FACEFIRST®

Trusted & Proven Real-time Entry
Face Matching providing Safer
Workspaces

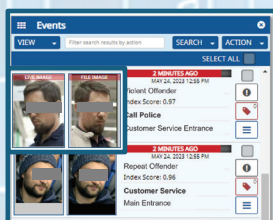

**Face
Matching**

Protect Your People
Protect Your Products
Protect Your Profits

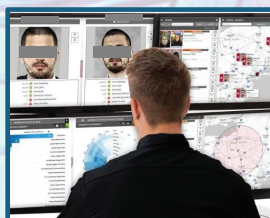

1

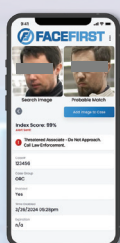

- Real-time notifications in seconds when a known threat enters

2

- React quickly when a threat enters
- In-store reporting accuracy enhances cases when using a case management system

3

- Probable match events include:
- Live & enrolment images side-by-side
- Index score (v Client Defined Level)
- Five-second video playback

4

- Client action guidelines (observe; provide customer service; do not approach – call 999)

FaceFirst face matching software empowers retailers to make stores safer places to work and shop.

1 SMARTWHEEL®:

Self-braking wheels stops trolley when it receives a signal from the embedded antenna

- *Standard-size wheels fits virtually any trolley*
- *Quickly installed in the field by trolley maintenance company OR partnering cart manufacturer*

2 PERIMETER LOOP ANTENNA(s):

Digital locking (and optional unlocking) signals are produced by double-insulated & weatherproof cables, embedded in the parking surface

3 CENTRAL TRANSMITTER:

Installed to manage the lock / unlock signals to the perimeter loops

4 UNLOCK DEVICES:

CartKey® handheld devices are easy-to-use. A simple button-activated remote unlocks Trolleys

5 CUSTOMER AWARENESS:

Recommend installing Car Park signage, to ensure clear understanding and positive customer experience

6 CARTMANAGER® ULTRA:

Broadcasts an unlock signal to aid in freely moving retrieved trolleys
Reduces trolley collection hours, injury risk to employees and damage to customer vehicles

CartManager®
Ultra

CartManager® **Ultra**

Trolley Collection

Optimise Labour, Speed-up Collection
Reduce Employee Injuries,
