

YOUR NEW TACTICAL ADVANTAGE

POLICE ROBOTICS UNIT

ON THE GROUND BENEFITS

The tools to see more, know more, and stay safer

Full Scene Control

Gain total visibility before engagement

Advanced sensors and cameras deliver a complete, real-time picture so officers can act with confidence.

Tactical Intelligence

Know what's inside before you enter

Robots sweep rooms, corridors, and outdoor areas identifying risks and feeding live intelligence directly to the command team.

Remote Communication & Negotiation

De-escalate from a safe distance

Two-way audio and live video feeds let negotiators manage incidents without unnecessary exposure.

Objective Evidence Collection

Capture what matters, clearly

High-quality audio and video are recorded in real time – providing unbiased evidence for investigations and post incident reviews.

Responder Safety

Keep officers behind cover for longer

Deploy robots to handle high-risk tasks, from initial entry to suspect containment, keeping officers behind cover for longer.

Rapid Field Support

Deliver essential supplies safely

Robots carry gear, medical kits, or comms equipment directly into high-risk zones, reducing exposure.

For every mission

Intelligence & Awareness

Live surveillance & intelligence

Real-time mobile scene coverage

Reconnaissance & entry

Scout before you step in

Indoor & outdoor search

Adapt to any terrain

Response & Resolution

Hostile incident support

Manage threats with minimal risk

Crisis response

Act fast in emergencies

Dangerous item handling

Safely remove hazards from scene

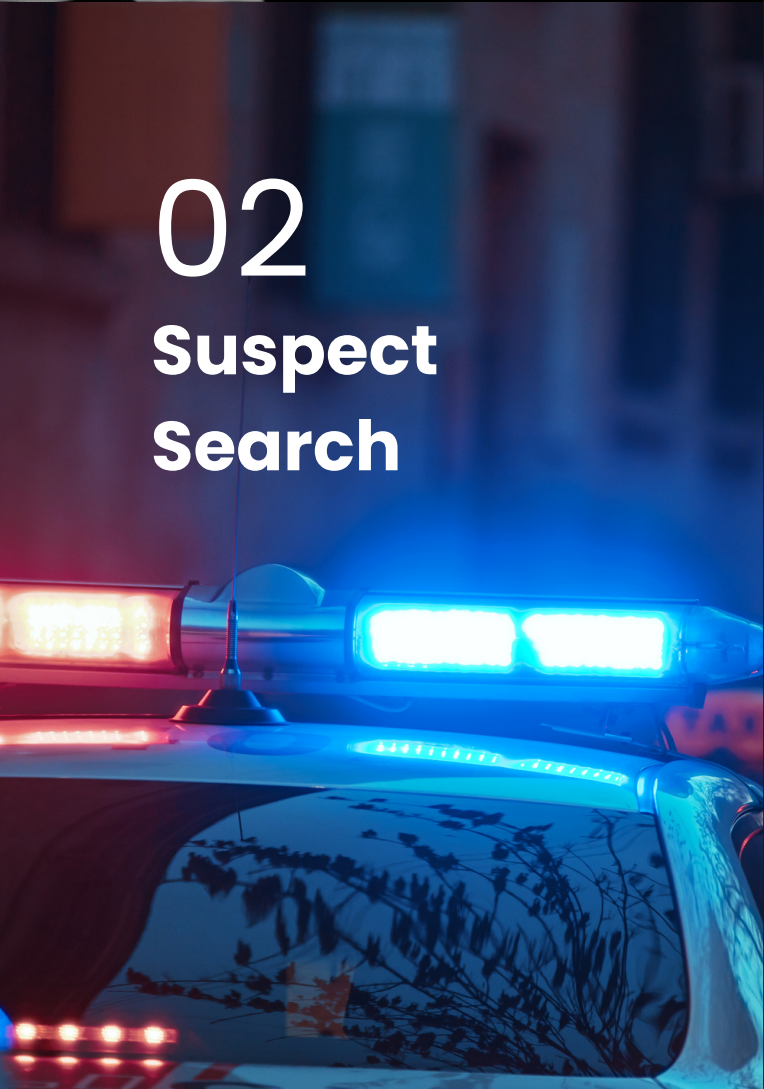

01

Barricade Response

Safe negotiation at a distance

In a hostile incident, a robot is deployed to deliver two-way comms and essential supplies. Negotiators engage remotely, achieving resolution without exposing officers to unnecessary risk.

