

Dalton Safety will be Exhibiting on stand 4/F94 at the Health and Safety Event 2024.

Dalton Safety, formerly known as Slice Products Ltd is excited to be participating in the Health and Safety Event for a second year in a row. Following the acquisition of Slice by Safety Products Global two years ago, Dalton Safety has emerged as a leading distributor of Slice, PHC and Klever products.

As part of our strategic evolution, Dalton Safety has seized the opportunity to diversify its offerings, becoming a comprehensive supplier of Personal Protective Equipment (PPE). This year is the first year we will present all the brands in our portfolio.

A highlight of our exhibition is the new Klever ECO range, notably the ECO XChange. This innovative product features a handle made from 100% pre-consumer recycled materials, making it an ideal solution to support your company's sustainability objectives. The reusable handle and replaceable blade head design allows you to reduce plastic waste and with 4 blade head options available, you can select the right head for your application. From corrugate to plastic banding and tape, the Klever ECO XChange is the perfect tool for any warehouse or retail environment.

You can also visit us to test your hearing as we will be demonstrating the innovative HearOAE, a tablet based otoacoustic emissions device that makes hearing assessments far more accessible and efficient.

“At Dalton Safety, we recognise the importance of not only ensuring workplace safety, but also advancing sustainable practices” Said Mike Dalton, Managing Director of Dalton Safety. “The Klever ECO XChange exemplifies our commitment to offering cutting-edge solutions that align with our customers' ESG goals”

We invite attendees interested in improving workplace safety and advancing sustainability objectives to visit us at stand 4/F94. Our team will be on hand to discuss how Dalton Safety can tailor solutions to meet your specific needs, enhancing both safety protocols and environmental performance.
