FLEETWOOD

PAINTMAKERS of IRELAND

THREE GENERATIONS OF IRISH PAINT MAKERS

The story of Fleetwood is as much about people as it is about paint and brushes. It's about Andrew Doyle, who founded the company. It's about his sons, Conor and Brian, who shaped and grew the business, and his grandson, Alex, who, alongside a wonderful team, runs the company today.

Together, with generations of other families that have worked at Fleetwood, they built Ireland's largest homegrown paint and brush company. It was 75 years ago that we made our first brush and 45 years ago that we created our first can of paint. It was and still is paint made in Ireland for Ireland.

Based in a dedicated factory in the heart of the Lakelands of County Cavan, we are custodians of the Fleetwood name and the beautiful landscape we call home.

We take both roles very seriously. We believe it's important to innovate and create the very best quality paint while also treading lightly in our surroundings. It is this spirit of craftsmanship and bond of family that make Fleetwood what it is today. When you buy a can of Fleetwood paint, you can be sure it comes direct from our family to yours.

THE PAINT EVERYONE
IS TALKING ABOUT.

TRANSFORM A ROOM

Paint a room like a pro in 6 easy steps

1. Prep - clear the room of furniture or move to the centre and cover with dust sheets to protect from paint. Remove wall fixtures and mask up sockets, trim, doorhandles. Fill cracks/holes in wall with filler and sand the surface for a smooth key. Clean walls with sugar soap to remove dirt and grease.

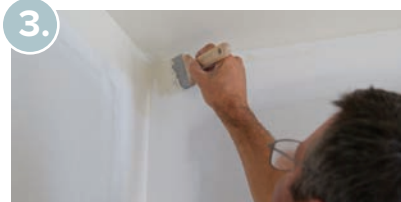

4. First coat - Paint in an M or W shape on the wall and roller that M or W shape to fill it in with paint. Work in small sections and keep a wet edge to avoid visible lines. Allow to dry.

2. Prime - Apply appropriate wall primer if painting over a dark colour, new plaster or if the surface is uneven to help the paint adhere to the surface and provide a sound base.

5. Second Coat - Apply a second coat for an even coverage and colour depth

3. Cut in - begin to paint along edges, corners and trim only.

6. Remove painter's tape BEFORE the paint is completely dry. This is to prevent peeling.

WEEKEND PROJECTS

REFRESH KITCHEN CABINETS

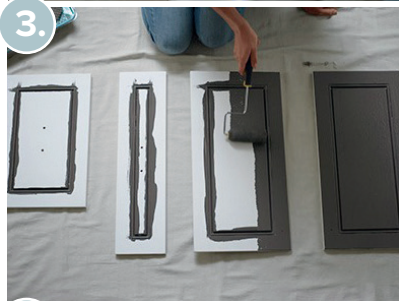

Breathe new life into your kitchen cabinetry

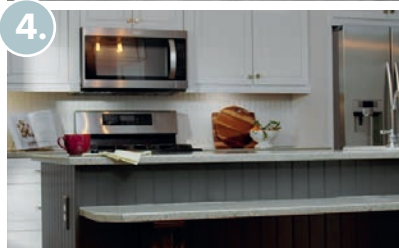

Remove all the doors and any hardware such as handles and hinges. Number the doors so they go back up in the right order/position.

Thoroughly clean all woodwork with a good cleaner degreaser to remove all grease and oils that normally build-up on kitchen cabinetry over time. Sand your surfaces with a light scuff sand and prime with Fleetwood Bloxx-It. Let the primer dry and sand again using a "very fine" grit sandpaper. Wipe the primed cabinets with a damp cloth to remove any debris before applying your first coat of Fleetwood Advanced Satinwood.

