

Empowering Police Forces with AI and Microsoft Copilot

**Support frontline officers, investigators, and staff
with secure, responsible AI tools.**

Modern policing faces significant operational pressures, from increasing demand and shrinking resources to the need for transparency, accuracy, and faster decision-making. Microsoft Copilot enables police forces to reduce admin, accelerate investigations, and improve internal efficiency by embedding AI directly into Microsoft 365. It's a force multiplier that helps teams do more, securely, and with full auditability.

The Opportunity with AI & Microsoft Copilot

Free up officers' time by reducing paperwork, summarising case notes, and drafting reports.

Accelerate investigations with AI-driven evidence summaries and timeline construction.

Support public safety through improved response planning and operational analysis.

Streamline internal governance, inspections, and reporting with automated documentation.

Maintain trust and compliance with Microsoft's enterprise-grade security and audit features.

Common Use Cases in Policing

Drafting and summarising witness statements, officer notes, and case files

Preparing shift briefings or incident summaries for senior officers

Reviewing and summarising long documents such as policy or legislation

Creating internal chatbots to handle HR, IT, or officer support queries via Copilot Studio

Managing inspection or FOI data in Excel

Why Choose CPS?

- #1 Copilot partner in the UK, & #4 across Europe
- Content and implementation aligned to HMICFRS PEEL inspection priorities
- Change and governance expertise to ensure ethical, secure AI adoption
- Extensive experience working with UK police forces to deliver Microsoft 365 and Power Platform solutions
- Purpose-built Copilot Accelerators for policing, including use case templates and AI policy support

Book Your 2-Hour Discovery Session

Copilot can enhance frontline support, reduce admin, & improve outcomes.

- Identify operational use cases across roles
- Evaluate AI readiness and governance priorities
- Build a business case for secure, compliant AI use
