

DIGITAL ASSET AND EVIDENCE MANAGEMENT

Built for policing, from first capture to prosecution.

A specialist Digital Asset and Evidence Management platform for police and law enforcement organisations, enabling secure collection, management, review, retention and sharing of digital evidence while maintaining full auditability and operational control.

Law enforcement agencies are handling increasing volumes of digital evidence from body-worn video, CCTV, mobile devices, vehicle systems, drones and public submissions.

Built for modern policing, Aetopia DAM for Law Enforcement helps forces manage evidence more efficiently while improving governance, accountability and collaboration.

A platform designed for policing and investigative environments.

Aetopia Digital Asset Management (DAM) for Law Enforcement provides a secure Digital Asset and Evidence Management platform designed specifically for policing and investigative environments.

The solution combines advanced evidence management, case-centric workflows, secure information sharing and comprehensive audit controls to support operational policing, investigations and compliance requirements.

KEY CAPABILITIES

- Secure upload and management of digital evidence
- Case-based evidence organisation
- Body-worn video and CCTV management
- Automated retention and disposal policies
- Public evidence submission capabilities
- Single Sign-On with Microsoft Entra ID
- Dashboard reporting and operational insights
- AI powered redaction for video, audio, images and documents
- Digital Asset Management for operational and evidential content
- Metadata-driven search and retrieval
- Secure evidence sharing with authorised third parties
- Comprehensive audit logging and chain of custody tracking
- Granular permissions and access controls
- API integration with policing and business systems

Northumbria Police: deployed at scale.

Northumbria Police use Aetopia to manage more than 1 million digital assets, including body-worn video, in-car footage, photographic evidence and case files, across the force. Officers, evidence reviewers and disclosure teams retrieve, redact and share footage from a single platform that scales as the volume grows.

The deployment runs on private cloud with full chain of custody, role-based access and audit logging across every asset.

1m+

Digital assets managed in Aetopia by one UK police force.

Days to seconds

Time to share case evidence with legal parties through direct integration.

G-Cloud

Listed supplier, ISO 27001:2022 certified, multi cloud support.

INTEGRATION

Integrated with CPS and HM Courts

Aetopia integrates directly with the Crown Prosecution Service, defence teams and HM Courts and Tribunals Service, cutting the time to share case evidence with legal parties from days to seconds. Out-of-the-box integrations cover body-worn video and mobile apps.

AI REDACTION

Redaction at frontline volume

Aetopia AI Redact auto-detects faces and vehicle plates across video and image footage, applies masks for review and records every action in a tamper-evident audit log, preserving the master while producing court-ready disclosure copies.

Compliance built for procurement

Standard, not optional

- HM Government G-Cloud listed
- ISO 27001:2022 certified
- Private, public or hybrid cloud
- Chain of custody and audit logging
- Role-based access controls
- Multi cloud support

BENEFITS

- Create a single source of truth for digital evidence
- Support evidential integrity and chain of custody
- Improve investigation efficiency
- Reduced disclosure time via AI supported redaction
- Improve oversight through detailed audit trails
- Support operational policing and investigative teams
- Reduce administrative burden
- Strengthen compliance and governance
- Enable rapid and secure evidence sharing
- Simplify retention and disposal management
- Reduce reliance on legacy storage systems
