

Covert Suite - 4 applications for Covert Policing

CycCHIS effectively handles the assessment, recruitment, authorisation of a CHIS including risk management, taskings, contacts, rewards, texts and intelligence all in line with National Good Practice, Human Rights Act and RIPA 2000. It can also manage Confidential contacts/HUMINT and whistle-blowers. When used alongside CycCOMMS it has covert alerts to inform controllers or above the presence of their CHIS telephone numbers are in any Comms data submissions or results. This preventing 'blue on blue', OCG infiltration situations increasing information reporting by the CHIS.

- ✓ Extensive CHIS profiling, tasking, searching and analysis.
- ✓ Security at official sensitive, up to Secret

CycTSU - the complete RIPA and IPA Compliant Surveillance Equipment, Storage Media and Product management system for Technical Surveillance whether public or private sector. Designed and developed in partnership with serving Police Officers and subject experts for ease of use and includes a comprehensive functionality to support all associated activity within the area of Technical Surveillance. The system enables the recording of all equipment, storage media and product details such as specifications, ownership, location, purchase information, repair and destruction.

- ✓ Comprehensive Equipment, Product, Evidence and Obs Point management
- ✓ Ability to manage both Regulated Surveillance and non-Regulated Surveillance

CycSurveillance manages intelligence and evidence from directed, intrusive surveillance, property and equipment interference and OPT authorisations as well as non-regulated activity. The system offers efficiencies and security to the CAB/ Agency by ensuring all the activity from submission, to action, securing of evidence, to the cancellation of the authority is maintained and stored for criminal prosecution scrutiny and compliance with IPCO standards. The system includes full document management with the ability to relate specific documents, images and maps. This increases efficiency by allowing user to view authorisation in full entirety in an easy to use way.

- ✓ Comprehensive authorities, intelligence and evidence management
- ✓ Auto populates Surveillance authority into CycTSU - R v SUTHERLAND

CycComms is the UK's leading complete IPA (Investigatory Powers Act 2016) and AA (Automated Acquisition) compliant communications authorities management system for managing the authorisation process of requests for communications data. It has been designed and developed in partnership with serving police officers and investigators across the UK for ease of use and for a focussed, fast, flexible and efficient paper free business process providing a powerful and flexible solution enabling huge intelligence and evidence gains. Explore the CycComms Plus first line analysis triage tool to produce visual nominal linked charts, frequency and sequencing of criminal connections and map location data. An investigators tool!

- ✓ CycComms is the most effective tool to locate people in distress
- ✓ Reduce operational time by giving accurate details of contacts between criminals
