

# WHY CHOOSE US?

**PETER GAGG**  
MCP Consulting Group CEO

## WHAT OUR CLIENTS SAY

“MCP provided the tools and techniques to enable our engineering teams to deliver cost savings and efficiencies without increasing staff number, whilst continuing not only to grow the asset base in size but also increase the quality of its performance and, in particular - reliability.

MCP’s ability to expose and challenge assumptions has built a strong partnership and created a long-term relationship that is sustainable, innovative and delivers real value.”  
Head of Product Supply

“MCP assisted us in getting the basics right to drive our Overall Equipment Effectiveness (OEE) programme. We chose to use MCP’s AMIS Assessment to benchmark our practices. With MCP’s support and guidance we were able to progress and stretch ourselves to achieve our goals. OEE increased from 43% to over 60%, throughput increased and we had fewer break downs and reduced planned maintenance downtime.”  
Chief Operating Officer

We believe that good maintenance is the backbone of manufacturing, ensuring that machinery and equipment operate at peak efficiency. Without proper maintenance, production processes can suffer from costly breakdowns, decreased productivity and back orders. It's the essential foundation for reliable and sustainable production in the manufacturing industry.

Increasing production output through improving asset management and maintenance is our area of expertise and we have been working with a large range of organisations for nearly 50 years. Our extensive experience and specialised knowledge, objectivity, cost-effective solutions, training, flexibility, and strategic guidance can contribute to the overall success of your maintenance and production departments. By partnering with us, you can optimise your maintenance processes, reduce downtime, and ultimately improve your bottom line.

In the dynamic world of maintenance, we can be your partner, helping you stay ahead of the curve and lead you towards operational excellence.

If you would like to discuss in more depth or explore any issue you may have, please call to talk to one of our experts for advice and guidance in finding a suitable solution.

Thank you for taking the time to read our introduction.

## RECENT CLIENTS

## MCP CAN HELP YOU

Using our tried and tested tools and techniques we can guide you to:

- **Improve** production output
- **Increase** equipment reliability
- **Optimise** maintenance costs
- **Establish** effective spare parts management
- **Increase** technician productivity
- **Develop** technicians’ and operators’ skills
- **Support** the implementation of CMMS software
- **Select** and introduce predictive maintenance and technology solutions

MCP also provides a comprehensive range of **Technical and Management Training** programmes to help enhance your staff’s knowledge and competence.

Do you want to know how effective your maintenance is compared to other organisations in your industry? Then we recommend our long-established **AMIS Benchmarking** service.
