Health and Safety Training

Interactive Games, Animated Training, Visual Content,
Online Learning and Apps

A family business established for over 20 years based in Leicester.

Specialising in engaging **Health and Safety training, visual content and management solutions**. Starting with a health and safety board game back in 2002, our founder Rick Cox believed that any training can be made fun. Since then, this philosophy has been transferred to all of our products, bringing life into your training sessions.

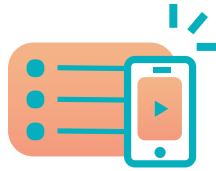

Our aim is for continued improvement in health & safety awareness by providing innovative, engaging and educational products.

With our energy and drive we want to help drive down the numbers of workplace accidents, incidents and cases of work related ill health across the whole world of work.

Make your training fun

Say goodbye to dull and boring training. Give your trainees an experience they won't forget. We specialise in the creation of highly visual and interactive content.

Engaging training games

Multi-choice quizzes, animated fire activities, picture quizzes, safety bingo and many more. Our games are perfect to enhance your learners experience, bringing life to your sessions.

Customized for your business

Bespoke training through attractive animations, graphics, live video and photography. We develop your training to fit your business.

SERVICES WE OFFER

E-LEARNING

Bespoke and personalised training course creators for all types of industries. We also offer over 100 different extensive e-learning courses all of which are ready to go

TRAINING GAMES

Training games to aid education, awareness and reinforce the message. Any subject covered

VISUAL CONTENT

With our in house design team, we have the flexibility to create content that best suits your needs.

SAFE GUARD

The trainers and trainees companion and valuable source of information for workers wherever they may be.

ORBIT MANAGEMENT SYSTEM

A customised and complete secure resource centre for your business.

FIRE GUARD

The mobile fire risk assessment application and pdf creator, for all types of industry and workplace.

I-AUDIT

The mobile application for work-place audits & inspection of safety, health, environmental and behaviour.

E-PERMIT TO WORK

The electronic permit to work system to control and ensure total safety with contractors on site.

Both fun and engaging, the games are a great way to bring life to your training sessions.

We offer various exciting activities on our Play It Safe Games web application.

MAKE IT YOUR OWN Customise Content

Use our of the shelf content or build your own bespoke content into the games to make it your own. Your games interface also comes fully branded for your company.

TRAIN ANYWHERE Multi-Platform

Plays on all mobile devices and tablets. IOS and Android systems. Work from your desktop or on the go with our offline mode, making training possible for even the busiest of people.

ADD COMPETITION Create Challenges

Create challenges and competitions adding even more excitement to your training. This form of healthy competition is great to help spread vital health and safety messages.

When delivering dull training sessions, your employees can lose focus and attention.

Our training games are the perfect solution to improve the alertness and focus of the attendee. Our games are proven to re-enforce important training content to your attendees.

We have 8 exciting training games to choose from. This includes; multi-choice quizzes, 360 safety tours, fighting a virtual fire and spot the hazard activities.

OUR GAMES

UNDER PRESSURE

Highly interactive quiz style game where you can add your own questions and answers to add excitement to the training room!

SPOT THE FIRE HAZARD

Find all the fire hazards on the image before the time runs out!

SPOT THE HAZARD

Find all the hazards on the image before the time runs out!!

FIRE SAFETY

Choose the correct extinguishers to proceed through the different fire scenes!

SAFETY BINGO

1 or 2 team game with a series of questions to answer. Go for the line or full house to win!

FACTS

Test your knowledge on your chosen topic in a facts quiz.

SAFETY TOUR 360

Explore different working environments through virtual tours and immerse yourself into the scene

PICTURE QUIZ

Identify the safety issues within the shown photos and more!

