We are improving the future with quality investments in construction.

Since 1978, and with a portfolio of landmark projects to its name, Eurotrade has been delivering high-quality products and services across the sectors of Commercial Structures, Industry, Emergency Housing and Bulletproof Protection. Over the course of nearly five decades, the company has played a key role in some of the country’s largest infrastructure projects, offering solutions grounded in advanced expertise, reliability and operational efficiency.

At the same time, Eurotrade has steadily expanded its international footprint, providing export-ready solutions across a wide range of sectors—from Defence and Armoured Protection to Sports Facilities, Healthcare and Infrastructure.

International Orientation

We have forged our path to international markets while staying true to our values. Driven by the principle of reliability, we are in the frontline of all export activities, exporting our know-how to: France, the Netherlands, Belgium, Spain, Italy, Switzerland, Germany, the UAE, Jordan, Cyprus, Iraq, Serbia, Albania, Romania, Malta, Kosovo, Ethiopia, the Caribbean and Panama.

Customised Applications

Our comparative advantage lies in our ability to fully adapt our constructions to the needs of each and every client. We are committed to treating our clients with respect and meeting their every need, while continuing to build on our relationship of trust, even following delivery of the project.

Research & Innovation

We invest in the development of innovative products. We adopt new, practical applications. We are bringing change to modular and prefabricated building systems. We focus on the needs of the future.

Today, Eurotrade is considered the highest quality company in prefabricated housing, offering added value to each and every construction it undertakes.

ATLAS

Durability and expandability
without limitations

Standing the test of time

The ATLAS series is a robust, high-performance construction solution designed to address immediate or emergency housing needs—either for temporary deployment or permanent use. Combining functional excellence with aesthetic appeal, ATLAS units are engineered for maximum flexibility. Their modular design allows seamless expansion in length, width, and height, and they can be stacked to form buildings of up to three storeys—making them ideal for both compact sites and scalable developments.

Built to endure and designed to evolve, the ATLAS unit stands ready for whatever comes next.

From 5m² to hundreds of square metres

Its flexible design provides solutions that can cover multiple needs, since it expands towards each direction and in all three dimensions of the structure.

Customised application

It is adapted to the client's needs, assembled in no time, and transported and delivered within a very short time.

Financial advantage

Our high production capacity combined with the model cost reduction systems applied and the minimal need for product maintenance, guarantee an optimum relationship between quality and cost.

HERMES

For every kind of housing need

Flexibility, aesthetics, durability

Having the ability to effectively deal with the problem of housing, even in the most unusual morphological spaces, Eurotrade has created the HERMES. The polymorphic and flexible construction, HERMES series covers various housing needs such as offices, residences, canteens, snack bars, toll booths, guard posts and many other uses for which it guarantees ideal conditions of comfort, aesthetics and functionality.

From 1m² to 30m²

- Immediate flat-pack delivery
- Easy to transport
- Quick assembly
- Fully portable
- Ergonomic design
- Adaptability
- Protection and strength
- High specifications

Polymorphic construction

The flexible HERMES series can ideally be adapted to every professional use. From worksites and factories to ports, airports, ticket stations and toll stations.

