The Issue

1 in 10 people have been spiked

Spiking can happen to anyone, regardless of age or gender. It can have a serious impact on a person's physical and emotional wellbeing, often long after the incident itself

1 in 3 students have been spiked

Every student has the right to enjoy university life safely. No student should have to change how they live their life because of the fear of being spiked

7 in 10 victims don't report it to the police

Spiking remains significantly underreported. People may not know where to turn, fear they won't be believed, or not realise what has happened - making awareness and support vital

Our mission is simple:

Prevent spiking before it happens, support victims when it does, and campaign until everyone is safe from spiking

We **NEED** your help to Stamp Out Spiking.

Spiking can affect anyone, anywhere. With your support, we can continue raising awareness, supporting those affected and campaigning for change.
