Trusted By Security Companies Around The World

Guardhouse is the gold standard in security workforce management systems. With a decade dedicated to R&D, we've tailored our platform to address the unique challenges and demands of the security sector. This dedication to excellence is why over 600 top security companies have placed their trust in our innovation. Discover the difference our commitment to quality makes.

Memberships And Accreditations

Why Security Businesses Choose Guardhouse

More than workforce management software. Guardhouse combines powerful technology with dedicated people who are invested in your success.

Connected Technology

Integrations and automation that simplify workforce management and reduce manual administration.

Dedicated to Partnership

A team that knows your business, provides personalized support and helps you get the most from Guardhouse.

Built for Growth

Scalable solutions that support your business from day one. Whether you have 1 or 10,000 staff, Guardhouse is built to grow with you.

Guardhouse has been an absolute game-changer for our security operations. The platform is incredibly efficient and user-friendly.

Marika Dowling

Operations Manager, Resolute Dogs

Start a 21-day no obligation pilot

Our system speaks for itself. That's why we offer a completely free, no-obligation 21-day pilot.

Your dedicated Success Manager will guide your team through tailored training and ensure the system is set up around your specific business needs. By the end of the pilot, your account will be fully configured and ready to go live seamlessly.

Simply scan the QR code to book a demo with a member of the partnerships team, and discover how Guardhouse can make a real difference for your business.

Payroll & Invoicing Integrations

INTUIT

quickbooks

brightpay

And many more

Easy Labour Partnership Management

The only platform that allows you to integrate directly with your labour partners. Post out requirements via the platform and have your labour partners fill the shifts for you.

Win More Tenders and Labour Partner Work

Guardhouse gives security companies of all sizes the technology and processes necessary to tender competitively. In addition, because of the inbuilt labour partner workflows, larger companies who use Guardhouse actively look to work with other users in the network.

Generous Referral Scheme

We offer a no hassle referral scheme that can see you net £1,000's each year just for recommending Guardhouse.

Powerful All-In-One

Live Dashboard

Get a complete overview of your business, deployments, and key operational metrics in one place.

Scheduling

A simple yet powerful scheduling system that lets you plan recurring or ad hoc requirements with ease.

Time and Attendance

Digital timesheets let managers review clock-ins anywhere. Maintain accurate records for payroll and invoicing.

Payroll

Manage site rates, position rates, overtime, and holiday pay with ease. Integrates with leading payroll software.

Invoicing

Automatically generate invoices based on your charge structure. Integrates with leading accounting software.

Mobile Patrols

Plan patrol routes, record activity, and capture alarm responses directly from the app. Keep patrol data organised.

Licence Checks

On-demand and automated daily SIA licence checks keep guards compliant and deployment-ready.

Compliance

Track compliance items and renewal dates in one place. Managers receive alerts when documents need updating.

E-Signatures

Capture digital signatures for SOPs, policies, and key documents. Maintain accurate records and stay compliant.

Daily Occurrence Log

Automatically generate a DOL for each active site. Staff can add entries quickly via the mobile app.

Incident Reporting

Create custom forms for incident and audit tracking. Record and manage incidents with ease.

Check-Calls

Protect guard welfare with automated check-calls. Built-in escalation ensures missed checks are addressed quickly.

"Guardhouse has helped MGS SW Group Ltd significantly improve the day-to-day management of our security operations. By bringing scheduling, compliance, reporting, and communication into one platform, it has reduced manual administration and streamlined the way we work with both clients and partner security companies."

Lee Millar

Director, MGS SW Group Ltd
www.mgssecurity.uk

Security Software

Customer Portals

Provide clients with secure access to key operational data. Portals can be accessed anytime for full visibility.

**NEW**

Mobile Apps

Dedicated staff and manager apps for both iOS and Android. Ability to scan QR or NFC tags via the app.

Leave Management

Manage fixed, accrued, or rolled-up leave in one place. Staff can request leave directly in the schedule.

Incident Auto Emailing

Automatically send incident reports on a client-defined schedule, including instant alerts or daily summaries.

Open APIs

Connect Guardhouse with your systems using free open APIs. Enable seamless data sharing and integrations.

ID Cards

Built directly into the app, digital staff ID cards verify personnel while eliminating the need for plastic cards.

Labour Partner Management

Coordinate subcontractors and labour partners with the same visibility as your internal workforce.

Reports Engine

Generate detailed reports across operations, HR, and finance. Access key business data from anywhere.

