

MULTITONE NUCLEUS™ MAJOR INCIDENT MODULE

COMMAND, COORDINATION AND MOBILISATION.

Rapid response, built into the platform you already trust.

Major Incident Management is a command, coordination and mobilisation capability within **Multitone Nucleus™** that lets organisations rapidly activate, manage and audit their response to major incidents and crisis situations - through designated commanders and responders, dedicated incident workspaces and complete operational visibility from first alert to stand-down.

When every second matters, Nucleus enables organisations to mobilise, coordinate and manage their response from a single secure platform.

KEY FEATURES

Everything a response team needs, from activation to audit.

Rapid Incident Activation:

Launch a structured response the moment an incident is declared.

Commander & Responder Roles:

Create a clear command structure with accept/decline participation workflows.

Real-time Mobilisation Dashboard:

Live delivery, acceptance rates, responder availability and status.

Dedicated Incident Workspace:

A collaboration environment scoped to that incident, every time.

Incident Severity Management:

Grade and escalate incidents to match the appropriate response.

Downloadable Audit Trail & Reporting:

Every action, communication and decision logged automatically.

WHAT MAKES IT DIFFERENT?

Integrated with Multitone Nucleus™

Real-time Responder Visibility

No Separate Platform Required

Existing Messaging Infrastructure

Cloud-first Architecture

Martyn's Law Ready

ONE DASHBOARD. COMPLETE SITUATIONAL AWARENESS.
