The Festival of Advanced Manufacturing & Engineering Returns

SPONSORED BY

Welcome to the Future of Industry

Welcome to the official show preview for Smart Manufacturing Week 2026 – the UK's fastest-growing festival of advanced manufacturing and engineering.

Returning to the NEC on **3–4 June 2026** as the **core show dates**, alongside a programme of **satellite events and experiences** running around them, Smart Manufacturing Week is now firmly established as the UK's largest and most dynamic gathering for industrial innovation.

Across the main two days, the event will welcome **over 13,500 manufacturing and engineering professionals** and **more than 450 solution providers**, creating an unrivalled platform for ideas, technology and collaboration.

This is where the brightest minds, breakthrough technologies and most forward-thinking strategies come together – not to talk about the future of manufacturing, but to actively shape it.

Curated by **The Manufacturer**, the UK's leading publication for the sector, and built on deep, data-led industry insight, Smart Manufacturing Week 2026 directly addresses the realities facing manufacturers today.

Against a backdrop of **ongoing economic volatility, rising energy and input costs, geopolitical disruption, skills shortages and accelerating digital and sustainability pressures**, the event provides a vital forum for practical solutions, honest debate and real-world progress.

Alongside returning favourites such as the **two-day Manufacturing Digitalisation Summit**, Best of British Showcase, STEM Programme, Visitor Trails, Innovation Alley and more, **2026 introduces a powerful line-up of new features designed to bring innovation to life on the show floor.**

Accu presents FightFest:

A high-energy, live robotics battle tournament where engineering teams go head-to-head in front of the crowd. Fast-paced, competitive and great fun – and you're invited.

Factory of the Future

A compelling vision of next-generation production in action, featuring an immersive VR-enabled factory built from individual, modular components.

For 2026, we are also expanding our **Ambassador Programmes**, bringing even more respected voices into the heart of the event.

These ambassadors will contribute insight, host discussions, champion innovation and connect through dedicated networking moments – helping to inspire both current leaders and the next generation of manufacturing talent.

All of this comes together in a **vibrant, festival-inspired setting** that truly sets Smart Manufacturing Week apart.

Expect live demonstrations, hands-on experiences and standout networking – including the **much-anticipated return of the Mainstage Bar networking party**, kicking off from **4.30pm on day one, 3 June**.

Get ready to discover, connect and play a part in shaping the future of UK manufacturing and engineering.

Smart Manufacturing Week

A comment from our featured exhibitor, **QAD**

Manufacturing is entering a new era where speed, resilience, and intelligence are no longer competitive advantages, they're business requirements.

At QAD | Redzone, we believe the future belongs to manufacturers ready to move beyond systems of record and embrace systems of action, where AI helps teams predict, act, and respond in real time.

Powered by ChampionAI and purpose-built for manufacturing, QAD Adaptive ERP connects the shop floor to the top floor, turning operational data into action across production, supply chain, quality, and workforce performance. With Champion Pace, QAD is fast to implement and fast to value, helping manufacturers modernize in weeks and months, not years, without the disruption of traditional ERP transformation.

As the #1 platform for manufacturers, we're proud to support Smart Manufacturing Week and the innovators shaping the future of manufacturing.