GAMES LICENCE

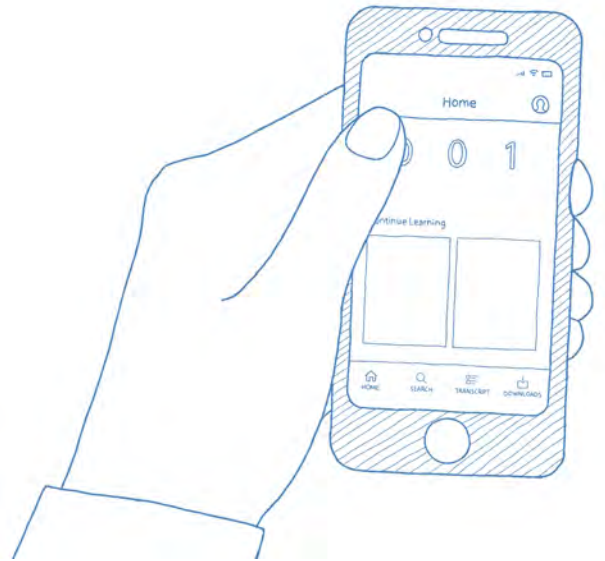

Our training games are supplied on an annual licence basis, giving you full access to your own game centre. Add unlimited versions of the games, from safety to human resources.

Each licence comes with around the clock technical support. We will ensure you and your trainees have the best experience they can.

Specialists in Health and Safety animated training video production.

We understand that today's employees need more than basic training content. Bring your training content alive with EHS Global Tech.

With our eye-catching visuals and content, we create animated training courses personalised to your business. Engage your employees in vital training and say goodbye to the PowerPoint presentation.

Bring your training alive

We create bespoke animated training courses, covering any subject of your choice. We can bring your existing courses to life or develop training videos with you on your chosen subject.

In-house design team

With our in house design team, we have the flexibility to create content that best suits your needs. Whether it's illustrating specific tools and machinery used within your business or illustrating the sites and locations your workers will be operating in- we have the means to make content that is personalised to suit your training goals.

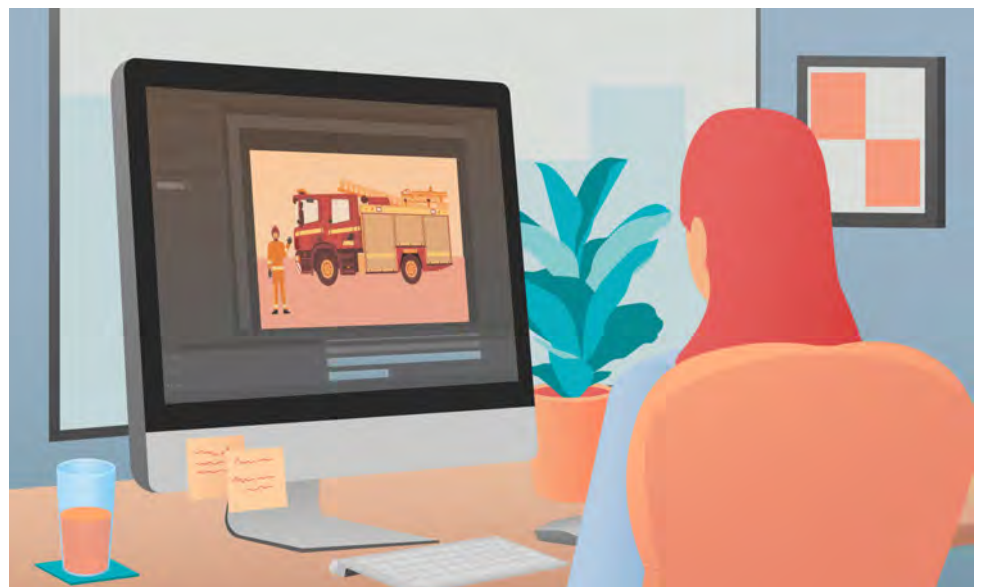

Multi-lingual

Get your training videos professionally translated and narrated to use worldwide across your business. We cover languages worldwide including: European, Asian and the Middle Eastern.

Services we offer

- ✔ Module Creation
- ✔ Storyboarding
- ✔ Graphic Design
- ✔ Character Creation
- ✔ 2D and 3D Animation
- ✔ Professional Narration
- ✔ Translation Services
- ✔ Photography and Film
- ✔ Video Editing

Fun, engaging and educational, add excitement to your training sessions with our interactive training games.