All-purpose

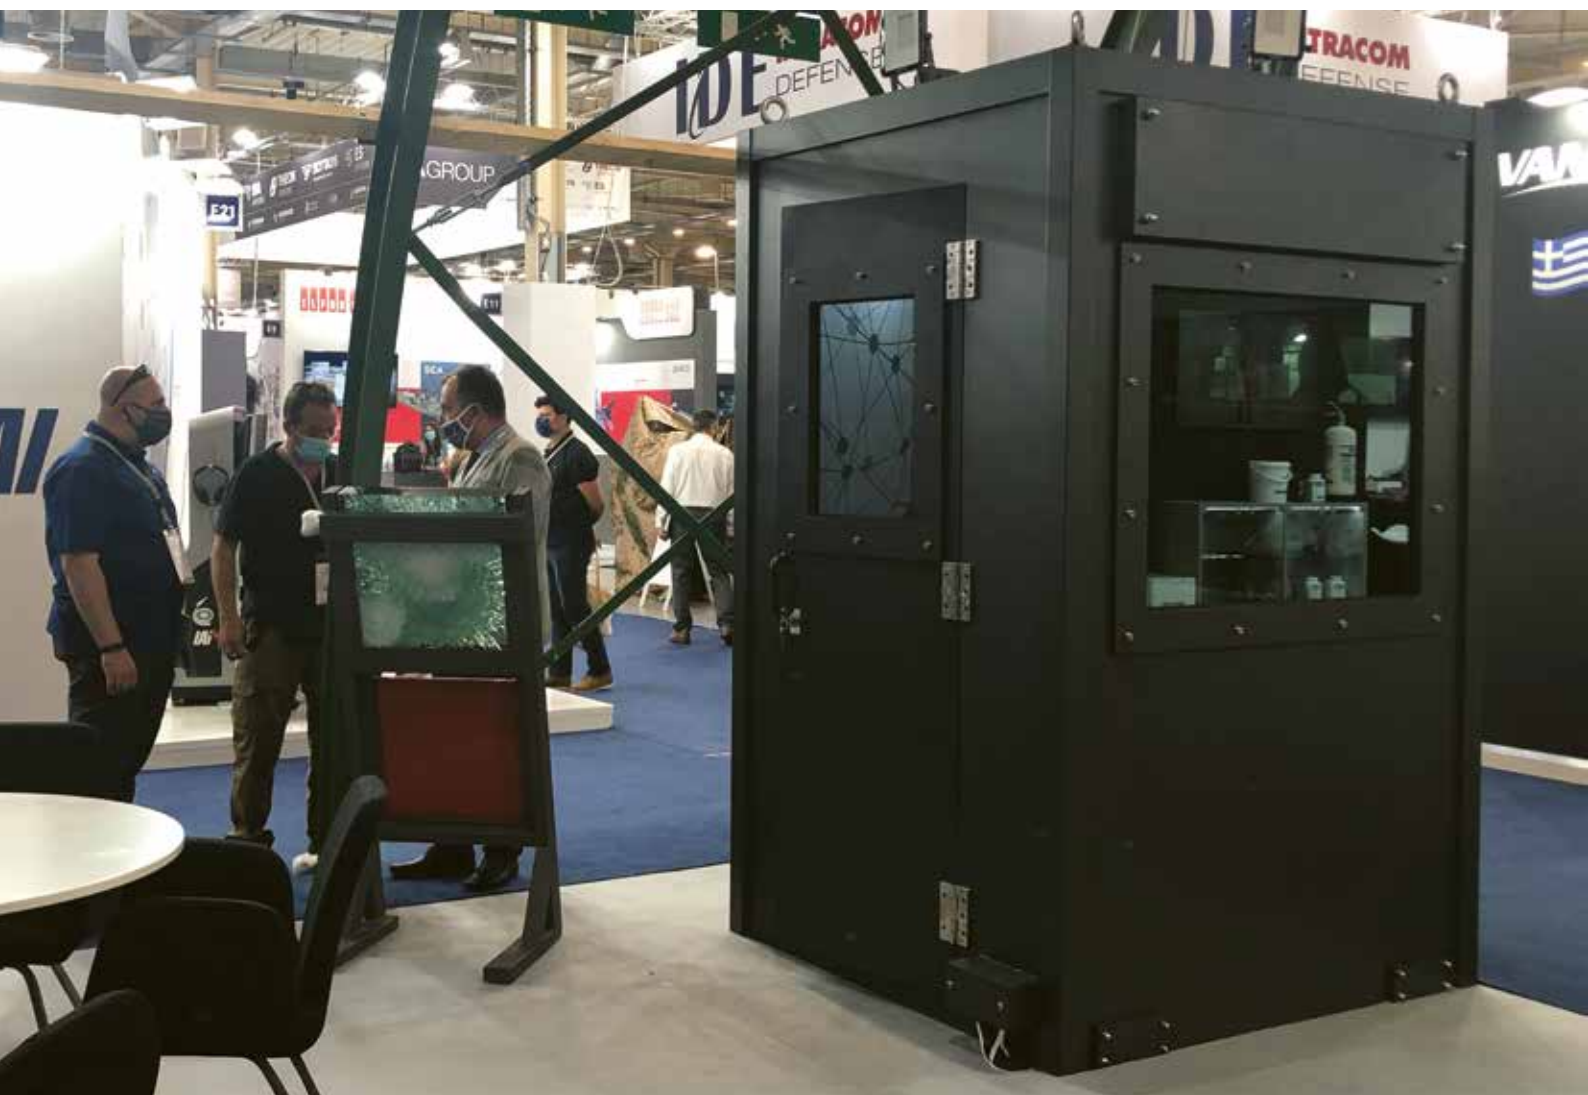

Whether we are talking about very small constructions due to the unusual layout of the surrounding space, or about detached, portable workspaces for temporary or permanent use.

