

CAPSLOCK Announce Year-to-Date Successes at ICE 2022

CAPSLOCK have been making waves in the cyber security industry with their reskilling bootcamps: helping people from all different backgrounds retrain and launch new careers in cyber in just 16 weeks.

Since launching in 2021, CAPSLOCK have enrolled **over 300 learners** and helped hundreds of them land their first roles in cyber. Their learners have landed jobs with a hugely diverse range of employers, including some of the UK's largest and most well-known companies such as Dyson, The BBC, and PwC.

CAPSLOCK have seen an **100% increase** in the number of cohorts they need to run in the second half of 2022 to keep up with demand for their bootcamps, and are already receiving substantial numbers of applicants for 2023 enrolment.

CAPSLOCK have also recently received funding from the government's **Skills for Life** programme, allowing them to offer fully funded bootcamp places to eligible applicants, and open up their courses to an even greater array of people.

Alongside the reskilling opportunities they offer to individuals, CAPSLOCK are set to increase their B2B offerings over the coming months.

In March 2022, CAPSLOCK launched a first-of-its-kind reskilling programme in **collaboration with BT**. This pilot programme saw a group of existing BT employees successfully reskill in cyber security with CAPSLOCK and start new cyber roles as Protectors in BT upon graduation.

On top of their existing **Hire** product, which allows companies to hire from CAPSLOCK's diverse pool of cyber security graduates for free, they are launching **Deploy**: the opportunity to hire CAPSLOCK grads on a contract basis, and **Reskill**: offering organisations the opportunity to reskill their existing staff with an exclusive cohort, following the success of the pilot programme with BT.

With all these successes in hand and opportunities ahead, CAPSLOCK is proud to be exhibiting at ICE 2022 with DCMS, who named CAPSLOCK the UK's most innovative cyber SME in 2021.