Play it Safe Games can be used as an excellent learning resource in schools, colleges and universities.

Enhance your student's learning experience through gamification.

Our training games are the perfect solution to improve the alertness and focus of the attendee. Our games are proven to re-enforce important training content to your attendees.

We have 8 exciting training games to choose from. This includes; multi-choice quizzes, 360 safety tours, fighting a virtual fire and spot the hazard activities.

Use the activities across all topics.

Introducing 'Orbit LMS' our e-learning solution.

Simple, intuitive, attractive and robust LMS system to host all types of e-learning and trainer driven courses.

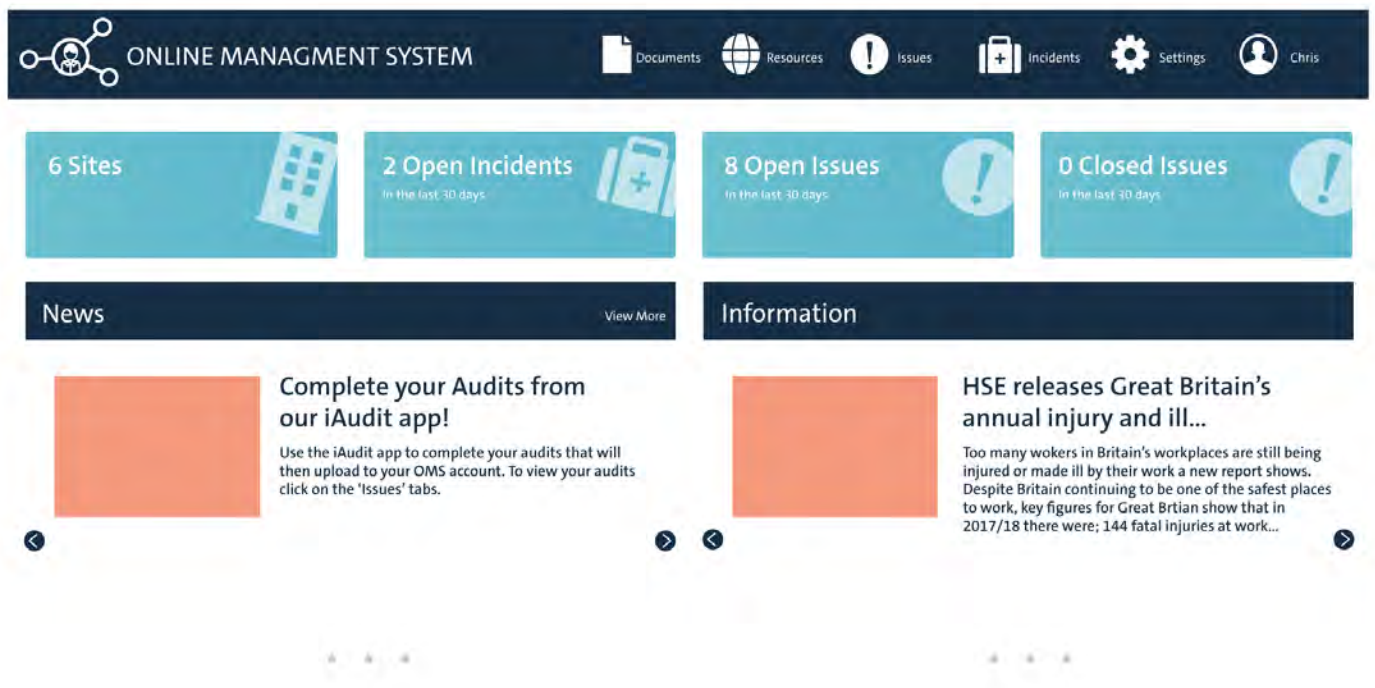

The software allows you to host all of your training on one organised and user-friendly platform. You can produce reports so you can manage your training and track employee progress.

