DEALER DIAGNOSTICS MADE EASY

How to Make a Success of Vehicle Diagnostics

Today's average high-tech car is one of the most complicated devices most people will ever interact with, and the skills and tools of today's technician must evolve to cope with these software-defined machines. So, how can a small independent garage stay profitable and stand toe-to-toe with main dealers?

Invest in the Right Equipment

Incorporating dealer diagnostic tools is essential to any independent workshop. A workshop using a dealer diagnostic tool has access to security components, OEM technical information, and much deeper levels of diagnostics and programming.

Get Technical Support

Subscribing to live technical support for vehicle repairs and software is a cost-effective way for workshops to get technical assistance without hiring a full-time IT staff and a group of master techs. You will learn and earn money while someone else is looking at the problem.

Invest in Training

Well-trained and knowledgeable technicians increase productivity, keep jobs in-house, increase staff retention, improve customer service and enhance a workshop's reputation. Faults can be identified and fixed quickly and efficiently, building a reputation for high-quality service.

Stay Up-to-Date with EV Technology

As electric and hybrid vehicles become more prevalent, it's important to have the skills and tools needed to service them. Workshops can stay ahead of the competition and provide EV customers with an extra level of reassurance to customers with EV training and battery testing.

DEALER DIAGNOSTICS MADE EASY

Why Use Dealer (OEM) Diagnostic Tools?

At Maverick Diagnostics, we believe that adopting the use of dealer diagnostic tools is a crucial first step to ensuring the profitability and longevity of your workshop. But why?

Accuracy: OEM diagnostic tools are designed specifically for the vehicles they diagnose, providing more accurate identification of the root cause of a problem.

Ease of Use: OEM diagnostic tools are designed with the specific needs of the vehicle manufacturer in mind and give registered users security access, making them more efficient to use than generic tools.

Access: As an independent workshop, you have the right to access all OEM information, diagnostic data, and diagnostic tools that cost millions to develop, so why not compete directly with your local main dealer?

Customer Retention: Keep repair and diagnostics in-house. With dealer tools you'll no longer have to pass up complicated jobs to the dealer.

Did you know we also offer Dealer Tool Support?
You fix the cars. we do the IT.

GENUINE DEALER TOOLS

THE SAME TOOLS THAT DEALERS USE!

JAGUAR LAND ROVER TOOL BUNDLE

us for
pricing

The AVILOO FLASH Test is a quick test that in just 3 minutes determines the functionality of the traction battery without moving the vehicle.

DIAGNOSTICS WORKSTATION ADD-ONS

DIAGNOSTIC WORKSTATION TROLLEY

**From
£375.00 +VAT**

Storing your diagnostic tools has never been easier. With this Diagnostic Workstation Trolley, you can safely and conveniently store your tools in your workshop. It comes complete with enough shelves to fit the GYSFLASH 30, 50 and 100 models. The hooks on the sides are also perfect for storing your cables. Additionally, your laptops can be securely stored on the top shelf of the trolley. Also enough storage space for printers.

GYSFLASH 121.12 CNT FV

**From
£1,078.00 +VAT**

The GYSFLASH 121.12 CNT FV (120A) with 5m Cables is a high-power charger. It functions to keep a 12 V lead or lithium battery at a stabilised voltage whilst diagnostics are being carried out. It can deliver the recommended charging cycle for the maintenance of the most advanced vehicles available. The product is multi-functional and customisable. Functions include:

- Charging: for 12 V Lead or Lithium (LFP) batteries from 5 to 1500 Ah (very flexible!)
- Diagnostics: supports up to 120 A for 12 V batteries in vehicles in the diagnostic phase, in maintenance workshops.
- Showroom: provides power compensation when using the electrical accessories of a demonstration vehicle. It also manages the optimal charging of the battery.
- Tester: You can test the battery voltage and assess the starting system (starter + battery) as well as the condition of the vehicle's alternator.

Why is Battery Support Important?

During diagnostic work or programming operations and software updates, the vehicle's systems are operating solely from the battery. Maintaining battery charge during this process is critical to prevent data loss and avoid damage to control units. If the voltage goes too low or too high, it can cause the programming to fail or even make the module useless. You might have heard of this as "bricking" the ECU, and it can cost a workshop a lot of money.

Scan to watch video on battery support.

GYSFLASH 102.12 HF

This Battery Support Unit is essentially a power supply which incorporates Inverter technology. 5-meter cables are also included. The unit can be mounted either on a wall or on a car lift. It provides high power, supplying up to 100A. You can expect a perfectly consistent battery voltage when diagnostics are being carried out.

- Avoidance of electronics overheating through heat sensors
- Protection against short circuits and overcharging
- Stand-by mode
- Protection against misuse
- Auto-restart (memorises data in case of a power cut)
- Calibration of cables

**From
£896.00 +VAT**

GYSFLASH EXTRAS

Magnetfix for GYSFLASH 102.12 Battery Support Unit Magnetfix is a support system with the purpose of mounting the GYSFLASH 102-12 to a vehicle lift. The overall aim is to avoid the loss of data and also to avoid any threats or damage to control units as diagnostics are taking place. An essential device for security and piece of mind.

**From
£107.00 +VAT**

8m Cables & Clamps for GYSFLASH Battery Support. Resistant and durable cables and clamps designed for the GYSFLASH Battery Support. This product is suitable for workshop use and can also be used at home. Making charging easier when extra length is required.

**From
£149.10 +VAT**

DIAGNOSTICS WORKSTATION ADD-ONS

PANASONIC CF54 DOCKING STATION

From
£220.44 +VAT

A handy docking station and Desktop Port Replicator, enabling your laptop to work as desktop computers for the CF-54 Mk1, Mk2, and Mk3 toughbooks. The Panasonic docking station features an on/off button, cable lock slot, slide release, as well as a useful self-cleaning connector, two USB 3.0 ports, two USB 2.0 ports, a VGA port, an HDMI port, an RJ45 port, a serial port, and an AC jack port. This product is a refurbished item as so will show minor signs of wear.

PANASONIC CF-D1 DOCKING STATION

From
£450.00 +VAT

A Panasonic CF-D1 docking station with DVD Drive. This docking station is designed for your portable Panasonic CF-D1 tablet to work as a desktop computer. This is handy for professional use in the office etc. Additionally, the docking station can have multiple screens added as well as an added mouse and keyboard for a better user experience. The CF-D1 docking station has a LAN port, six USB connections, one serial port and one VGA port.

WIRELESS KEYBOARD & MOUSE

From
£29.95 +VAT

Add the Artek wireless keyboard & mouse to complete your set-up. The perfect size to fit onto the workstation alongside the docking station.

- Easy Setup: Simply insert the Nano USB receiver into your computer and use the keyboard and mouse instantly.
- One USB Receiver for All: Use the Keyboard and the Mouse with the same receiver, to save the USB port in your computer.
- Long Life Rechargeable Battery: Rechargeable lithium battery with an industry-high capacity lasts for 6 months for the keyboard and 4 months for the mouse with single charge.