Added value

The HERMES series comes under the category of lightweight structures, while also being defined by its highly reliable technical characteristics. The fact that these structures can be directly transported and installed without requiring additional building work saves both time and money.

BULLETPROOF CONSTRUCTIONS

Passive security of the highest specifications

Anti-ballistic systems of high quality

Renowned bulletproof constructions tested to meet the strictest safety specifications. Embassies, public and private agencies and international organisations entrust Eurotrade with the protection of their infrastructure and the shielding of their premises against threats. The ASPIS and TITAN anti-ballistic systems have a wide range of applications in military guard posts, control and security stations, observatories, protection shelters, borders, frontier and customs stations, security company workspaces, electrical and mechanical equipment units and state-of-the-art installations.

TITAN

The TITAN bulletproof guard post is the ideal solution for high performance armour without any vulnerable points. It has anthropomorphic characteristics in total symmetry and a specially designed, deterrent appearance. With its form alluding directly to ancient Asian suits of armour, its smooth steel surface, shutter shaped shields and back draught glass panels, add critical volume to the interior, while preventing external reflection.

ASPIS

The ASPIS guard post is the ideal choice for spaces requiring discrete yet uncompromising protection. It can be fully adapted to the architecture of any guarded space. It can be suitably covered in stone, facade brick or other materials so as to blend in with its surroundings in terms of aesthetics and not be immediately noticeable. It is recommended for residences, hospitals and other commercial buildings. It serves as a strong protection shield for guarded points, while maintaining its flexibility in terms of its vast array of architectural choices.

SPECIAL CONSTRUCTIONS

With the aim of fully adapting the product to the needs of the client, Eurotrade creates special, fully certified constructions that faithfully comply with a broad spectrum of anti-ballistic specifications. In an effort to stay abreast of today's ever increasing security needs, Eurotrade studies, designs and creates bulletproof constructions which are adapted to the space for which they are intended, both in terms of aesthetics and functionality

EMERGENCY LARGE SCALE HOUSING

Emergency accommodation

Housing of sensitive groups - Accommodation of staff

In an ever changing global, economic and social landscape, Eurotrade stands as a pillar of stability and a driver of growth in the field of emergency housing. The world's leading humanitarian organizations, NGOs and both public and private agencies trust Eurotrade as their most reliable partner in responding to urgent humanitarian crises. Renowned for its adaptability and resilience, Eurotrade rises to meet even the most demanding challenges —absorbing each client's unique needs and delivering reliable, people centered solutions.

Immediate response

Emergency needs are promptly assessed and handled to deliver a swift and effective response

Advanced know-how

Our commitment to constantly enrich our experience and technical training allows us to offer solutions for even the most complex of needs.

Quality Assurance

All materials incorporated in our constructions are quality-certified, guaranteeing compliance with the highest technical standards.

HEALTH FACILITIES

Care and innovation

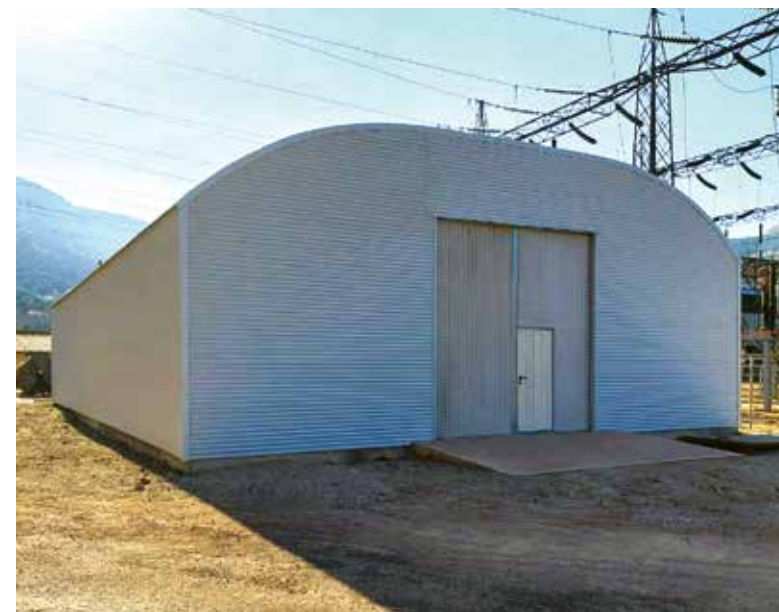

Serving healthcare

Armed with the reliability of its products and services, the non-negotiable quality of its modular constructions and its valuable experience, Eurotrade offers optimal solutions to health facilities across the country. Based on the three pillars of: know-how, high scientific standard and ongoing training, Eurotrade monitors the developments in the field of health and offers long-term quality solutions. Included among our clients are the largest public hospitals in the country, top private treatment clinics and regional health centres.