**NEW**

Control Room

Always-on monitoring for security providers. We maintain operational oversight, support officer welfare, and respond to critical events.

**COMING SOON**

Events Module

Create and schedule events with ease. Use Open Shifts to build your own jobs board — giving your team visibility and getting shifts filled faster.

**COMING SOON**

AI Assistant & Business Intelligence

Access information, generate reports, and gain operational insights through AI-powered assistance built into Guardhouse.

**COMING SOON**

Site Tours

Combine checkpoints, tasks, photos and incident reports into clearly defined site tours — easy to set up, easy to monitor, with real-time exception reporting.

"If you are thinking about switching to Guardhouse, do it. One of the best decisions I have made for the business."

Harry Hussain

Managing Director, Uniguard
www.uniguard.co.uk

We have seen dozens of people come to us and claim to do everything we want. Guardhouse are the only ones that have actually delivered on their promise. We love the software and so do our guards."

Robert Rigon
General Manager, CorSec

Dedicated Success Manager

More than support, your dedicated Success Manager will be by your side from day one, helping you drive efficiency through system optimization and implementing industry best practices.

Free Live Support

Our dedicated support team are available by phone, email or Live Chat, to both managers and guards, whenever you need them, at no extra cost.

Committed to the Security Industry

We are, and always will be, committed to prioritising the physical security industry above other verticals. Our product will always be tailored to your needs.

Data Security

Multiple daily data backups hosted on Microsoft Azure cloud servers, with 99.99% uptime guarantee. Cyber Essentials and ISO 27001 certified.

Why Security Business Leaders Choose Guardhouse

Time Saving

We all wish we had more time in the day and with Guardhouse you will. Guardhouse cuts admin by up to 60%, giving you back time to focus on growing your business.

Ironclad Proof of Service Delivery

Being able to prove to your customers that guards were on site, on time, and on top of everything, is invaluable. Information that might have taken you days to compile is all tracked automatically.

Run Your Business from Anywhere

Running a security business isn't a 9 to 5 desk job, you need to be able to control your business at any hour and from any location. The Guardhouse mobile app puts total control neatly into your pocket.

Hassle Free Compliance

With Guardhouse you'll never have to worry about making a compliance error. Licences are checked automatically and you'll be notified when guards need to renew their licence.

Workforce Monitoring Service

We're on so you can switch off

Guardhouse now offers cost-effective workforce monitoring to keep your operations running smoothly, even when you're off the clock. Our service provides confidence that your staff are supported, and your business is protected every hour of the day.

Key Features

Clock-in / Clock-out Monitoring

Our team ensures staff are starting and ending their shifts on time.

Missed Check Calls

If staff fail to respond to their check call, we will call them immediately. If they still cannot be reached, we will escalate the issue accordingly.

Message Relay (Dispatch)

We'll take calls from your Alarm/CCTV monitoring centre and relay the information to your staff.

Dedicated Helpline

Your guards and customers can call us for assistance. Using your SOPs, we deliver guidance without making executive decisions.

Post-Shift Reports

At the end of each shift, you'll receive a detailed report capturing all activity, including contacts made with staff, welfare check results, and any actions taken in your account.

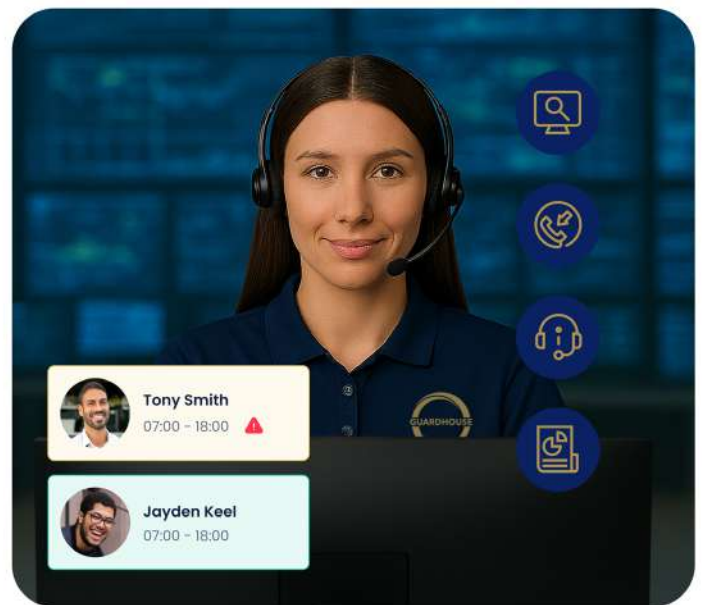

Why Choose Guardhouse Workforce Monitoring?

