Uncompromising Quality for the Most Demanding Security Needs

Since 1978, Eurotrade has been synonymous with quality and innovation, delivering specialised, tailor-made prefabricated solutions for the commercial and industrial sectors in Greece and abroad.

Leveraging decades of experience, highly skilled personnel, and collaborations with internationally renowned specialists, we provide advanced solutions to even the most complex construction challenges.

Today, Eurotrade stands as a leader in high-security prefabricated construction, offering bulletproof cabins, anti-ballistic units and custom modular structures designed to meet the highest international standards. Our products are engineered to combine exceptional protection, flexibility, and long-term durability, adding measurable value to every project we undertake.

We build more than structures —we build trust. Relationships with our clients are based on reliability and expertise, growing steadily and enduring through time.

**Today,
Eurotrade
stands as a benchmark
for quality in prefabricated
construction, adding
exceptional value to every
structure we deliver**

Innovation

Eurotrade delivers designs that exceed standards, using advanced materials and technical solutions that set trends in prefabricated steel construction.

Consistency

Projects are executed on strict, well-defined timelines, ensuring smooth delivery from start to finish.

**Reliability
& Economy**

Clients can trust Eurotrade from the first interaction through project completion, with full after-sales support that ensures long-term value.

TITAN

Where Quality
Meets Security

Eurotrade combines:

- Extensive expertise and insight
- Exceptional quality and security standards
- Highly trained technical personnel
- Meticulous attention to detail
- Rigorous quality control procedures

...to ensure that ASPIS and TITAN deliver optimal performance when it matters most.

Key Features:

- 1 Anti-vandal protection for the A/C unit
- 2 Concealed ventilation system that closes to protect the sentry from smoke or gas attacks
- 3 Smart design with inclined, reinforced glazing
- 4 Accredited ballistic protection: Level IV (NIJ 0108.01), FB7 (EN 1522/1523), BR7 (EN 1063)
- 5 Fully bulletproof construction with no vulnerable points

The TITAN bulletproof sentry box combines high-level ballistic protection with a commanding, repelling appearance. Designed for armed forces, public buildings and critical organizations, its symmetrical structure gives the unit anthropomorphic features, creating both presence and deterrence. Overlapping armored plates covering the steel surface draw inspiration from ancient Asian suits of armor, while the negatively sloped window glazing increases interior space and simultaneously prevents attackers from gaining an advantage from reflections. The design also includes manual control of the ventilation system and anti-vandal protection for the external A/C unit, ensuring both safety and operational efficiency.

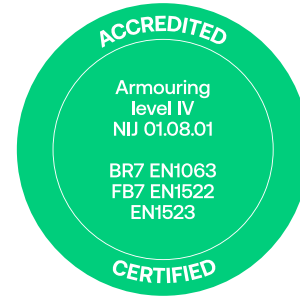

Interior

Exceptional attention is given to the comfort and safety of the guard or user. Using best-in-class materials, carefully crafted interior finishes and an ergonomic design, the TITAN sentry box provides a secure, comfortable environment that helps reduce stress for those entrusted with our protection.

ASPIS

Minimalist Design, Maximum Integration

The highly armored, anti-ballistic structure of ASPIS is designed to meet a wide range of security and defense requirements, including:

- Sentry boxes
- Guard houses
- Checkpoints
- Customs offices
- Critical equipment shelters
- Safe rooms
- Correctional facility watch posts

- ❶ **Lift & Go:** Built-in lifting points for fast, effortless transport
- ❷ **Certified Protection:** Accredited Level IV (NIJ 0108.01), BR7 (EN 1063) ballistic defense
- ❸ **No Weak Spots:** Fully bulletproof construction for maximum safety
- ❹ Built-in forklift pockets

The bulletproof sentry box ASPIS is ideal for residences, industrial buildings, hospitals, and any location where discreet protection is required. Designed to be versatile, unobtrusive, and impenetrable, ASPIS meets international ballistic standards while seamlessly integrating into its surroundings.

The guard house can be installed as-is, attached to smooth plastered surfaces, or customized with decorative cladding — such as stone, brick, or mirrored finishes — to match the architectural environment. The design also includes anti-vandal protection for the external A/C unit, ensuring both security and durability.

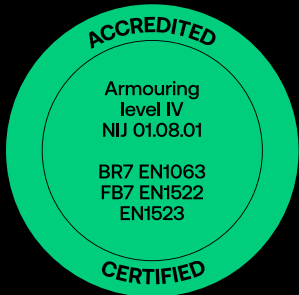

Special Applications

Tailored designs,
from concept to fully armored reality

**Standard
and optional equipment
designed to suit every
operational need**

Custom solutions such as bulletproof glazing, shooting hatches, bulletproof intercom systems, and communication drawers are just a few of the options we provide.

Additionally, specialised facilities and equipment can be tailored to meet each client's specific ergonomic requirements (desks, WC, etc.) or security needs (video surveillance, blast-relief vents and more).
