PREVAIL
PARTNERS

Intelligence
Services

Prevail Partners empowers you to **understand risk**, **protect your people**, and maintain operational advantage, wherever you operate.

Service Highlights

Open Source Intelligence (OSINT)

→ Extract actionable insight from global digital sources— social, forum, open databases.

Geospatial & Imagery Intelligence

→ Track movements, analyse terrain, and pinpoint targets with satellite, mapping, and TerraHEX® visualisation.

AI-Driven Social Media Monitoring

→ Real-time network mapping, trend analysis, and automated threat detection.

Cross-Network Intelligence Fusion

→ Connect people, places, and patterns to reveal hidden risks and emerging networks.

Data Fusion & Link Analysis

→ Integrate multiple data streams (COMINT, GIS, sensor data) for actionable briefs designed for decision-makers.

Custom Analytical Reporting

→ Bespoke products—threat/vulnerability assessments, flash reports, strategic insights, stakeholder mapping.

Why Prevail

We Cut Through Chaos
Unrivalled Expertise
Expert Support and Guidance
Certified and Secure Systems
Technology-Backed Partnerships

Who We Serve

We work with government agencies, military units, private corporations, and non-profits. Every client has unique needs, so we deliver tailored solutions to fit their situation.

With the best in class team drawn from military, law enforcement, intelligence, and the private sector, we operate with integrity. Always.

PREVAIL APPROACH

Country Specific
Intelligence

MIDDLE EAST
Training & OSINT Capability

Integrated, Turnkey OSINT Solutions

→ From platform procurement and setup to hands-on analyst training, we deliver end-to-end intelligence fusion for government and security agencies.

Certified AI-Driven OSINT Digital Lab Training

→ Build sovereign capacity in social media monitoring, digital forensics, and cyber intelligence.

Build–Operate–Transfer Model

→ We deliver immediate intelligence impact while transferring expertise and ownership to your team.

UKRAINE EUROPE
Advanced Operational OSINT

Unique Regional Edge

→ Embedded in Ukraine, blending operational military insight with ground-truth networks and proprietary technology.

Geospatial Threat Mapping

→ TerraHEX® and Russian Target Mapping for precise risk context—even down to building level.

Incident & Temporal Analysis

→ Identify threat cycles in airstrikes, alarms, and attacks to optimise safety measures.

Request for Information (RFI)

→ On-demand thematic reports and situational decision support, driven by live conflict data.
