

NEC Evidence Manager

Public Safety

A safe and secure evidence management solution to help you build a stronger case

With the ever-evolving complexities of criminal cases, it's essential that you can collect evidence easily and efficiently so that it's robust and reliable in court.

Our evidence management software will help your force develop a stronger case, ensuring you secure justice for victims.

Being hosted in a secure cloud environment allows you to safely manage a wide variety of evidence formats, from audio and video to PDF and images. Giving you the capabilities to bundle evidence into a single, more manageable file will save time and admin costs.

Evidence Manager can also be integrated with Hearings Manager and Case Publishing Manager, allowing prosecutors to access evidence from any location with no need for plug-ins.

Streamlining the police interview process and allowing you to manage case data centrally means you can focus your time where it matters. As a scalable solution with terabytes of storage, you'll be able to build a winning case every time.

Manage case information more effectively

- Have the capability to bundle all evidence into one single document that can be easily managed and referenced, allowing users to search and organise on a range of metadata.
- Organise your case and find evidence when and where you need it with automatic numbering of documents.
- Inbuilt file conversion capabilities ensure you can manage and present data on one single platform, making it easier to present in court.

Collaborate on case creation and preparation

- Ensure consistency of case collation by having the ability to automate processes of evaluating evidence across teams.
- Make it possible to work across different teams with file management and terabytes of storage to allow for thousands of users.
- Control individual entry with role-based access controls, ensuring you can manage the case from start to finish.

Gain access to evidence from any location

- Have the ability to build a case file remotely and across different locations, with safe and secure access to minimise travelling.
- Remote access also allows for an easier case transition to the courtroom.

Prepare evidence quickly and efficiently

- Prepare a case with ease. Store various evidence formats with inbuilt file conversion ability as well as audio and video playback, bookmarking and clipping tools.
- Minimise the effort to view evidence with the option to view different multimedia formats without requiring plug-ins, providing standard evidence formats.
- Transcribe and search for descriptive information fast, allowing for simple and automated discarding of non-evidential material.

Safe, secure and compliant

- Highly secure with role-based access allows you to manage risk efficiently.
- Compliant with BS 10008 for legal admissibility of electronic evidence.
- MOPI compliant records management and retention capability.
