

AVOCET

REUSABLE ANTIVIRAL COVERALL

The AVOCET is a reusable, comfortable and highly protective coverall. It has been designed to provide lightweight, full body coverage for first responders in healthcare, police and security operational environments where airborne, particulate and depository pathogen challenge is likely.

It will protect against contaminated liquids, aerosol particulates, blood and blood-borne pathogens and critically, against viruses like COVID-19.

HIGHLIGHTS

- Optimal protection
- Reusable - reduces environmental impact
- Cost effective – up to x30 launderable*
- Light and comfortable
- Excellent tear and bursting strength
- Impermeable to fluids
- Breathable and waterproof
- Compatible with a range of accessories
- Can be used as a standalone garment or over-garment
- Available in a range of colours

The AVOCET is performance tested to ISO EN16604:2004 and the ASTM F1671 bacteriophage challenge benchmarks.

Compliance with NFPA 1992-2018 liquid splash.

*Contaminated suits should never be laundered and should be appropriately destroyed.

About OPEC CBRNe

OPEC CBRNe is a designer and manufacturer of high comfort, high protection chemical, biological and antiviral suit systems.

OPEC became distributors of the long established Remploy range of CBRN suits in 2004. In 2015, OPEC CBRNe was established to take over the design and manufacture of the Remploy CBRN range of suits. Since then, our UK based team has been dedicated to maintaining the Remploy legacy by developing suit systems which optimize end user comfort without compromising protection.

We have innovated and improved chemical and biological suit systems to provide the lightest, most comfortable PPE for both CBRN and antiviral protection.

In 2019, our leading product, the KESTREL, was selected by the Australian DoD as their sole sourced CBRN ensemble as part of a 10 year supply contract. The Kestrel is our two piece medium protective ensemble.

We have manufacturing capability across the world in locations including the UK, EU and Asia, with expertise in supplying large volumes as well as smaller MOQ's.