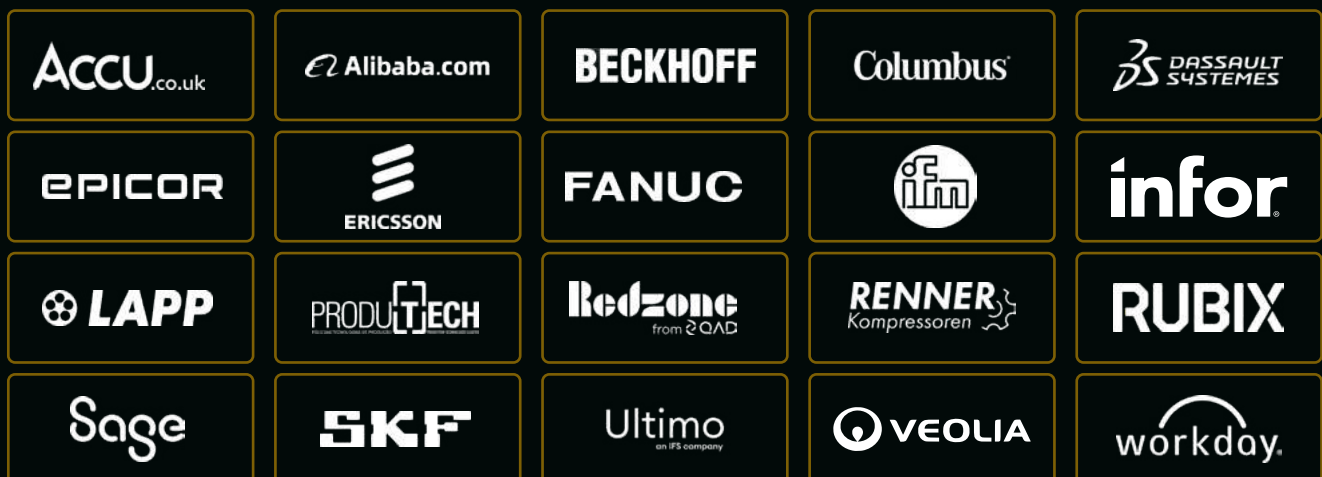

Come and see the QAD team at Smart Manufacturing Week on stand C134!

The Festival of Advanced Manufacturing & Engineering Returns

What's in store for 2026?

Networking

Attracting an audience of over 13,500 manufacturing and engineering professionals, this is the UK's leading event to connect with peers from across the full industrial landscape, from design and engineering through to smart production and maintenance.

Expect high-energy networking, a vibrant drinks reception with live music. The atmosphere blends business with a festival feel, creating the perfect environment to build relationships, expand your network, and engage with the industry over three packed days in 2026.

Thought Leadership

Featuring some of the biggest names in manufacturing and engineering, the 2026 programme delivers 170+ free, high-impact sessions across seven dedicated theatres. This includes the newly refreshed AI & Industrial Data, Connected Factory, and Design & Product Innovation theatres, alongside a mix of solution-led sessions, summits, and practical training sessions from ReliabilityWeb.

With keynote presentations from industry leaders and expert-led panel discussions, the show floor is packed with insight at every turn.

World-Class Solutions

Our four dedicated exhibitions showcase the latest in smart manufacturing technology, AI and automation, design engineering, maintenance and reliability, robotics and more. Bringing together over 450 exhibitors and more than 1,000 products and services, the event also features Innovation Alley, designed to support emerging businesses as they enter the market.

Festival atmosphere!

Expect a vibrant festival atmosphere, blending cutting edge technology with live demos, music, street food and informal networking.

Visitors move between buzzing stages, interactive zones and relaxed lounges, meeting innovators, sharing ideas and discovering new solutions in an energetic, collaborative environment that truly feels like a celebration.

Accu presents FightFest

B2B fighting robot battles

Watch Video

Big stakes, bigger robots.

We're bringing the world's first major B2B robot combat event to the festival of advanced manufacturing & engineering, and you're invited.

Expect engineering, competition and innovation like you've never seen before! This will be one of the most exciting exhibits ever. FightFest will take place throughout the event and ALL attendees are welcome to watch!

The details.

FightFest is a 1v1 combat robotics tournament, staged inside a bulletproof arena, featuring robots designed and built by engineering experts.

Expect 200mph weapons, advanced control systems, and modern combat robotics technology running at full capacity and all delivered live, on the show floor. Think Formula 1 meets combat robotics.

Between bouts, the action doesn't stop. The tournament promises to be the most dramatic, ambitious and talked-about exhibit SMW has ever seen. It isn't a tech demo. It's a fight for glory, bragging rights and the spotlight.

Live interviews with teams and leadership, technical insight, and instant replays will run on the huge overhead screens, keeping the crowd locked in from first hit to final knockout.

Factory of the Future

Smart Manufacturing Week 2026 will mark the official launch of Factory of the Future, a new flagship immersive demonstrator designed to show what the next generation of connected, intelligent and secure manufacturing can look like.

Developed in partnership with AMIC, the Advanced Manufacturing Innovation Centre, Factory of the Future will bring together digital manufacturing, automation, AI, digital twins, cybersecurity, sustainability and connected supply chains into one integrated manufacturing story.

This year, visitors will be able to experience the concept created in partnership with AMIC in a virtual way. Visit the Factory of The Future stand on the show floor – stand M82, meet the AMIC team and look at how modern manufacturing systems can respond, adapt and optimise in real time.