Our LMS system is ultra-modern and secure. This gives our clients the confidence they need to ensure all their records and data are safe.

Why choose our Orbit LMS System?

- ✓ Stay compliant and track your employees training progress
- ✓ Add your own training course content.
- ✓ Upload videos and attractive animations.
- ✓ Take part in our games activities as part of the courses.
- ✓ Engaging content.
- ✓ Branded interface with your companies identity.
- ✓ Separate LMS admin system, allowing you to populate your e-learning system
- ✓ Robust reporting functionality
- ✓ Track employees pass rates and see who's due to start courses
- ✓ LMS links with our management system and permit to work system.
- ✓ Link with our Safe Guard application for training on mobile phones and tablets

Extensive reporting functionality allows you to see how your employees are performing with their training. All reports can be configured to your preference, including locations, countries, offices etc. The administration dashboard will give you a great overview of all the activity in your LMS.

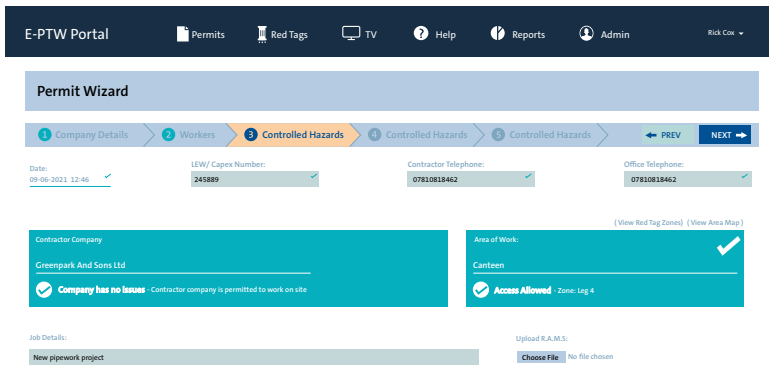

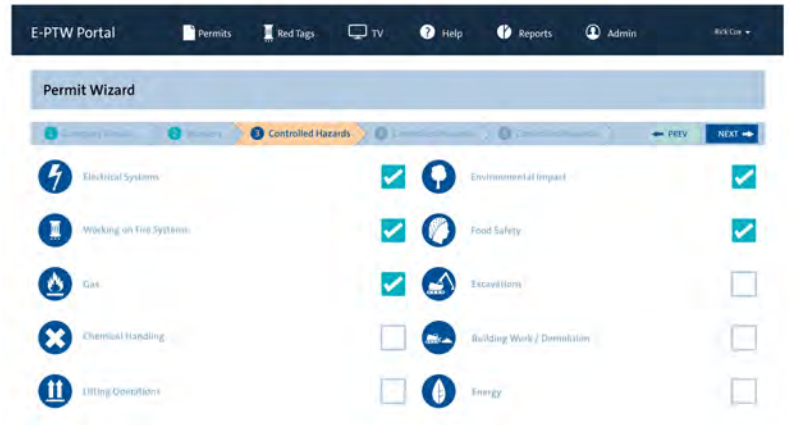

A huge benefit of using our LMS system is that you can use our training games as part of your curriculum. These games are great at breaking up training content and engage employees.

The Orbit LMS is also compatible with our Orbit Management to System and electronic permit to work. This can help centralise your businesses management and integrate all the systems together.

The LMS is also linked with our Safe Guard app, where employees can train on mobile phones or tablets. All progress can be tracked in the LMS admin system.

Say goodbye to endless paper copies of permits to work on site.

Our Electronic Permit to Work (EPTW) software allows all permits to be issued online, safely storing all your documents. Whether a contractor requires a permit for hot work, working at heights or electrical, our EPTW can issue permits for all categories.