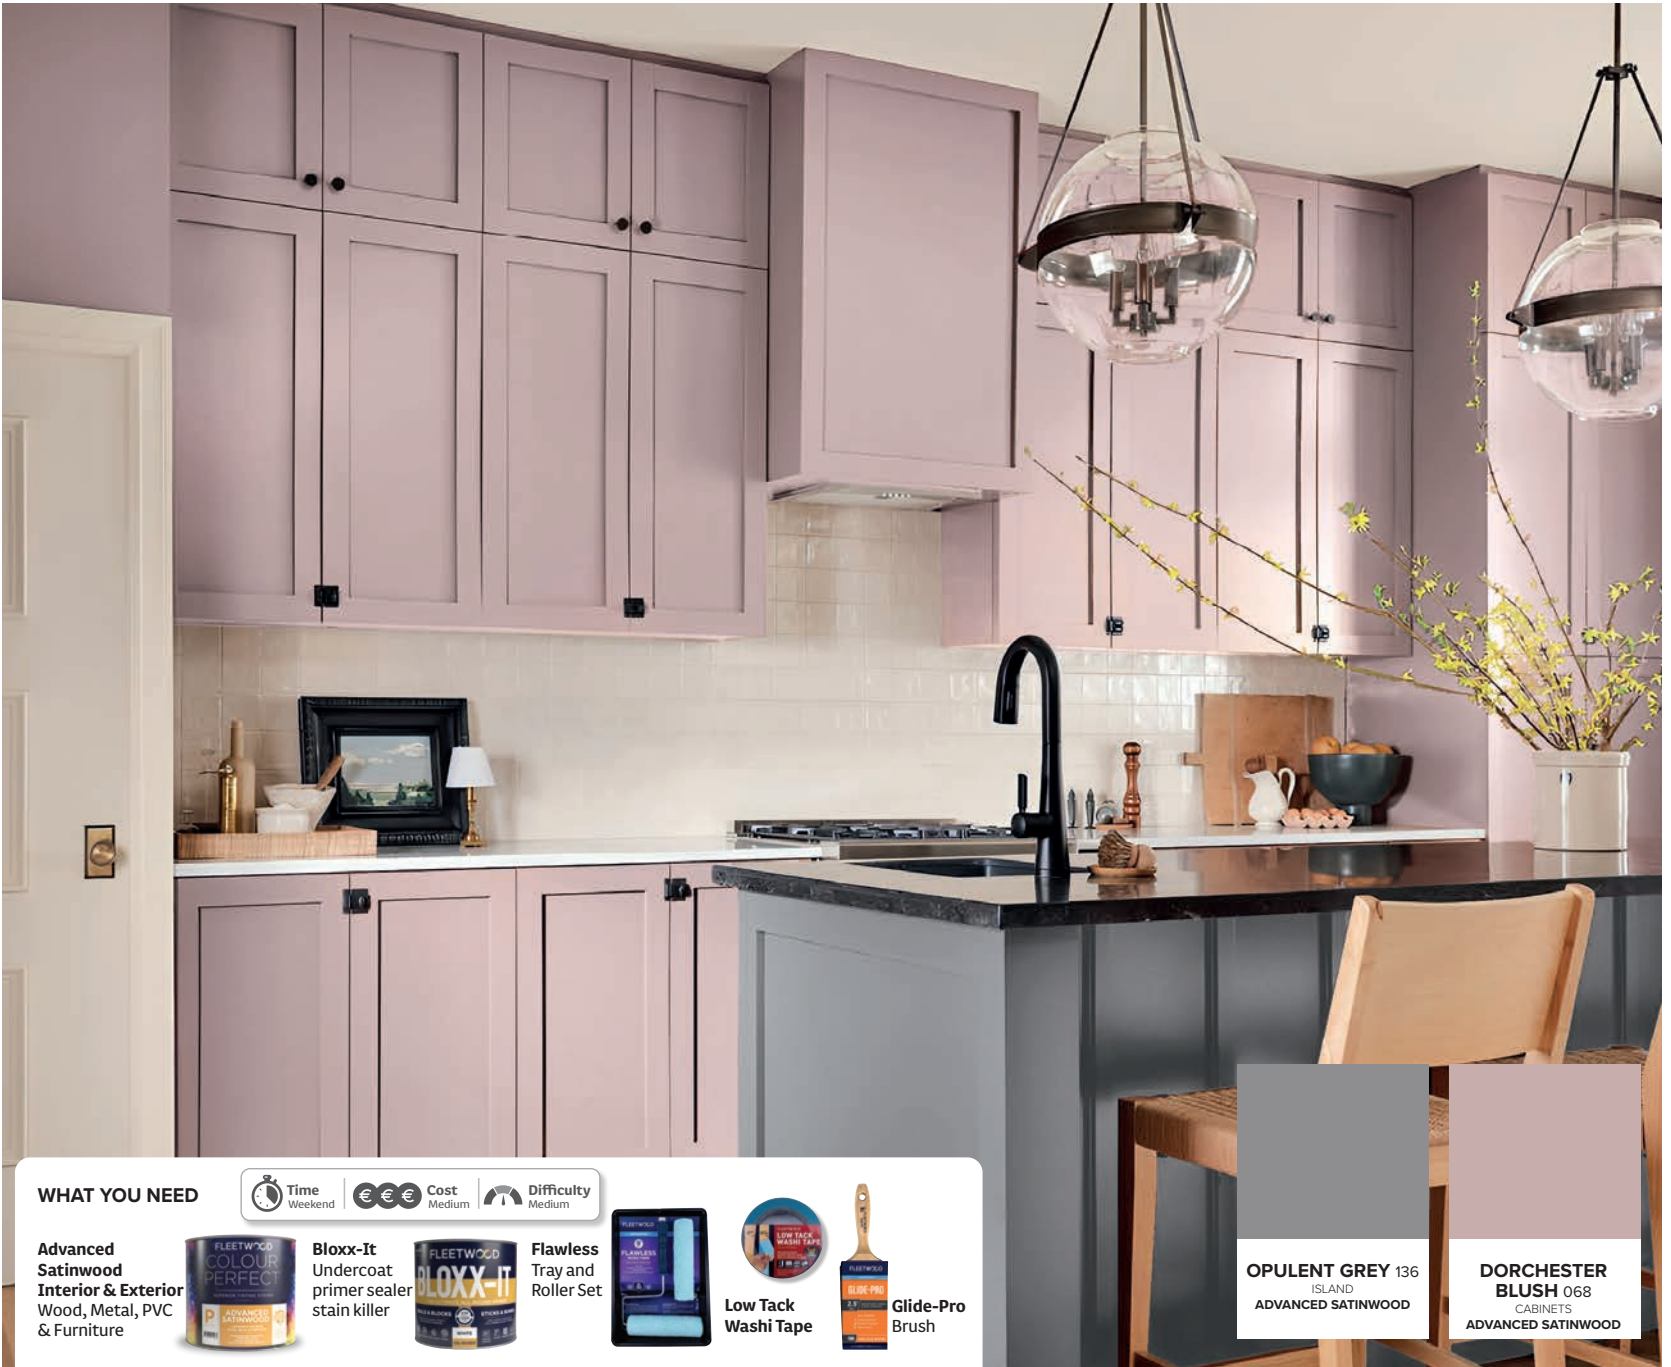

Apply the first coat of Fleetwood Advanced Satinwood with a 1" or 1 1/2" angled brush to the recessed/detailed areas of the cabinet door without getting the brush marks on the flatter and smoother areas. Next, immediately paint the remaining flat areas of the door using a 4" microfibre roller and roll over any overlapping brush marks or paint drips to smooth the surface.

Let your first coat of paint dry for 24-48 hours and then apply a second coat in the same manner. Again, wait 24-

48 hours and once dry you can reinstall your existing hardware to complete your kitchen cabinet makeover!

PAINT AN EXTERIOR WALL

Tips for painting a masonry wall

1.

Remove any surface dirt and any loose or flaking paint by giving the whole surface a good wash down. If there is any mould, treat it with Fleetwood Fungicidal Wash.

2.

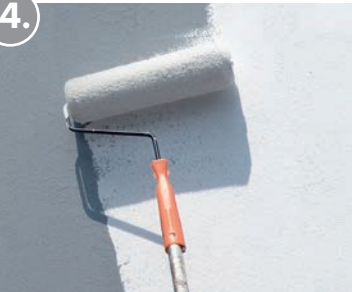

The next step is to fill any cracks or holes in the render with Fleetwood filler so you get a perfect finish. Use Fleetwood Stabilising Primer to seal any unstable areas.

3.

Ensure that windows and any fixtures or fittings are covered with our Low Tack Washi Tape or removed completely to avoid spills.

4.

Walls that have been previously painted typically won't need an undercoat. Two coats are usually enough, but if you're painting over a strong shade you might need a third. For pebble and stone dashing walls Fleetwood Weather Clad® offers excellent coverage.