- Get your evenings and weekends back
- Guarantee lone worker safety
- Highly cost effective and scalable
- Works seamlessly with your software solution

Coverage Hours

We offer both a 24/7 and an out of hours service. Our out of hours service covers:

- Monday to Friday: 5:00 PM to 9:00 AM
- Saturday and Sunday: 24-hour coverage
- UK Bank Holidays: 24-hour coverage

Built to Support

Distributed Workforces

Maintain visibility of workforces spread across multiple locations and shifts.

Customer Continuity

Help ensure critical events are managed promptly, even when your internal team is offline.

Operational Resilience

Strengthen after-hours coverage with dedicated monitoring and predefined escalation support.

60-DAY

FREE TRIAL

Scan here to register a no-obligation

"The response from our guards has been really positive. In particular, they like the way it blends WhatsApp reminders with calls. We tried another provider, but everything was done via calls, which was a bit frustrating for the guards. They find this approach much easier, and ultimately any solution we use has to work for our frontline staff if it's going to work for the business."

Gemma Newman
Director
NES Security Services

Pricing

Pricing is based on the average number of guards being monitored each month. Pricing starts at £19 per guard.

Case Studies

Becoming an ACS Pacesetter with Guardhouse

Controlled Solutions Group (CSG), a specialist security provider in Northwest England, needed a workforce management platform that could keep pace with its rapid growth from a 20-person matchday operation to managing more than 500 staff at major events. After replacing fragmented scheduling and communication processes, Guardhouse became the central platform for rostering, compliance, payroll, invoicing and live operations.

The platform enabled CSG to fill shifts in seconds, replace manual booking processes, and give managers real-time visibility of staffing levels, attendance and operational activity across large deployments. Mobile access also allows teams to create shifts, respond to client requests and manage operations from anywhere, while integrated compliance tracking and instant reporting support high-compliance environments and audit requirements.

“There's no two ways about it –Guardhouse has helped us achieve a higher ACS score.”

The operational improvements extended beyond day-to-day efficiency. CSG increased its ACS score from around 95 before Guardhouse to 112 in its first year, then 117 the following year, placing the business among the industry's top-performing Approved Contractors.

Alongside the platform itself, CSG highlighted Guardhouse's ongoing support as a key part of its experience:

"Your support is phenomenal... it couldn't be any better."

Chris Cowley
Managing Director
Controlled Solutions Group
www.csgsecurity.co.uk

Vanguard Security Services' Journey from Spreadsheets to Systemisation

Before implementing Guardhouse, Vanguard Security Services relied on spreadsheets and paper-based processes to manage scheduling, compliance and workforce records. Creating rosters, manually checking licences, DBS checks and right-to-work documents, and maintaining paper files consumed valuable time and limited real-time visibility across operations.

“It's just a one-stop shop for everything we need to run the business.”

By moving these processes into Guardhouse, the business streamlined scheduling, automated compliance tracking with expiry alerts, enabled guards to manage shifts through the mobile app, introduced geofencing to ensure officers clocked in from their assigned locations, and replaced paper-based reporting with digital incident forms and electronic timesheets.

The result was faster scheduling, improved compliance, greater accountability, reduced administrative effort, lower paper storage costs, and better communication across the workforce.

GUARDHOUSE + Deploi

From Vetting to Deployment in One Workflow

Guardhouse and Deploi have partnered to bring workforce vetting directly into your operational workflow. By combining Guardhouse's workforce management platform with Deploi's AI-powered compliance technology, security businesses can reduce manual administration, accelerate onboarding, and maintain confidence that only fully vetted personnel are ready for deployment.

This game-changing partnership allows businesses to trigger **BS 7858**, **BS 8406:2020**, Stewarding Checks, and Right to Work checks directly from within Guardhouse.

Revolutionary New Passport System

The Deploi Passport system creates a reusable digital profile containing a worker's completed checks and relevant information. This means employers can build on existing screening when a worker moves between organisations, rather than unnecessarily starting the process again.

Exclusive Guardhouse Partner Pricing

Guardhouse users have access to exclusive Deploi pricing that isn't available anywhere else. Deploi offers both Software Only and Fully Managed services, providing flexible options to suit the needs of both growing businesses and larger organisations.

