Critical event management

RAYVN - the simple solution to help you prepare for and manage emergencies and critical events

RAYVN

Critical Event Management

What are critical events?

Equipment failure or property damage	Personal injury	Security / Cyber attacks	Shipping / transportation disruptions

Challenges of managing critical events

|				
'Pen and paper'	Reaching out on the phone	Isolated / complex systems	No overview of what's happening	Not enough preparation / exercises

RAYVN

About RAYVN

RAYVN was founded in 2016 in Bergen, Norway, by Henrik von Schlanbusch, Erik Skaara, and Øyvind Meistad based on the market need for a simple, intuitive and effective system to manage critical events. They saw the needs to replace manual and complicated tools such as whiteboards, pen, and paper.

The name RAYVN was inspired by the old Norse mythology, where the god Odin has two ravens, called Hugin and Munin. Their tasks were to hover over the earth, gather information, and report back to Odin.

RAYVN is just that.