J. V. SNOEI BUILDINGS

50 years of global experience

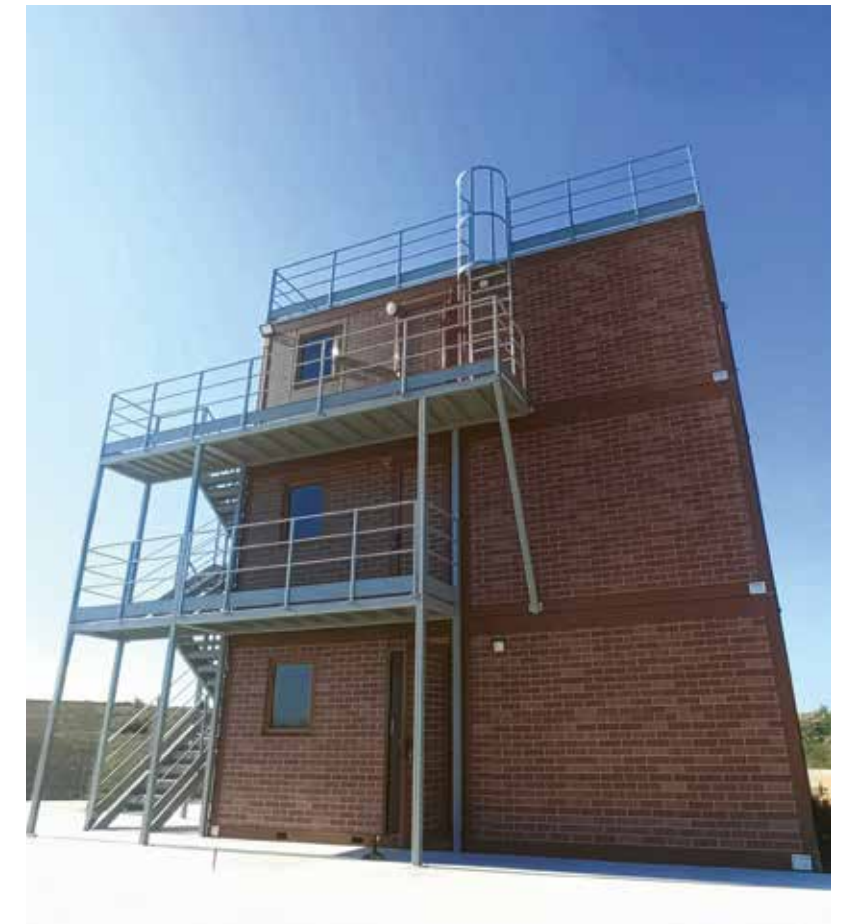

Prefabricated, mobile & expandable storage sheds

The modular metal buildings by Dutch manufacturer J.V. SNOEI®, supplied in convenient kit form, are designed for easy transport and rapid deployment anywhere in the world. Each structure features a robust frame made of modular semi-circular sections, offering a wide variety of configurations—up to 64 different building types. Their aerodynamic, concave design reduces wind and environmental pressure, allowing the structures to be securely anchored to a concrete base using simple metal plugs. This significantly reduces the need for extensive foundation work, lowering overall construction costs. Combined with their quick assembly and minimal infrastructure requirements, these buildings offer substantial savings and rapid return on investment—making them the very definition of value for money.

DEFENCE & PROTECTION

Reliability, respect
and constant service

Building trust

Its ability to meet strict and extremely tight delivery timetables, its specialised know-how, its observance of the highest international military specifications and confidentiality clauses, as well as the durability of its constructions, all place Eurotrade at the frontline of service for government institutions and organisations in the field of Defence. Due to its technical expertise, extensive and diverse production capacity and number of projects undertaken, Eurotrade can offer its clients comparative, financial advantages. The defence solutions provided by the company stand out for their thorough design and thorough study of any specialised needs, in terms of housing and functionality.

