iDware

PIAM Suite OCMS

for managing physical identities, credentials, and access management – designed for enterprise organisations.

iDware

Our PIAM (Physical Identity & Access Management) Suite OCMS is a web-based solution for managing the entire lifecycle of individual identity and credentials. OCMS can either be used as an on-premises or a cloud-based security solution (SaaS).

It has been designed to enable mid-and large-size organisations boost security and Return on Investment by centralising and streamlining the management of employee, visitor and contractor credentials as well as physical access authorisations.

No matter which third-party systems are used (HR systems, access control, parking or locker management, etc.), they are fully integrated into our PIAM Suite OCMS so that they can share information and data seamlessly and processes become more efficient.

Core Features PIAM Suite (OCMS)

Credential Management
Efficiently manages the lifecycle of access and identity credentials, including bulk issuance and lifecycle management for single or multi-location premises.

Access Management
Features a workflow engine that automates requests and approvals for physical access permissions across locations.

Visitor Managerment
Streamlines visitor processes with dedicated portals for hosts, visitors and reception, eliminating queues and enhancing efficiency.

Contractor Management
Simplifies contractor permission management, tracking, and maintenance, with contract companies managing their personnel's details directly.
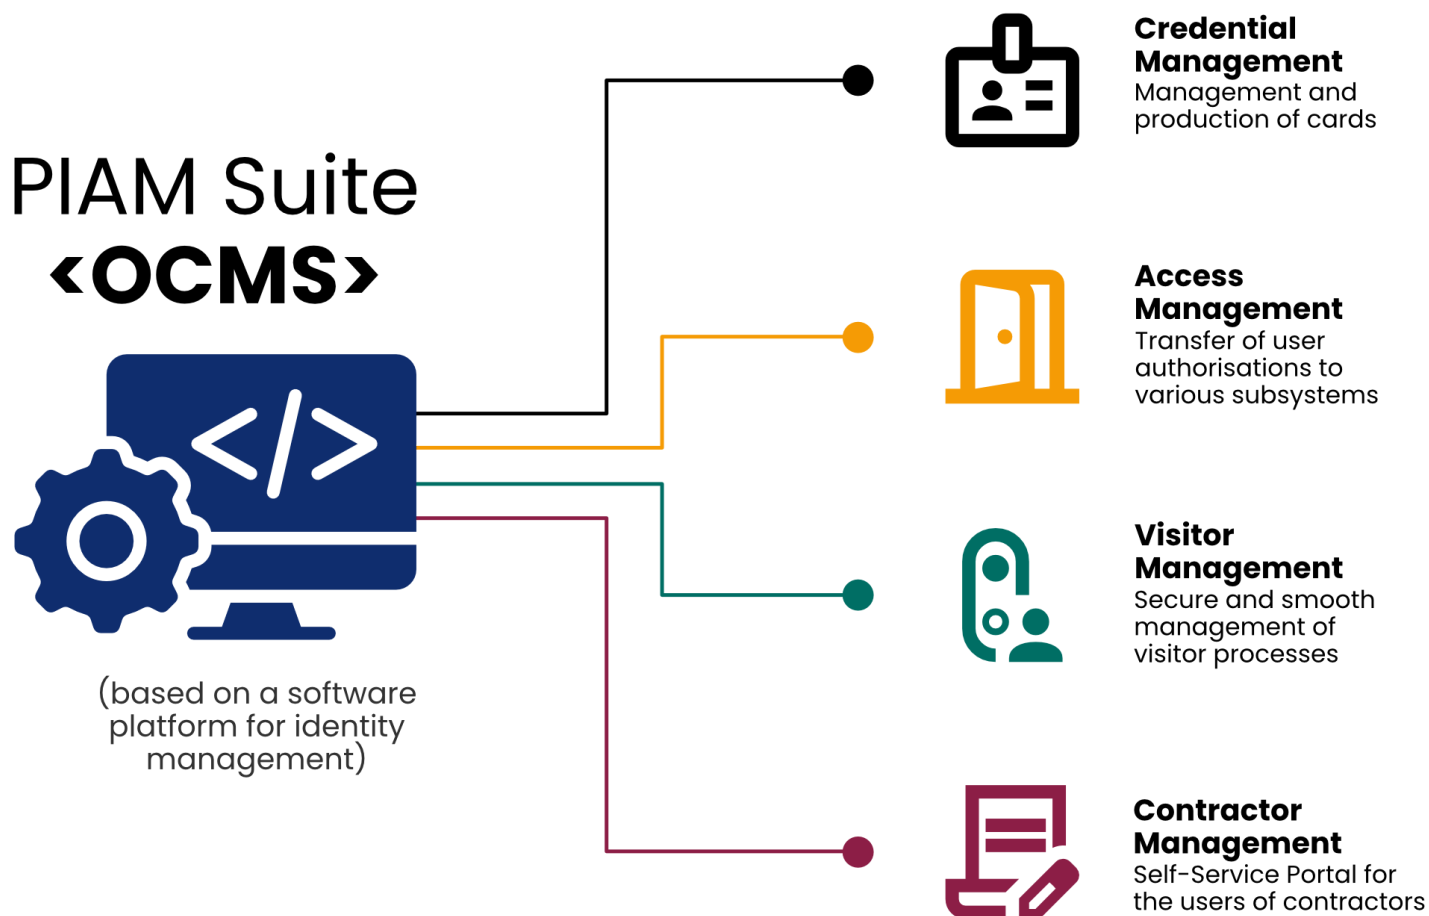

Photo Capture Tool (AI-supported)
An advanced identity image capture and validation system, allowing individuals to upload images and integrate them seamlessly into OCMS.

User Self-Service
Users can manage and update employee & card data themselves as well as take card-related actions, e.g. for activation and blocking of cards.

PIAM Suite <OCMS>

(based on a software platform for identity management)

Credential Management
Management and production of cards

Access Management
Transfer of user authorisations to various subsystems

Visitor Management
Secure and smooth management of visitor processes

Contractor Management
Self-Service Portal for the users of contractors

Applications of PIAM Suite OCMS

Wherever there is a need to manage complexity, streamline processes, achieve compliancy and minimise risk.

Examples:

- Critical National Infrastructure
- Corporate and Enterprise
- Government and Secure Facilities
- Educational Institutions
- Healthcare and Medical Facilities
- Industrial and Manufacturing Plants

iDware

Key Business Benefits

∞ Centralisation
Unifies identity data across modules for streamlined processes.

☑ Compliance
Ensures adherence to governance & compliance policies.

↗ Efficiency
Automates workflows and reduces manual tasks related to identity and access management.

✓ Reliability
Ensured business continuity anytime thanks to a reliable platform.

⧉ Modularity
Modular design allows tailored configurations for unique organisational requirements.

🛡 Zero-Trust
Robust security architecture protects user management and sensitive data.

🐷 Cost-savings
Automates credential & physical access management, reducing administrative costs.

🛡 Security
Secure identities & access processes, for employees, visitors and contractors.
