

# Blended Virtual ILS and BLS Training

*Safely complete your training without closing your practice*

With the restrictions caused by the current pandemic, keeping your staff annually trained is not easy, so why not consider meeting your BLS and ILS obligations through virtual training.

ProTrainings have been offering blended training since 2008 integrating online video's for better learning. We have now introduced virtual practical assessments using Zoom to meet your requirements and without you having to close your practice to meet these standards.

## Advantages

- Learn the theory at times that fit in with your busy schedules
- Ensure you keep your staff Coronavirus safe
- No need to close your practice to take your training
- Safest way of taking training in the current pandemic
- Receive the same certificate as the course is delivered in full in the same way as a class course
- Save money on not having to close the practice for a day and minimise the impact on patient care
- The instructor is there to answer any questions and ensure you meet the assessment requirements of the course
- Available for Basic Life Support and Immediate Life Support courses in all versions including Dental and Healthcare
- We send the manikin and training equipment to you and we collect on completion or you can buy the equipment and use it next time for a reduced price.

## How It Works

*Please follow the instructions below to understand how delivering remote virtual BLS and ILS training works and how you contact ProTrainings to book your course.*

**STEP 1** - Contact ProTrainings to set up your training dashboard for your company and to add all the staff you wish to train.

**STEP 2** - Staff learn using our video online training at a time that suits their busy schedule.

**STEP 3** - Set a date when the virtual practical session will take place.

**STEP 4** - ProTrainings send out a set of loaned equipment to your practice.

**STEP 5** - Set up a computer with webcam to facilitate the course and get the equipment ready.

**STEP 6** - During the day, staff attend the practical session live with a qualified instructor in small groups to practice the skills and pass the assessment. You clean the equipment between students to ensure no cross infection.

**STEP 7** - Package the equipment and ProTrainings will arrange for the equipment to be collected and for your certificates to be sent to you on completion.