2027: The Live Factory Arrives

Factory of the Future will then be brought to life as a full-scale live production environment at Smart Manufacturing Week 2027.

It is being created to move beyond static product demonstrations. It will show how the technologies shaping modern industry connect together inside a working manufacturing ecosystem.

A dynamic, modular demonstrator showing how intelligent manufacturing works in practice.
Factory of the Future is coming.

See the concept launch at Smart Manufacturing Week 2026, experience the AMIC virtual environment, and discover how the live production line will be brought to life in 2027.

See the concept launch at Smart Manufacturing Week 2026, experience the AMIC virtual environment, and discover how the live production line will be brought to life in 2027.

Visit AMIC on stand M82 to find out more, meet the team, and register your interest in becoming part of the live Factory of the Future demonstrator.

AMIC will showcase digital manufacturing and digitalisation capabilities, including:

- Factory layout and redesign optimisation
- Discrete event modelling and process digital twins
- Capacity and resource utilisation modelling
- Dynamic production planning and event-driven scheduling
- AR-enabled work instructions
- Connected digital supply chain analysis
- Digital twin technology
- IT/OT infrastructure
- Unified namespace architecture
- Manufacturing operations software
- Edge analytics and control
- Cybersecurity for connected manufacturing
- Design-led Digital Thread
- Costing and Value Engineering Frameworks
- Design for Manufacturability, Assembly and Disassembly (DfM/DfA/DfD)

The 2026 virtual launch is only the beginning.

Show Stopping Features

We're going big for 2026 – check out what's in store below:

T-1-FNY Robot – Stand P120

Returning for 2026 with exciting new updates, you can now take control of more of the robot's functions yourself. Tiffany is back with a refreshed look, ready to intimidate with her dual mini-guns.

Innovation Alley

Located at the heart of Smart Factory Expo, Innovation Alley is the UK's leading showcase of emerging technologies set to transform manufacturing over the next decade.

In 2026, it will spotlight breakthrough solutions from the next generation of tech innovators and consultancies serving the UK manufacturing sector.

Visitors can connect directly with early stage companies and founders, uncovering new ideas and opportunities to drive their business forward.

Head down innovation alley to meet your future solutions hero!

Best of British Showcase

Explore the products, processes and ideas shaping British manufacturing and engineering on the global stage.

The Best of British Showcase at Smart Manufacturing Week 2026 brings together breakthrough designs, advanced manufacturing methods and export success stories that highlight UK innovation. From world first technologies to engineering excellence, this is where Britain's story is presented with impact and authority.

Participants for 2026 include:

NiftyLift – Winners of the Institute of Mechanical Engineers (IMechE) Apprentice Automation Challenge. Showcasing their Automated Stirrer, a clever kitchen aid designed to make cooking easier through hands-free stirring.

Utopian Brewing – We are proudly serving British-brewed beer at our Networking Party on Wednesday 3 June! Utopian Brewing's mission is simple: to celebrate incredible British lager.

Bucher Municipal – Recently crowned winner of the Product Innovation & Design category at The Manufacturer MX Awards, Bucher Municipal will be displaying their EV sweeper 'MaxPowa V65e' on Stand C184.

Wenlock Spring – A leading, family owned British bottled water company based in Shropshire, England, that has been operating since 1989. Situated near the historic Wenlock Edge the company bottles high-quality, naturally filtered spring water that has been used since 1086.

Welcome to the Festival!

Smart Manufacturing Week feels more like a festival than a traditional trade show, with buzzing stages, live demos, interactive experiences and a constant sense of energy across the halls. Every corner offers something new to discover, from cutting edge manufacturing technology and breakthrough innovations to inspiring talks from industry leaders and hands on activities that bring ideas to life.

You can explore the latest advancements in automation, robotics, digitalisation and engineering, then grab a drink, enjoy great food, catch a live panel discussion or take part in immersive demonstrations designed to get people talking. The atmosphere is lively, social and genuinely exciting, making it easy to move between learning, networking and entertainment throughout the day.

More than just an exhibition, Smart Manufacturing Week is a place where the industry comes together to share ideas, spark meaningful connections and celebrate the future of manufacturing in a way that feels fresh, engaging and fun. Whether you are there to discover new solutions, meet suppliers, connect with peers or simply experience the energy of the sector, it is an event that leaves people inspired and wanting to come back year after year.

