

# IOT REVIEW & ROADMAP

Advance data-driven manufacturing with Industrial IoT. Boost productivity, manage assets securely at scale, and unlock actionable insights with secure, cloud-based solutions. Start today with Green Custard's Manufacturing IoT Review and Roadmap to identify where you are in your IIoT journey and plot a route to your goals.

Our IIoT Maturity Review covers:

## **Evolutionary IOT - enhancing the digital manufacturing process**

- reducing costs
- increasing efficiency
- improving sustainability

## **Revolutionary IOT - enhancing delivered products to increase revenue**

- develop product as service to increase ARPC
- automate parts and consumable replenishment
- improve product quality and maintenance

*"Instead of just rolling out the next product update, we have completely changed how the developers and product managers work, and what the business will look like in the future."*

- Chris Shelley, COO, ENVEA

## **Fixed Price, Fixed Scope**

Green Custard has developed a 2-part process to help you understand your digital readiness, map out your plans, and quickly deliver a PoV against agreed outcomes, so you can get the most benefit in the shortest time.

### **1. Value Proposition and Opportunities**

- Access to Green Custard's IIoT Maturity Model
- In-person workshops and site visits to explore Evolutionary and Revolutionary IoT opportunities and value propositions

### **2. Bias to Action**

- Prioritise opportunities and challenges
- Plan implementation and success criteria
- Deliver a written end-to-end data strategy for the identified PoV

**£4,500  
FPFS**
