LifeX Companion App: deliver dedicated, efficient public service on the go

The application that complements **3020 LifeX™**

Introducing the LifeX Companion App

► Call taking and handling

The LifeX Companion App allows users to accept or reject incoming calls, initiate outgoing calls, put calls on hold, and hang up active calls.

► Talk group call handling

The LifeX Companion App allows users to converse not only via telephony but also via radio, thanks to the Push-To-Talk button. A playback component is also available within a talk group call history.

► Simple, efficient call handover

Seamless handover of calls from one position to another with a single click; from workstation (desktop) to mobile (Android smartphone or tablet).

► Familiar user interface

Users benefit from the familiar look and feel of the LifeX Companion App desktop version. The app works only with Android OS.
