

# WE GET YOU HAVE A BUSINESS TO RUN.

To maximise your Apple® deployments, you need Jamf Apple Enterprise Management and IT orchestration by CDW.

## Do you have Apple devices?

Jamf is ideal for:

### Business

Mid-market to enterprise-level management solutions

### Education

Accessible management to powerful, customisable solutions

### Healthcare

Enhance the patient experience, streamline clinical communications and personalise telehealth.

Jamf is trusted by organisations, to maximise their Apple initiatives, helping organisations succeed with Apple. As the standard in Apple Enterprise Management, with sole focus on the Apple ecosystem, industry leaders across the globe choose Jamf to:

### Why pair Jamf with Apple?

Jamf is the only Apple Enterprise Management solution of scale that remotely connects, manages and protects Apple users, devices and services and offers same-day Apple OS support for every macOS, iOS, iPadOS and tvOS release and Industry-specific apps and workflows to meet your exact needs.

#### Connect your users

- Account provisioning
- Identity management
- Password sync
- Conditional access
- Customised app store

#### Easily manage your devices

- Zero-touch deployment
- Device management
- App lifecycle management
- Customised inventory
- Security enforcement

#### Protect your endpoints

- Antivirus protection
- Compliance monitoring
- Security visibility
- Behaviour detections
- Threat hunting

- Automate the entire lifecycle of Apple management
- Personalise Apple devices to a specific user's needs
- Preserve the Apple device experience users demand
- Access the largest Apple IT community on the planet

### Business solutions for Apple

As more organisations offer their employees a choice in work technology, the demand for Apple continues to grow. And with every Apple device, organisations need to offer users secure access to the resources they need, empower IT with a management solution that delivers the functionality required in today's modern work environment, and provide information security with the peace of mind that devices and data are protected at all times.

#### Jamf Pro

##### Enterprise Management Solution

If your environment calls for enterprise-level features and functionality, Jamf Pro is the answer.

#### Jamf Connect

##### Identity and Authentication Solution

If your users would be more productive with one password and identity to access everything they need, try Jamf Connect.

#### Jamf Protect

##### Endpoint Security Solution

If you need to stop Mac security threats before they start and enjoy ongoing Mac analysis, Jamf Protect is for you.
