

MULTITONE NUCLEUS™

THE CRITICAL SYSTEMS HUB

Pioneering Critical Communications for Over 90 Years

For decades, Multitone has been the trusted name in mission-critical industries. Our legacy is built on providing innovative, high-performance messaging systems that support healthcare providers, emergency services, and enterprise operations worldwide.

We specialise in integrated solutions that help organisations connect their people, improve safety, and enhance operational efficiency. With the launch of **Multitone Nucleus™**, we continue our commitment to advancing communication technology, ensuring you have the most reliable and secure solutions available.

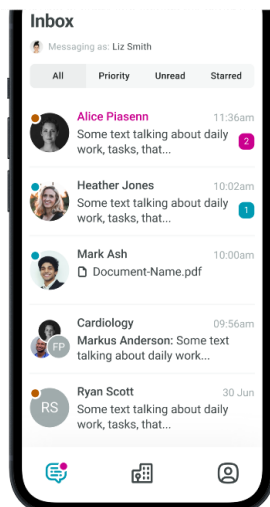

In a World where Every Second Counts, is your Communication Truly Connected?

Disparate alarms, siloed teams, and communication delays can compromise safety and efficiency. In critical environments, you need a single source of truth, a platform that unifies your systems and empowers your people to act decisively.

INTRODUCING **MULTITONE NUCLEUS™**: THE CRITICAL SYSTEMS HUB

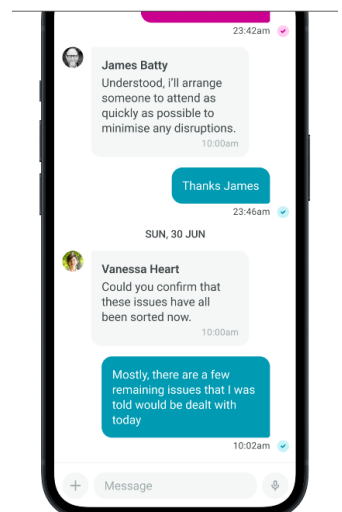

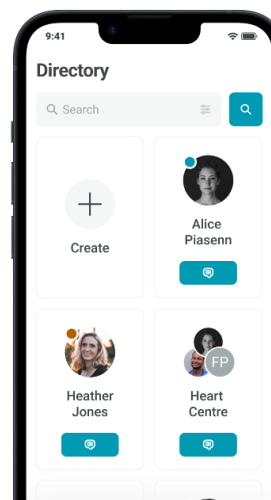

Multitone Nucleus is an advanced collaboration and messaging platform designed to revolutionise the way your teams communicate. It integrates seamlessly with your existing infrastructure to ensure critical alerts and information reach the right people, on the right device, at the right time.

 **Safe & Secure**
Secure, reliable, and fast - Multitone Nucleus™ powers your team.

 **Messaging**
Smart messaging & real-time updates - all in one place.

 **Stay Connected**
Instant alerts, clear communication - Multitone Nucleus™ keeps you connected.

 **Seamless**
Seamless group messaging & priority alerts - anytime, anywhere.

Why Choose **Multitone Nucleus™**?

Multitone Nucleus™ is more than a messaging tool; it's a powerful, cloud-native communication platform built to handle the complex needs of your organisation.

- **Seamless collaboration:** Break down organisational barriers with secure, real-time messaging tailored to your team's needs. Share and even edit rich media in-app to ensure clarity and speed up decision-making.
- **Dynamic & accountable workflows:** Our innovative Roles feature allows users to temporarily acquire duties like 'Crash Team Leader' or 'Fire Warden'. This ensures critical responsibilities are always covered and provides an uninterrupted message history for seamless handovers between shifts.
- **Unmatched resilience & continuity:** Engineered for 99.999% availability, our hybrid cloud architecture provides unparalleled reliability. On-premise components like Multitone Proton ensure system survivability, offering a vital fallback to keep your critical paging operational, even during a network outage.
- **Future-proof & scalable:** Multitone Nucleus is a modular system designed for growth. It evolves with your needs, integrating with alarm systems, IoT devices, and third-party platforms to ensure a long-term return on your investment.

SCREENSHOTS

Key Features to Empower Your Teams

- **Unified & critical communication:** Combine individual, group, and broadcast messaging with integrated paging and telephony. Deliver high-priority alerts with tones that override silent modes.
- **Dynamic role management:** Create, assign, and manage roles to ensure accountability. Users can acquire, release, or pass on a role, with all communications logged for a complete audit trail.
- **Rich media with in-app editing:** Enhance collaboration by sharing images, videos, and audio. Crop, mark-up, or add text to images directly within the Multitone Nucleus application before sending.
- **Centralised administration:** Manage users, configure departments, assign pagers, and oversee permissions through a single, intuitive administrator portal.
- **Advanced security & auditing:** Protect your critical information with industry-leading encryption, multi-factor authentication (MFA), and comprehensive, filterable reports and system logs.

Designed for Critical Industries

- **Healthcare:** Streamline emergency response for crash teams and major incidents, ensure patient safety with real-time updates, and enable secure messaging for all hospital staff.
- **Emergency services:** Enable seamless coordination between field teams and control centres with secure, resilient messaging for fire, lifeboat, and rescue services.
- **Commercial & industrial:** Enhance operational efficiency, ensure rapid response times, and deliver automated safety alerts for teams in retail, hospitality, manufacturing, and logistics.

**EXPERIENCE THE POWER OF
MULTITONE NUCLEUS™ TODAY!**

Boost efficiency. Enhance security. Improve team collaboration.