Experience the music of:

SAXYBEAT

At the entrance with their saxophone and bongo combination.

HONEYTRAP

Taking to the stage during the networking party from 4.30pm on day 1 (3 June).

Wellbeing Zone

Step away from the energy of the show floor and unwind in the Wellbeing Zone, a space designed to help you relax, reset and recharge. Whether you are taking a quiet moment or exploring ways to support a healthier work life balance, this calm and welcoming area offers a refreshing break.

Inside, you will find:

A dedicated quiet space, comfortable seating

A hydration station

A pay what you like masseuse

A range of free wellbeing resources.

Manufacturers and Engineers of the Future

Day 2 (4 June) – 11-4pm ONLY

Inspiring the next generation at Smart Manufacturing Week 2026.

Official partner:

Supported by:

The STEM Programme brought to you by STEMAZING at Smart Manufacturing Week (4 June, 11-4PM) is dedicated to inspiring young people and reshaping perceptions of manufacturing and engineering as dynamic, innovative and essential career paths within the future UK economy.

Through immersive learning and real-world insight, the programme empowers students with the confidence, curiosity and practical understanding needed to thrive in manufacturing and engineering roles of tomorrow.

With key features from STEM on Track, Seabery and Stemettes and supported by Engineering UK, Design & Technology Association and UK Manufacturing Festivals, this programme is specifically designed for the next generation to prepare their careers in the industry.

Plan your visit

Take a look at the following useful tools to help you maximise your trip to SMW

To help you focus on what matters most, we're bringing back Visitor Trails

Organised by key themes to guide your journey around the show. These curated routes make it easier to find relevant presentations and exhibitors, helping you quickly discover the capabilities of our sponsors and exhibitors without scrolling through the entire event app.

The visitor trails for 2026 are:

- **Digital Transformation** (Exploring the integration of Industry 4.0 technologies such as IoT, AI, machine learning, and cloud computing)
- **Innovation and Smart Technologies** (Highlighting cutting-edge solutions, automation, robotics, and innovative manufacturing methods)
- **Sustainability and Circular Economy** (Emphasising green manufacturing, carbon reduction strategies, and sustainable practices)
- **Supply Chain Resilience** (Focus on mitigating risks, ensuring continuity, and improving agility in supply chains)
- **Design & Engineering** (Highlighting the design engineering solutions)
- **Industrial Components & Maintenance** (Exploring innovations in components, equipment reliability, and predictive maintenance to enhance operational efficiency.)
- **Manufacturers of the Future Programme** (Focusing on STEM activities for students)

Event app – Sponsored by:

infor

The platform offers an interactive event schedule where you can browse sessions, keynotes, and workshops while building a personalised agenda.

It also features an exhibitor directory with maps, allowing you to quickly locate companies, view their profiles, and navigate the floor using interactive plans. You will receive live notifications and updates, keeping you informed about any session changes, key announcements, and networking opportunities.

To access the event app

You will have been sent a unique link to login via email. Otherwise please scan this QR code and enter the email you used to register for the show.

Agenda

Designed to deliver practical insight as well as strategic vision, the 2026 agenda will feature keynote speakers, expert panels and real-world case studies from manufacturers leading the way. Whether attendees are looking to improve productivity, accelerate innovation, strengthen operations, or prepare for the future workforce, the Smart Manufacturing Week agenda will provide actionable ideas, valuable connections, and inspiration at every stage.

2:00 - 2:20	<p>Architecting for Uncertainty: Building Digital Foundations That Survive Volatility</p> <p>Jennifer Powers, Head of Growth UKI, Sage</p>
2:30 - 3:20	<p>Manufacturing Digitization: Productivity & OEE Benchmarks from the First 90 Days</p> <p>Anders Holmenlund, Head of Northern Europe, Factbird, Factbird</p>

