WELCOME TO INVENTORY AUDIT & COMPLIANCE

Audit & Compliance delivers a cost-effective solution for tracking assets across your organisation. It provides a clear audit trail of usage to enable you to make informed decisions on your software and hardware investments. The compliance module also completely removes the burden on administrative staff when ensuring that your building complies with statutory and regulatory standards. Audit & Compliance is the simple and smart solution to save time, money and resources within your organisation.

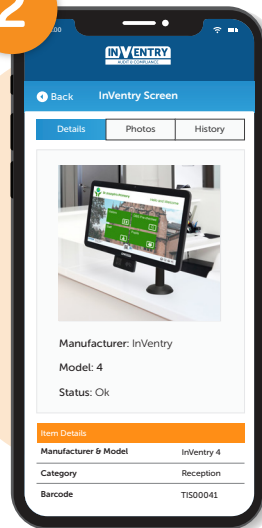

COMPLETE YOUR AUDIT IN THREE SIMPLE STEPS:

1

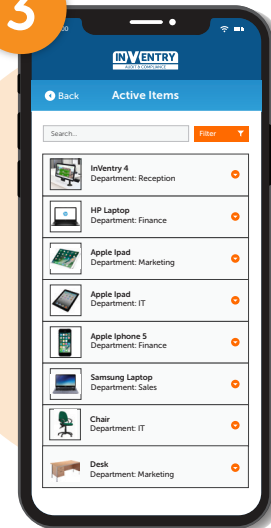

Download the app and
snap your asset

2

Google Deep Learning
populates asset details

3

Verify the details and add to
your asset register

AUDIT & COMPLIANCE FEATURES

AUDIT SERVICE

Save time and resources with our professional on-site audit service.

GOOGLE DEEP LEARNING

Automatically populate asset details just from a photograph.

LIVE GALLERY

Identify and access assets easily through the flexible photo gallery.

HELPDESK

Friendly support team on hand to help with any queries.

WARRANTIES

When uploading a new asset, simply add in your purchase date and Audit & Compliance will auto-populate the item's warranty and replacement dates.

MAT MODULE

Access asset and compliance information for multiple sites via one login.

VALUATION

Track the depreciation of your assets to make informed decisions on investments.

SIMPLE AUDITS

Scan the barcode on the door of the room you're wanting to audit and see all the assets associated with that room.

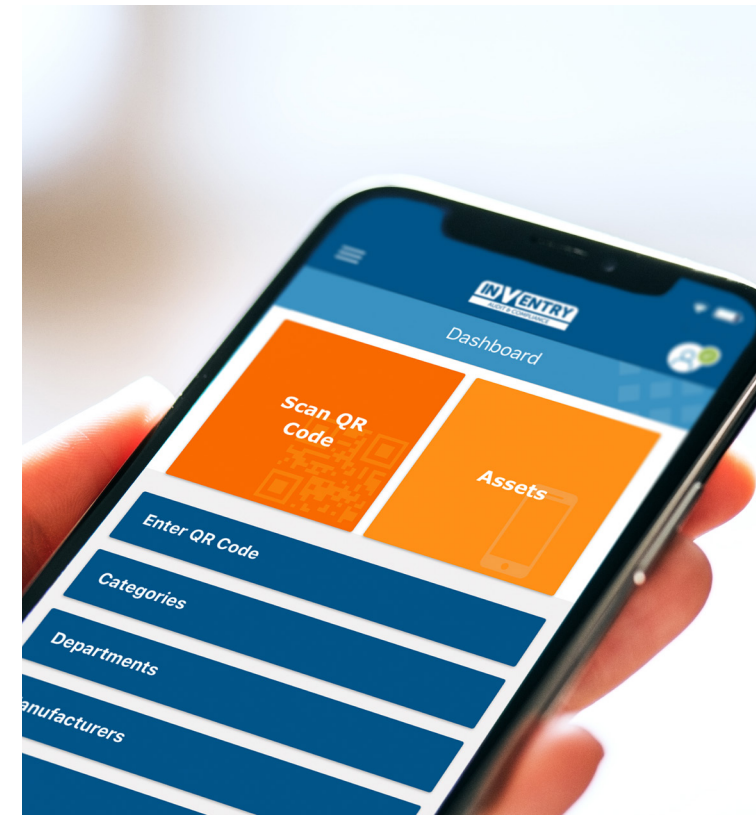

OFFLINE MODE

No internet connection? No problem, with our offline mode you can access Audit & Compliance from anywhere!

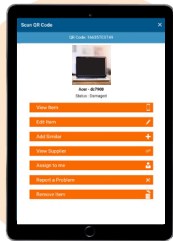

MIS INTEGRATION

For schools, users are populated directly from your MIS.

KEY FEATURES

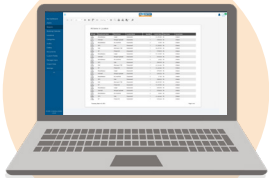

REPORTING A PROBLEM

Simply scan the barcode and report any problems you're having. This automatically sends an email through to your IT contact.