02

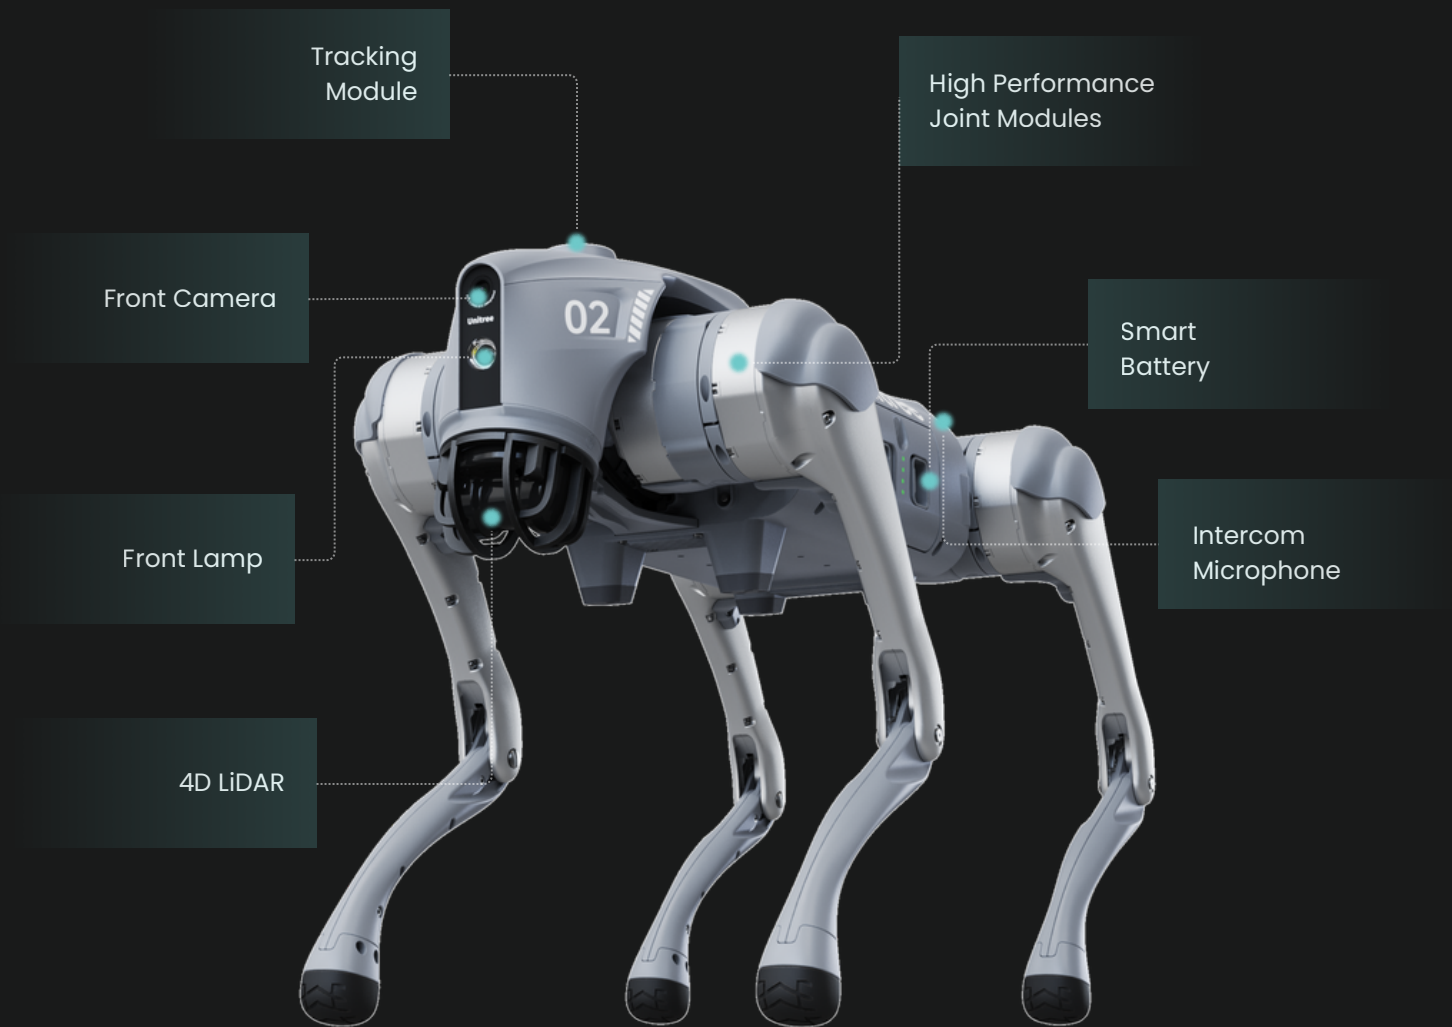

Suspect Search

Locate threats before officers move in

During the search for a hidden suspect, a robot sweeps each floor and streams live video and thermal imaging back to command. The subject is located and contained, giving officers a clear tactical advantage and reducing direct exposure.

