

CASE STUDY

King's College London & learnPro LMS – Accelerating Clinical Trial Readiness

CLIENT OVERVIEW

King's College London is a globally recognised research university, ranked among the top 10 in the UK and top 40 worldwide. With a strong focus on health and medicine, it plays a leading role in clinical research through King's Health Partners, which is a designated Academic Health Sciences Centre collaborating with other key research organisations.

CHALLENGE

KCL required a training solution to support multiple trial sites, streamline onboarding, and ensure regulatory compliance

Clinical trial managers in the UK face:

- **250-day average trial setup times (UK Government benchmark)**
- **Complex onboarding across NHS Trusts, universities, and private sponsors**
- **Fragmented communication and inconsistent training delivery**
- **High administrative burden and limited visibility of training progress**

SOLUTION: LEARNPRO LMS

King's College London implemented **LearnPro LMS**, a cloud-based platform designed to meet the onboarding and training needs of clinical trials teams.

Key capabilities included:

- **Automated onboarding** via custom landing pages with role/location-based training assignment
- **Role-specific training delivery** using interactive templates and multimedia content
- **Real-time compliance tracking** and multi-level reporting (individual, site, national)
- **Centralised communication** for updates, reminders, and resource sharing
- **Training certificates** issued upon module completion to support audit readiness

IMPACT & METRICS

- **Reduced setup time** by streamlining onboarding and training workflows
- **Improved training consistency** across geographically dispersed teams
- **Enhanced compliance** with Good Clinical Practice and trial protocols
- **Positive staff feedback** on usability and support
- **Scalable solution** supporting trials from single-site to national collaborations

WHY LEARNPRO LMS?

- ✓ Proven across **8 NIHR-funded trials**, including REST, SANDWICH, A2B, DESIST, ASD, ADAPT Sepsis, and National Organ Retrieval
- ✓ Trusted by **King's College London, University of Warwick, NHS Blood & Transplant, Queen's University Belfast, University of Edinburgh**
- ✓ Backed by **25+ years of experience** in health and social care training
- ✓ WCAG 2.2 AA-compliant interface for accessibility
- ✓ Flexible licensing aligned with trial funding structures

Testimonial: King's College London

"The learnPro application has been a fantastic platform for creating tailored clinical training modules for the Confederation of Respiratory Critical Care Trials (CoReCCT) studies. Each participating site and user only sees content relevant to them, improving clarity and reducing unnecessary information for clinical staff. Module creation is simple, even for users without technical experience, as the platform contains pre-created templates and interactive tools. The platform allows easy upload of supporting materials like documents and videos, keeping

all training resources in one accessible place. The ability to generate training reports is another valuable feature for monitoring site engagement. Staff have fed back the benefit of the training certificate generated on module completion. Most importantly, the learnPro team has been consistently supportive and is always there to help with any questions."
