident is logged and followed up—instantly and accurately.

#### ✓ Secure & Accredited

ISO 9001:2015 certified. Hosting partners hold ISO 27001:2013, SOC1, and SOC2 for data security.

### Let's get ready.

# KEY CAPABILITIES

## ✓ Competency Management & Audit Readiness

Track qualifications, schedule training, and automate compliance. Ensure firefighters and other staff are certified and ready for duty. Support CAP 699, ICAO, and IAFA, covering national aviation safety standards and local regulatory frameworks.

## ✓ Asset & Equipment Management

Monitor the full lifecycle of critical equipment, from fire appliances and PPE to breathing apparatus and rescue tools. Schedule maintenance and inspections to ensure availability.

## ✓ Incident Logging & Reporting

Replace paper logbooks with a secure, structured digital system. Redkite enables fast, accurate reporting of incidents, near misses, and follow-ups—improving accountability and response times.

## ✓ Wide-Scale Oversight

Gain a centralised view of operations across multiple airports, terminals, or sites. Redkite supports group and site-specific reporting—ideal for airport groups and multi-site high-risk operators.

## ✓ Scalable & Cloud-Based

Access Redkite from anywhere—on station, airside, or in the control room. The platform scales with your organisation and supports hybrid and mobile teams.
