

Designing for the Circular Economy

Sustainability in Design

Chair

Simon Benfield, Transport Sustainability Lead – Ramboll UK

Speakers

Deborah Andrews, Design School of Engineering – London South Bank University

Kevin Hogwood, Director - Invvu

Hayden Cotgrove, Product Development - Envirobuilt

Tim Whitehead, Senior Lecturer – Aston University

Shirdhar Jaiswal, Senior Engineering Manager - Vinci

How can we embed an understanding of sustainability issues into full time higher education and apprenticeships?

How can we embed an understanding of sustainability issues into full time higher education and apprenticeships?

Do safety factors in design contribute to an excess of carbon in the finished product and is it time for a debate on the balance between safety and protecting the planet?

How can we embed an understanding of sustainability issues into full time higher education and apprenticeships?

Do safety factors in design contribute to an excess of carbon in the finished product and is it time for a debate on the balance between safety and protecting the planet?

How does sustainability (and building "sustainable" products) fit into economic systems which rely upon sustained and continuous growth?

How can we embed an understanding of sustainability issues into full time higher education and apprenticeships?

Do safety factors in design contribute to an excess of carbon in the finished product and is it time for a debate on the balance between safety and protecting the planet?

How does sustainability (and building "sustainable" products) fit into economic systems which rely upon sustained and continuous growth?

How can we embed a sustainable design thinking mindset in our work culture whereby every designer naturally emphasises and lives the idea of sustainability?

Questions from the floor

Bright
ideas.
Sustainable
change.