Go2 series

Agile intelligence and reconnaissance

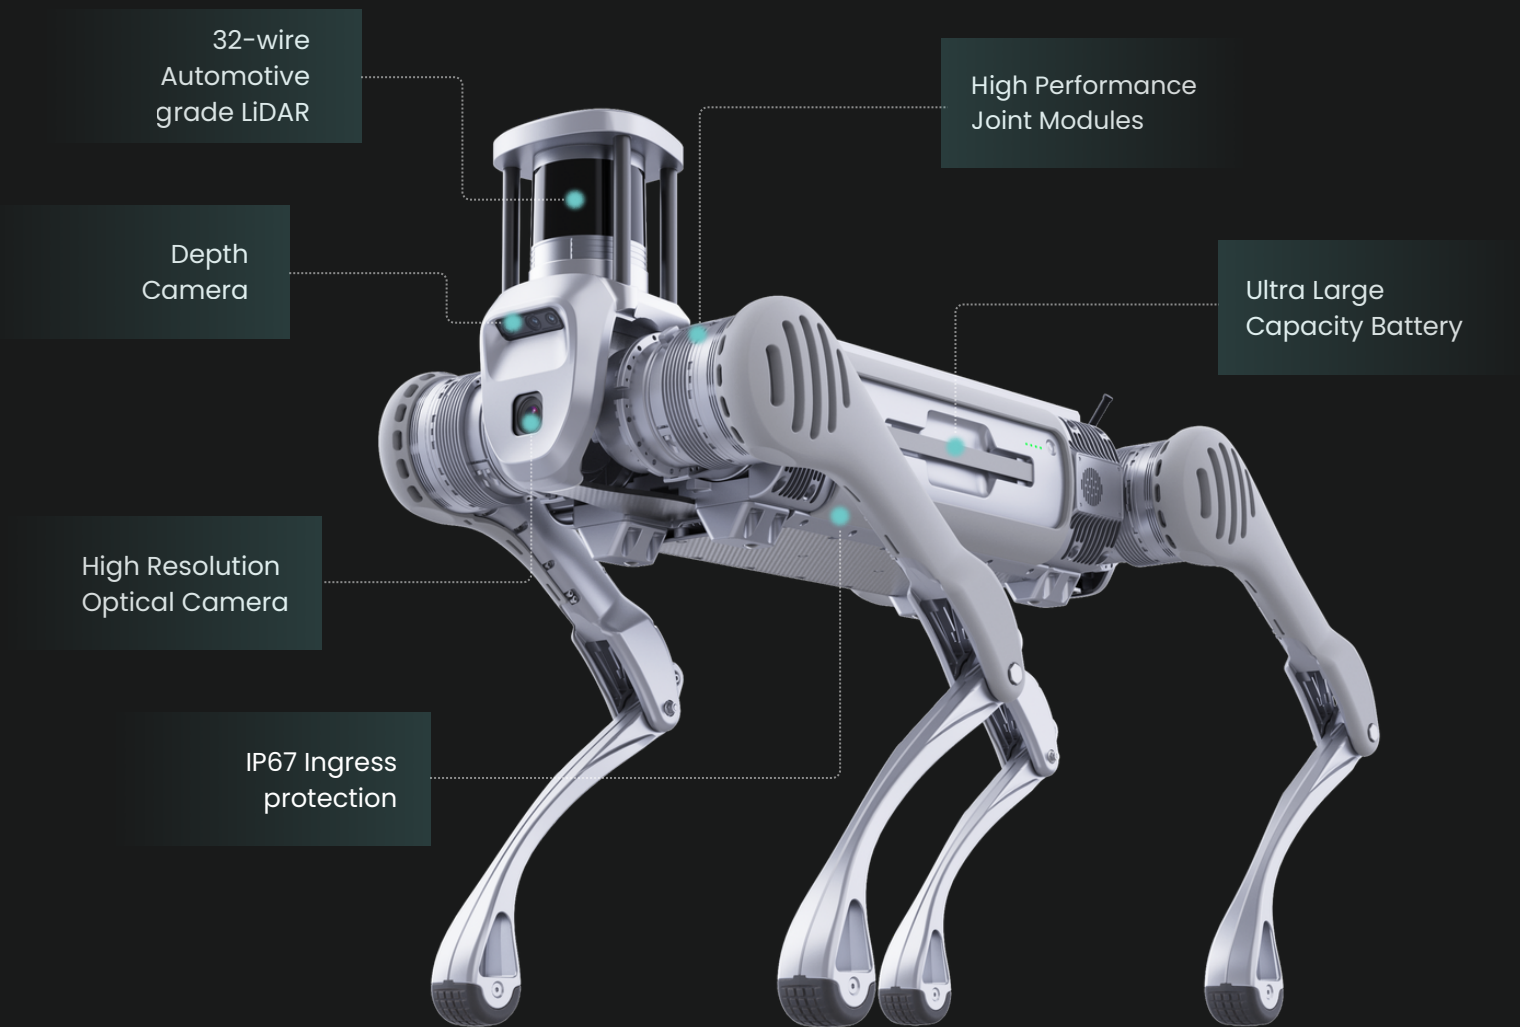

Best for

- Delivering live video, audio, and comms
- Clearing and securing areas before entry
- Suspect search and containment operations
- Rapid intelligence in unfolding situations

B2 series

Heavy duty tactical support specialist

32-wire
Automotive
grade LiDAR

Depth
Camera

High Resolution
Optical Camera

IP67 Ingress
protection

High Performance
Joint Modules

Ultra Large
Capacity Battery

Best for

- Outdoor surveillance in tough terrain and weather
- Endurance support for extended tactical operations
- Carrying and delivering heavy loads into high risk areas
- Safe approach to hazardous packages or devices