12 Weeks

Industry Average

4.5 DAYS

Deploi Average

Software Only Service

Ideal for larger organisations with dedicated compliance or vetting teams.

Give your internal compliance team the technology to manage checks efficiently, consistently, and at scale.

This helps your team:

- Automate repetitive compliance administration
- Track every candidate in one place
- Identify missing information quickly
- Maintain clear audit trails
- Monitor workforce compliance continuously

Full Managed Service

Ideal for small to medium security businesses.

Let Deploi's experienced vetting team manage the process for you.

Candidate communication, document collection, checks, references, follow-ups and reporting are all done for you.

You'll see live progress updates from within Guardhouse, keeping you up-to-date every step of the way.

The Future Of Security Operations

The future of security operations is smarter, more connected and more human than ever. We're building Guardhouse into something the security industry has never seen before — a platform that connects your entire operation, thinks alongside your team, and brings world-class human expertise to businesses of every size.

The Power of AI

Artificial intelligence is at the heart of where Guardhouse is heading. We are actively developing an AI Shift Assistant that will put the answers guards need directly in their pocket — drawing on shift documentation, policies and assignment instructions to speed up operations and reduce the burden on your office teams. Alongside this, we are building AI-powered Business Intelligence that will allow anyone to interrogate operational data through simple conversation, no analyst required. These are just two of the AI projects currently in development, and they are only the beginning.

Open APIs

Our goal is to make Guardhouse the most integratable platform in the security industry. Through direct API access, your business can connect Guardhouse to the tools you already rely on — from payroll and finance to HR and beyond — creating a seamless flow of data across your entire operation. Guardhouse becomes the engine room, and everything else plugs in around it.

Supplementary Services

The future of Guardhouse is a blended model of technology and expert human services, giving security businesses access to capabilities that were previously out of reach. Our monitoring service is the first step — offering 24/7 workforce monitoring at a fraction of the cost of an in-house control room, and instantly scalable as your business grows. We are actively building out more complementary human services tailored to the security sector, so Guardhouse can take on more of the back office burden and free your team to focus on what they do best.

Easy Finance Integrations

Guardhouse makes it simple to export your data directly into the major payroll and invoicing platforms your business already uses — including Xero, Sage and BrightPay — with new integrations being added all the time. What once took days of manual work now takes minutes, turning payroll preparation and invoicing into a fast, accurate and straightforward process.

Human Led Support

At Guardhouse, human-led support is not a feature — it is a commitment. Every customer is assigned a dedicated Customer Success Manager from day one, someone who guides you through the platform and works alongside you to maximise your return on investment. Our support team is available via live chat, email and direct phone support, and while we use AI to make them faster, the person who picks up when you need help will always be exactly that — a person. In a world where support is increasingly handed to bots, we are proud to be going in the other direction.

Your Growth Partner

We Grow When You Grow

Guardhouse isn't just a platform to run your business — we are genuinely invested in helping you grow it, with a range of tools, services and opportunities designed to help our clients win more work, build better connections and thrive in a competitive market.

Our Growth Support Includes:

Marketing packages designed to increase visibility and help businesses connect with labour providers and industry partners.

Downloadable tender pack to help businesses prepare stronger submissions for new opportunities. Showcase the Guardhouse edge and win more clients.

The Security Leaders Network connects you with the best in the industry through a programme of exclusive national events.

Direct Linking of Labour Supply Chains, the only solution in the market that seamlessly connects contract holders and labour suppliers within a single platform.

The Security Leaders Network

The Security Leaders Network is a private, high-end networking group for security business leaders, bringing members together through a curated programme of national events — from intimate private dinners to luxury golf days. Every event blends genuine relationship building with CPD, industry insights and product updates, keeping members ahead of where the sector is heading. If you are serious about growing your business, the Security Leaders Network is where you need to be.

Labour Supply Chain Linking

Our direct account linking is unlike anything else in the security sector — contract holders build shifts and push them directly to their labour suppliers to fill, eliminating the back-and-forth of rota management instantly. Full compliance visibility is maintained over all staff, with a built-in approval process for new workers. All actions taken by the labour provider appear seamlessly under the contract holder's account, giving the end client a clean, consistent experience.

"Being part of the Guardhouse community has been great for my business. It's helped me identify and secure a number of new commercial partnerships within the security industry."
