

RELIABILITY YOU CAN TRUST EVERY TIME WITH THE AMBU BAG

When every second and every piece of equipment matters, you need a resuscitator that is compact, lightweight and intuitive to use. Ambu® SPURII® combines responsive handling with practical features designed to support controlled ventilation in emergency care.

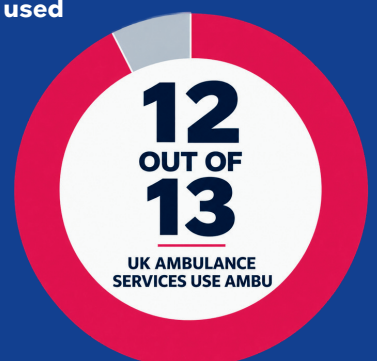

- 1 HIGH OXYGEN DELIVERY**
Delivers 90% O₂ when used with oxygen tubing and reservoir
- 2 SECURE, RESPONSIVE HANDLING**
SafeGrip surface, integrated handle and fast recoil support controlled ventilation
- 3 PRESSURE CONTROL**
Pressure-limiting valve with override clip helps control ventilation pressure
- 4 VISIBLE PRESSURE MONITORING**
Connect a pressure manometer* for clear, real-time monitoring of ventilation pressure
- 5 PEEP WHEN NEEDED**
Splashguard can be removed for direct connection of a PEEP valve*
- 6 MEDICATION WITHOUT DISCONNECTING**
Integrated M-Port enables medication delivery without disconnecting the SPUR II from the airway

*available in selected SPURII kits or can be ordered separately

“ Having worked as a frontline paramedic for over 30 years, the Ambu SPUR II has been one of the most reliable and trusted bag valve masks I have used in clinical practice ...

...This reliability reduces delays during emergency interventions and helps maintain focus on the patient rather than the equipment.”

TRUSTED BY THE EXPERTS OF EMERGENCY SITUATIONS

RELIABILITY

**~0.001% REPORTED
COMPLAINT RATE**

Confidence backed by real-world
UK experience

PORTABILITY

**~220g LIGHTWEIGHT &
COMPRESSIBLE**

Designed to minimise weight
and space in emergency
response equipment

FUNCTIONALITY

**MORE WITHOUT
DISCONNECTING**

Monitor etCO₂ or administer
medication while maintaining
the airway connection.

...The design is familiar, intuitive and consistent, which is particularly important during high-pressure situations where clinicians rely heavily on muscle memory.

The SPUR II provides predictable performance every time, with smooth bag compression and dependable refill characteristics that allow for controlled ventilation and confidence in patient care. The mask fittings are secure and consistent, enabling quick assembly and ensuring compatibility with the airway equipment routinely carried on ambulances...

Having used the Ambu SPUR II across countless emergency calls over three decades, I have found it to be a robust, dependable product that continues to meet the demands of pre-hospital care. It is a device that clinicians trust, and one that has proven its value repeatedly in frontline ambulance service operations."