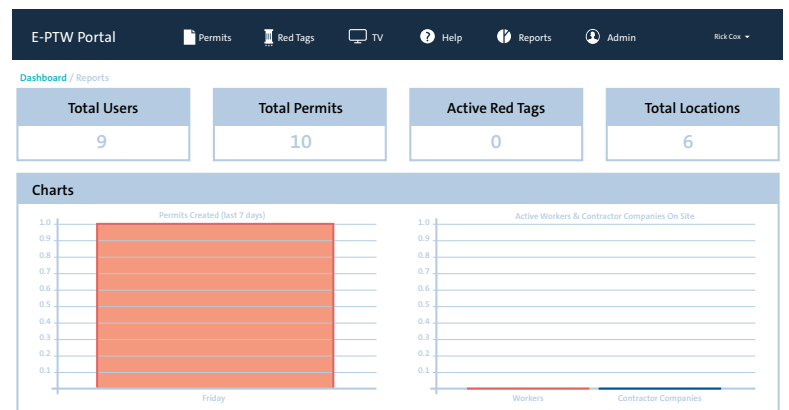

Track training across your business.

Our EPTW system can be linked to our LMS and track training against workers visiting sites ensuring conformance to all company control measures.

Our powerful 'permit issuing wizard' guides you to populate the EPTW with certificates for selected workers. This then checks against the LMS allowing the company to ensure that all training is up to date.

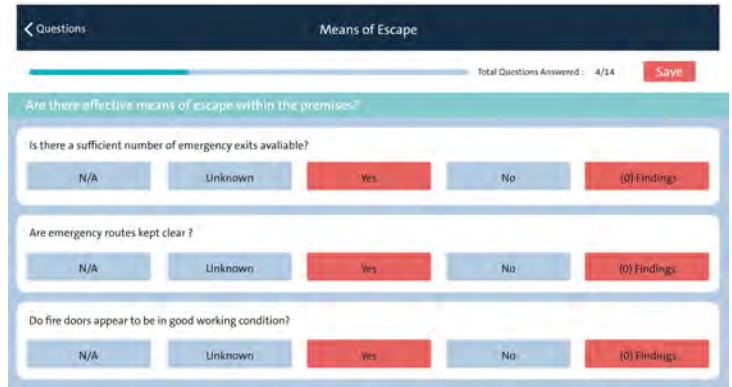

Track your contractors on-site.

The software can also be used stand-alone and independent. This allows you to populate via CSV with details of your contractor companies and workers.

Perform your fire risk assessments directly from your iPad.

Fire Guard takes you through a user-friendly fire risk assessment, step by step with best practice methods in place. Our fire risk assessment app will help streamline your workflow and remove the endless paperwork.

Professionally developed.

The app has been developed with the help of experts in the field to make sure quality and competence is ensured. You can also add pictures to your assessments along the way for additional evidence.

File your reports with ease.

Once the assessment has been completed, you will be taken through the final severity section. This gives you a score for your final assessment. At this stage you can PDF export your fire risk assessment for your records or email to anyone it may concern.

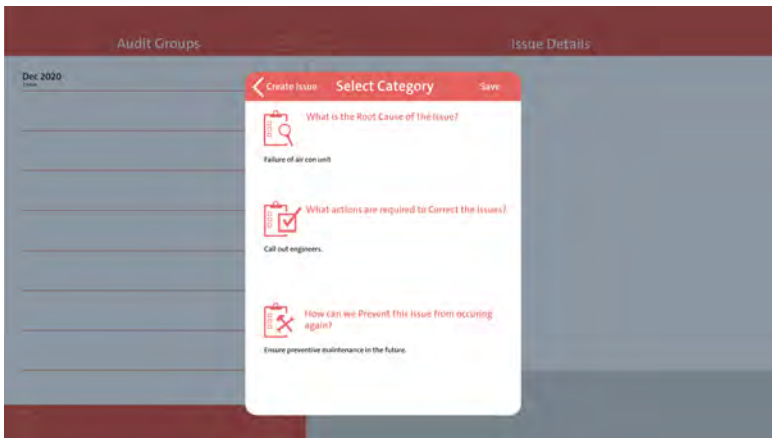

Your Health and Safety mobile audit app.

iAudit is an inspection reporting and corrective action app. Streamline your entire workplace inspection and auditing process with iAudit. Save time, money and remove the need for lengthy reporting. Use the powerful corrective action tool to solve root causes of audit issues.