Leadership & Strategy Stage

Agenda Day 1

Wednesday 3rd June

SPONSORED BY

10:00 – 10:20	In Conversation with Kirstie Kennedy & Mark Capell Kirstie Kennedy, HR Manager, Blanc Aero Industries UK Ltd (Lisi Aerospace) & Mark Capell, General Manager, Blanc Aero Industries UK Ltd (Lisi Aerospace)
10:30 – 10:50	Funding the Future: Innovation in Advanced Manufacturing Michael Laycock, Investment Director, British Business Bank
11:00 – 11:20	In Conversation with Rob Blanchard Rob Blanchard, Research, Development & Quality Systems Manager, Holland
11:30 – 11:50	A session with Definition: SEI
12:00 – 12:20	What Winning Manufacturers Know About Customer Value Rebecca Galley, Chief Executive Officer, Tornado Wire Ltd
12:30 – 12:50	Same Outcome, Different Causes: Impacts of Business Interruption Risk from Cyber Attacks and Extreme Weather in Manufacturing Supply Chains Kay Hargreaves, Senior Technology & Cyber Risk Engineer, Zurich Resilience Solutions & Ray Lewis, Business Interruption Consultant, Zurich Resilience Solutions & Tom Hopwood, Head of Customer Relationships & Development, Zurich Resilience Solutions
1:00 – 1:20	Employment Right Act - The Shifting Timeline Jenny Rimell, Head of Consultancy & Training, Make UK
1:30 – 1:50	Talent Trends 2026: How Hiring is Changing in Manufacturing Ruth Hancock, Director – Manufacturing Practice UK, Michael Page
2:00 – 2:20	From Culture to Capability What Award Winning People and Skills Looks Like in Practice Rachel Starkey, Senior Talent Business Partner, Sertec & Tracey Smith, Head of HR, Sertec
2:30 – 2:50	Building a Better Future: Early Inspiration and Industry Retention That Works Ann Hodgetts, Director, STEMAZING
3:00 – 3:20	People, Purpose & Pace: Leading Workforce Change That Sticks David Roberts, Founder, Evttec Automotive
3:30 – 3:50	A session with Velon
4:00 – 4:30	Equity, Diversity & Inclusion Ambassador Networking Session

Leadership & Strategy Stage

Agenda Day 2

Thursday 4th June

SPONSORED BY

10:00 - 10:20	Built to Last: Embedding Sustainability into Manufacturing Operations <i>Josh Burbridge, Managing Director, Archwood Group</i>
10:30 - 10:50	Scaling Renewables in Manufacturing for Measurable Impact <i>Adam Pearce, Business Development Director, Good Energy</i>
11:00 - 11:20	From Files to Flow: Redesigning Engineering Processes for Scale and Collaboration <i>Michael Falkensteiner, Principal Technical Services Engineer, Onshape by PTC</i>
11:30 - 11:50	Navigating Sustainability and Resource Security with Strong Partnerships <i>Mr Gavin Anderson, Head of Policy and Stakeholder Engagement, Veolia & Paul Owen</i>
12:00 - 12:20	Powering Growth in Advanced Manufacturing <i>Constantino Mariella, Senior Investment Manager, British Business Bank</i>
1:30 - 1:50	Now is the time to be Made in Britain

Maintenance Stage

Agenda Day 1

Wednesday 3rd June

SPONSORED BY

Ultimo
an IFS company

10:00 - 10:20	<p>Wireless Machine Condition Monitoring: High Frequency Edge Diagnostics for Early Faults Karl Woodley, Operations Director, Sedgeworks & Pawan Jalagar, Product Manager, Murata Electronics Europe</p>
10:30 - 10:50	<p>How to Protect Your Warehouse Automation Investment Adrian Clark, Key Account Director, Service Geeni & Ebb Kretschmer, Consultant, KM Associates</p>
11:00 - 11:20	<p>Busting the myths holding maintenance back Paraic O'Lochlainn, Vice President of Global Sales, FLUKE</p>
11:30 - 11:50	<p>New Generation of Ultrasound: AI-Assisted Analysis Mr Chris Hallum, Director, Global Accounts, UE Systems</p>
12:00 - 12:20	<p>The Future of Lubrication: Condition-Based & Automated Liam Wright, Sales Manager, Klüber Lubrication GB Ltd & Matthew Cloran, Business Development Manager, Klüber Lubrication GB Ltd</p>
12:30 - 12:50	<p>A session with Nanoprecise Sci Corp</p>
1:00 - 1:20	<p>Bringing disconnected asset data into a modern, ready-to-use platform Syed Bokhari, Account Manager, Touchstone</p>
1:30 - 1:50	<p>One View to Run Your Plant: Connecting Asset Management and OEE With AI Mr Tom Kirk, Senior Account Executive, Aptean</p>
2:00 - 2:20	<p>Beyond the Algorithm: Why Human Intelligence is the New Competitive Edge in Asset Management</p>
