- DIY
- AUTO MECHANICS

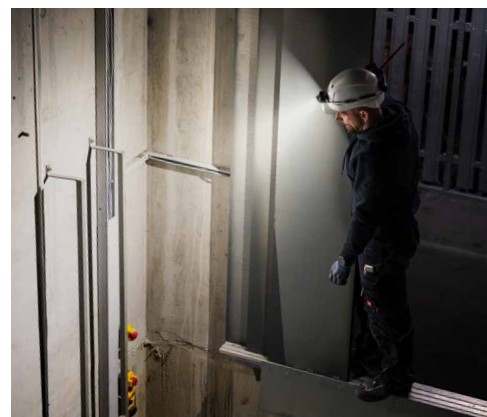

THE NEW H-SERIES

The H-series is designed with professionals and discerning users in mind. H headlamps deliver extreme performance and offer additional features such as remote control and personalization via app, an optional red rear light, RGB light⁶ and accessories for helmet mounting⁷, so the light always fits the situation at hand.

Some models are also equipped with the innovative Adaptive Light Beam³ technology, which allows automatic dimming and focusing, enabling truly hands-free operation. If you prefer manual control, the Advanced Focus System or the enhanced Advanced Focus System⁴ is the way to go. By turning the digital focus ring, you can digitally switch from flood to spot to suit any range or task.

All H models come with a separate lamp head and power source. This allows for higher performance and longer runtimes while maintaining balanced weight distribution – ideal for long hours of use.

THE NEW HF-SERIES

The HF-series is made for those who roam freely and are always looking for their next outdoor adventure or professional challenge. Compact and lightweight, with the power source integrated into the lamp head, HF headlamps are straightforward to use, yet powerful and reliable – and: All models are equipped with red light or even RGB light.

Some models are also equipped with the innovative Adaptive Light Beam³ technology, which allows automatic dimming and focusing, enabling truly hands-free operation. If you prefer manual control, the enhanced Digital Advanced Focus System⁴ is the way to go. By turning the digital focus ring, you can digitally switch from flood to spot to suit any range or task.

Moreover, selected models can be operated with both rechargeable and alkaline batteries – ideal for outdoor enthusiasts and tireless workers who value flexible illumination. And: The HF headlamps come in various colors to match them to your personal style and activity.