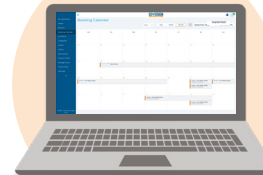

DOCUMENT STORAGE

Store all important documents within Audit & Compliance. From certificates right the way through to warranty details, the need for outdated ring binders is removed with our cloud-based option!

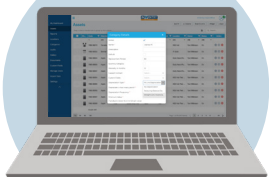

CUSTOMISED REPORTS

Easily report on assets, fully customise each report to show the data you need, and easily export to Excel.

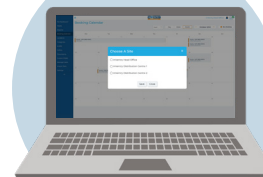

PRE-BOOK ASSETS

Pre-book laptops, iPads, cameras and so much more! Ensure your staff members or students have access to the facilities they need, and your assets are tracked at all times.

DEPRECIATION

Easily track the valuation of assets with our straight line depreciation feature. Agree on a time period, choose whether it depreciates monthly or yearly and even pull live reports on its current value at any time!

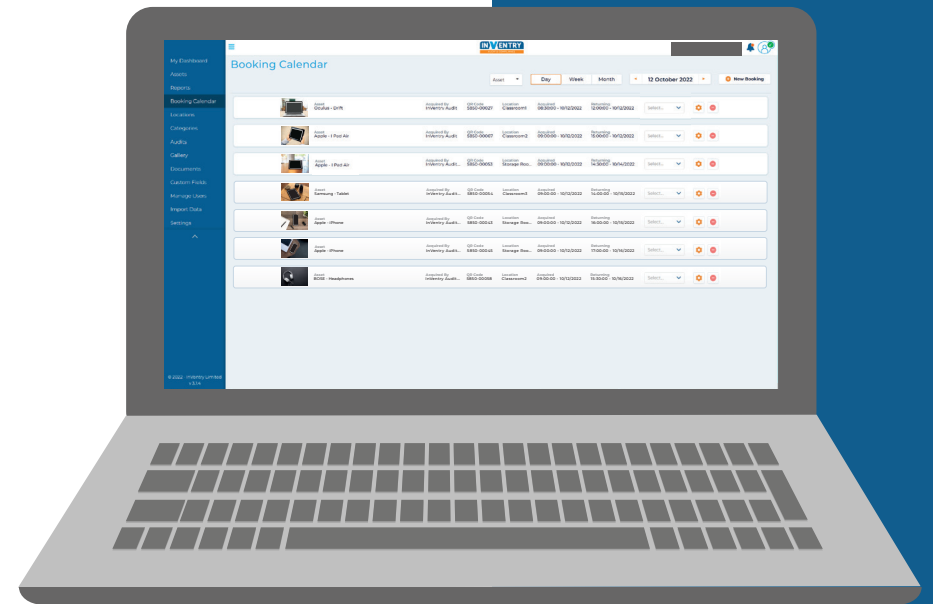

SITE LOCATOR

Organisations with multiple sites will have a full view of all locations and have the ability to easily switch between them all – saving heaps of admin time!

BOOKING CALENDAR

-  Book your assets out on a daily, weekly, or even monthly with our convenient booking calendar.
-  Easily identify if assets are booked out on an individual or recurring basis via the icons attached to the booking.
-  Simply delete your booking or make changes if you no longer need your asset booking or need to make any date and time amendments.
-  Mark your asset's location, the length of time you'd like the asset for, who's in possession of the asset and any additional comments; so you're always aware of where your assets are.
-  Keep track of where your assets are at all times with our returned assets and location view.
-  Add images to your bookings so others can easily identify which asset you've signed out.
-  Receive automatic reminder notifications for booked assets as well as notifications on any bookings that have exceeded their time slot.

CASE STUDY

THE OLDERSHAW SCHOOL

The Oldershaw School explains how InVentry's Pre-Booking feature transformed their Audit & Compliance software and simplifies their asset management processes.

CERTANTI DABTUR

THE CHALLENGE

With the School already utilising InVentry's Visitor Management System, Paxton integration and Audit & Compliance software for asset management, The Oldershaw School were looking to add to their InVentry portfolio by utilising our latest feature release; pre-booking assets via our new Booking Calendar.

The school was particularly interested in this feature as staff members required an effective method of establishing who had possession of which assets. They were also seeking a way to get rid of their manual tracking process and have the ability to easily manage their assets from one simple-to-use app.