Use the iAudit app to record any health and safety, environmental, quality or behavioural issues. Once your audit is complete, a report will be compiled into a downloadable PDF so you can email on to colleagues.

Priorities areas to focus on.

The iAudit app allows you to set a priority for each hazard and a location. You can even take photos of any issues to add to your audit inspection. iAudit is simple to use and is freely available on the Apple iStore.

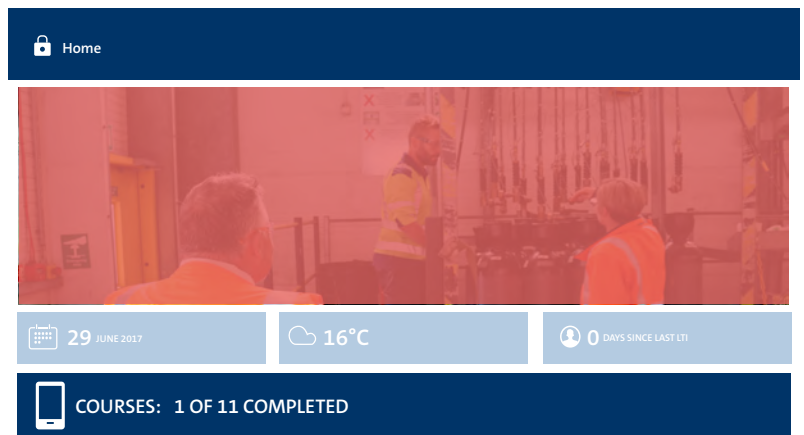

What's more, the iAudit App will work locally, even without an internet connection. If data roaming or Wi-Fi is available, issues raised in iAudit will synchronise to our Orbit Management System (OMS) if you have an account.

Why i-Audit?

- ✔ Complete workplace inspections on your mobile phone.
- ✔ PDF export of audits.
- ✔ Email PDF reports to colleagues.
- ✔ Streamline your audit reporting.
- ✔ Perfect managers tool for on-site health and safety auditing.
- ✔ Brand with your company logo.
- ✔ Compatible with our OMS (Orbit Management System).
- ✔ Take pictures to add to your audits.
- ✔ Annotate images added to audits to highlight areas of importance.
- ✔ Corrective action tool to resolve root cause analysis.

The mobile Health and Safety training app.

The Safe Guard application is your companion and valuable source of information for workers and visitors. Employees can log into the app and complete training courses on the move, at home or in the workplace. The app is a great tool for micro-learning and training courses around the 5 minute length.

Useful in many situations.

The app can be used for many situations, including informing visitors of site safety rules on a tablet in a business reception. The app can be branded and is compatible with our Orbit Learning Management System. Course's and modules are produced that can then be synchronised to the Safe Guard app.

Safe Guard will allow you to undertake various training modules that have been assigned to you. These courses and modules can be streamed or downloaded to the app for completion offline. Training data will synchronise back to the learning management system once a wi-fi connection is established.

The application will also provide valuable links to information and guidance documents. You can send live messages and notifications to all the app users notifying them of incidents or important news updates. There is also a display for the number of days since last lost time incident (LTI).

As a first-time user you can register on the application to complete your training. As an existing worker you can log in with your existing credentials to view your courses. As a trainer you can log into the app with admin permissions and select multiple trainees. This is great when presenting short training talks, i.e. tool box talk, safety briefs etc. You can have the ability to track who was present for your records and ongoing safety commitments.

Why choose Safe Guard?

- ✔ Training on mobile phones and tablets
- ✔ Ideal for refresher training or micro training modules
- ✔ Can be branded to your business.
- ✔ User-friendly interface.
- ✔ Train at your convenience
- ✔ Train offline with local content.
- ✔ Stay informed with important safety bulletins.
- ✔ Use Safe Guard as a safety induction tool on a tablet in receptions
- ✔ As a trainer you can conduct quick fire tool box talks with small group of workers and