SCHOOLS

Schools of excellence

Ergonomics and Safety

With its primary concern being the safety of pupils, Eurotrade has been delivering, for more than 40 years, school buildings constructed to the highest domestic and international specifications, within truly short delivery time schedules. Our fully functional constructions have housed thousands of pupils at public and private schools. Defined by their anti-seismic protection properties, as well as their reliable, robust and ergonomic design, the ATLAS series is here to support the future, meeting even the most demanding educational needs. Our advantages: the ability to erect entire school complexes within the span of the school vacations.

Workmanship

The robust and flexible ATLAS product series has up until now reliably and functionally supported the housing of thousands of pupils in public and private schools.

Adaptability

Covering spaces of all sizes, from rooms of just a few square metres to entire buildings of hundreds of metres, while always observing the highest specifications and safety regulations for pupils.

Quick delivery times

Capacity to deliver complete and functional constructions within minimal time.

ARCHITECTURAL DESIGN STRUCTURES

Customised designs

Meeting every demand

Eurotrade offers housing solutions that are fully aligned with each client's specific requirements. Every project is carefully designed to meet the architectural, aesthetic and functional expectations of our partners. Whether you entrust us with the complete design of your building or choose to implement your own plans, Eurotrade ensures seamless execution. Backed by a well-organized structure and a team of highly trained, experienced professionals, we are equipped to handle even the most specialized demands. We consistently deliver outstanding aesthetic and technical results—while staying true to our core values: budget precision, strict adherence to time-lines, and uncompromising construction quality.

Eurotrade S.A. | Modular Buildings—Bulletproof Constructions

Solutions for projects that stand out

- A wealth of applications
- Total quality system
- Achievement of low cost
- High know-how
- First-class materials
- Pioneering design
- Innovative uses
- Fully portable
- Immediate delivery

SPORTS FACILITIES

Know-how and experience

Anti-vandalism specifications

Press boxes, changing rooms, lavatories for athletes or the public, clubhouses, canteens and even sports club stores are included in the broad spectrum of sporting facilities planned and designed by Eurotrade based on users' needs, while observing –where necessary– special anti-vandalism specifications, in accordance with applicable European standards.

ELECTROMECHANICAL EQUIPMENT SHELTERS

Minimisation of maintenance needs

Transport of fully-equipped boxes

Specially-designed boxes for the housing and safety of electromechanical equipment in special conditions. Suitable for: power packs, generators, low –and medium– voltage electric boards, pumping stations, mobile telephony transponders and defence applications (radar transmitters). Full maintenance and support services are provided through procedures that have been fully established under ISO.

RENTALS & LEASING

Know-how and experience

At Eurotrade, we understand that not every project requires a permanent structure—and that speed, flexibility, and cost-efficiency are often critical. That’s why we offer a wide range of modular buildings available for rent or lease, providing a fast and adaptable solution for temporary or semi-permanent needs across a variety of industries. Whether you require a mobile office, a modular complex for a construction site, portable classrooms, temporary accommodation, or emergency housing, our rental fleet is designed to deliver high-quality, fully equipped spaces that can be deployed quickly and efficiently.

All rental units are maintained to the highest standards and can be customized to suit specific functional and aesthetic requirements. We also offer flexible rental durations, from short-term solutions to long-term leasing agreements, tailored to your project timeline and budget.

With over 40 years of experience and a responsive support team, Eurotrade ensures seamless delivery, installation, and service throughout the rental period.

Our rental options are ideal for:

- Construction & Infrastructure Projects – On-site offices, worker housing, meeting rooms
- Education – Temporary classrooms, administration spaces
- Healthcare – Mobile clinics, isolation units, testing facilities
- Events & Exhibitions – Ticket booths, VIP lounges, temporary facilities
- Disaster & Emergency Response – Rapid-deployment shelters, command centers, sanitation units

Eurotrade™

Modular Buildings
Bulletproof Constructions

International Presence

Flat pack delivery

The quick and easy delivery of ATLAS and HERMES products in flat-pack form creates the conditions for the functional, safe and ergonomic stacking of the product, thus simplifying the process of transporting and assembling entire buildings, while at the same reducing cost.

Special construction for easy transportation and assembly from Eurotrade.

International Presence

Armed with the right organisation and know-how, Eurotrade has expanded across Greece and beyond the country's borders, building professional relationships of trust and respect that stand the test of time.