THE SOLUTION

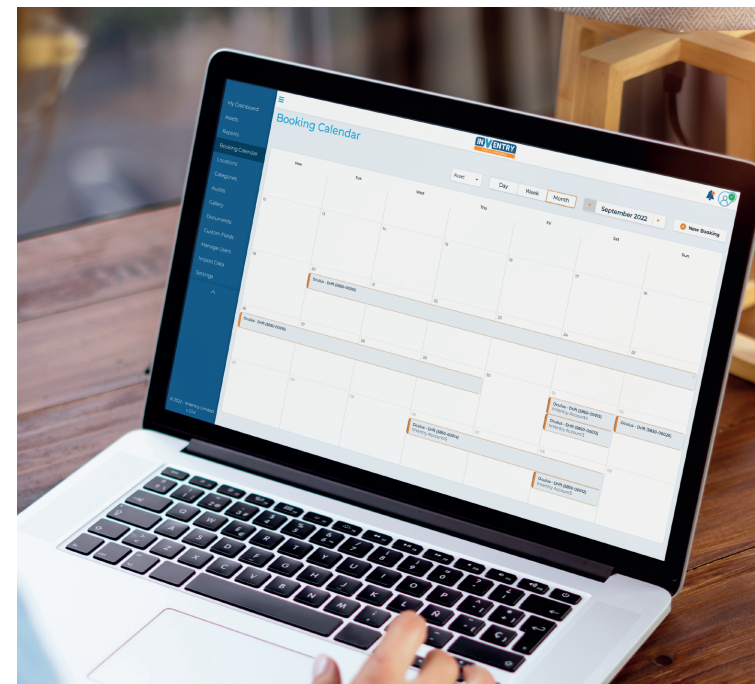

InVentry effectively worked alongside The Oldershaw School to ensure their outdated methods of manually tracking who was in possession of which asset was no longer needed. The solution has allowed them to easily and conveniently book laptops and cameras out on a daily and recurring basis. With the Pre-Booking feature being a tremendous success for the school, they're now also utilising this feature with their work phones and general office equipment.

Keith Hallam, Network Manager said: "we were previously using an excel spreadsheet to note which staff member had what asset. It was difficult to manage, and we constantly had to go in and manually check and update this. Audit & Compliance's Booking Calendar was so much easier to track and far more practical to manage."

With experience of using Audit & Compliance for asset management, The Oldershaw School were delighted with the new Pre-Booking feature as it meant that it reduced the apps and software they were using and saved tons of admin time.

“

THE PRE-BOOKING FEATURE HAS COMPLETELY MINIMISED THE TIME IT TAKES TO BOOK ASSETS OUT, AND BECAUSE WE WERE ALREADY SET UP WITH AUDIT & COMPLIANCE, THE TRANSITION WAS SO QUICK AND EFFICIENT, AND NOW EVERYTHING'S TRACKED AND MANAGED IN ONE PLACE.

”

CASE STUDY

MCAULIFFE SITE SERVICES

InVentry helps McAuliffe Site Services to improve their Asset Management across multiple sites with Audit & Compliance.

THE CHALLENGE

The company needed a cost-effective solution with minimal disruption to their everyday work environment. With an asset tracking system already in place, McAuliffe Site Services were looking for a system with the capability to read and register 3rd party labels.

THE SOLUTION

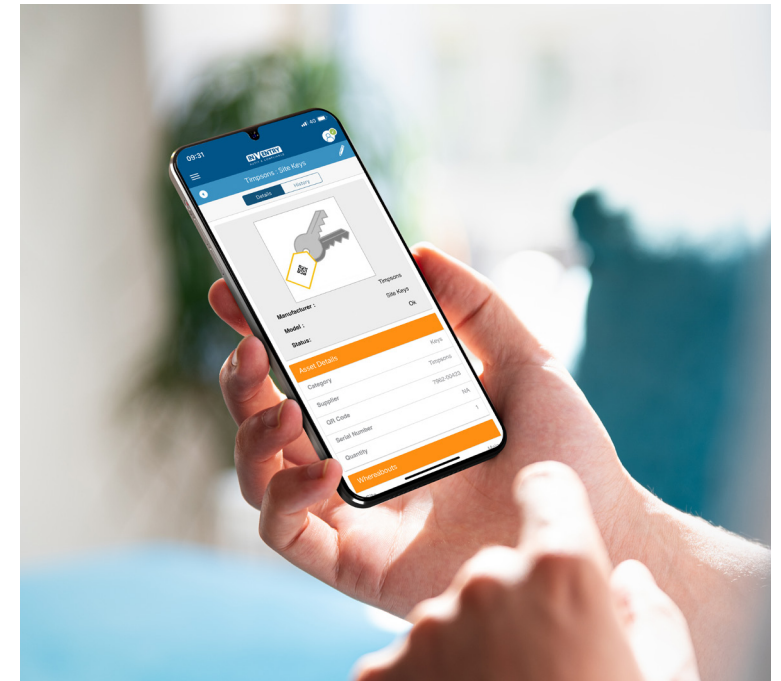

InVentry provided McAuliffe Site Services with a simple, yet effective solution to their asset management. With a quick turn around and minimal disruption to their clients, we were able to implement the InVentry system in as little as a couple of weeks.

This solution has allowed them to easily track their assets and conveniently locate which stock is both on and off their site, at all times. The ease of using the Audit & Compliance software on a portable device, has enabled the organisation to swiftly scan each asset as they're unloading their vehicles and their ability to sync this information via the cloud means they always have control over their asset management system. With regular planned software and programming updates, Audit & Compliance enables McAuliffe Site Services to develop and improve their own systems of working.

The Audit & Compliance software has allowed the staff at McAuliffe Site Services to compile a thorough list of assets on various construction sites, whilst storing the temporary asset owner information accordingly.
