

From AI-dea to reality

Everyone talks about AI, but few actually turn it into working solutions. Be the one who does.

Whether you have just a spark of an idea or an existing product ready for an AI boost, we turn your ambition into reality.

Our AI services

01 BUILDING

Validate your AI idea in just five days

Whether you're working with a concept or starting fresh, we help you pick the right path, design it, and test the prototype with real users to ensure success—all in a five-day Design Sprint workshop.

02 UPGRADE

Boost your product with AI

Transform your existing product with AI features that enhance performance, improve user experience, and keep you ahead of the competition.

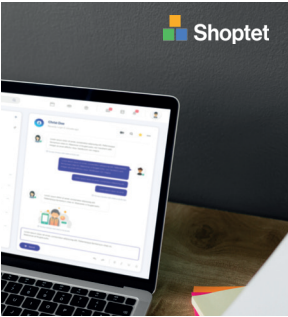

03 IDEATION

Find the best AI opportunities for your business

Not sure where to start? We'll analyze your business, determine AI readiness, and identify key areas where new technology can add the most value.

AI case studies

SHOPTET

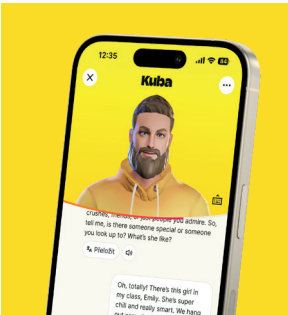

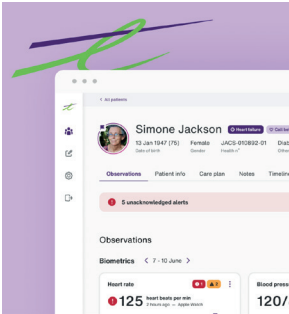

Customer support reaction time reduced by 50%

We implemented a GPT-powered email automation system that learns from past tickets and internal data, building a knowledge base that suggests answers. This helps Shoptet resolve inquiries twice as fast, providing instant replies for the customer team to quickly review and send.

TELUS HEALTH

Saving 20+ hours per month for doctors

By implementing AI-powered inbox automation, clinics can regain valuable time each month. This improvement allows healthcare teams to spend less time on admin tasks and more time focusing on patients.

KUBOVA ENGLISH

Practicing English with AI tutor

Imagine having a personal English tutor always at your fingertips. In collaboration with Kuba English, we built an AI-driven language app powered by GPT models and voice cloning, engaging users in fun and interactive lessons. Rated 4.8 stars on the App Store and Google Play.

CONCEPT FOR YOU

See AI in action: Your future dashboard today

See how AI can optimize machine maintenance and operations with predictive insights, automated anomaly detection, and smart resource planning—all in one intuitive dashboard.
