Take charge with CAFM Explorer

CAFM Explorer gives you complete visibility of all your assets, costs and risks, so you can take a proactive approach to the management of your facilities, pre-empt problems and boost productivity.

The total solution

CAFM Explorer provides a total solution to all your facilities management requirements with a comprehensive range of modules all in one package, with no hidden extra costs or need to purchase additional functionality. The intelligent integration of modules supports automation of manual tasks, drives efficiency and enables realtime reporting. CAFM Explorer is available as an on-premise or cloud-based solution. The CAFM web services API enables the seamless flow of data, such as job requests, from third party systems.

Asset register
Scan and record assets via barcode from mobile devices on to a single database, giving you a 360-degree view of all your assets.

Cost control
Budget, manage and analyse spend through centralised tracking and control of purchasing, invoicing and financial data.

Maintenance management
Coordinate reactive and planned maintenance through a help desk application that issues alerts, generates work orders, displays work schedules and tracks activity against SLAs.

Room and resource booking
Enable easy booking and management of pooled resources, rooms and associated catering and equipment requirements via an online calendar application.

Space and occupancy management
Understand your real estate portfolio and optimise how your space is being used by linking your AutoCAD drawings to CAFM Explorer.

Self-service web portal
Provide increased responsiveness and transparency to customers and reduce enquiries with web and mobile access to log work orders.

Mobile workforce management
Track, manage and support engineers and contractors in the field, verify jobs, undertake dynamic risk assessments and create asset data from the web, via mobile devices.

Property management
Simplify property management through consolidation of all survey, health and safety, tenant, lease and rental data in an accessible database.

Stock control
Monitor and analyse stock use and automate reordering through integration with maintenance and purchasing data.

Work planner
Respond quickly to new booking and maintenance requests, facilitate scheduling and record working hours via a user-friendly calendar application and reporting tools.

Dashboard and reports
Gain a real time view of your operations via customised web dashboards and streamline reporting through export of data to third party systems.

Support service
We offer on-premise support with installation, data migration, configuration and integration of CAFM Explorer with third party systems.

"The CAFM Explorer software has enabled the facilities staff, as well as academics and students in accommodation, to get the fast well-coordinated maintenance service they deserve."

University of Salford

"We needed a system that could grow with us and evolve over time, as well as allowing us to offer a bespoke cloud based solution to our own customers. Many other providers were too rigid, but with CAFM Explorer and the team, we really felt we could achieve the long-term partnership approach we were looking for."

SSS Management Services

"The savings we've generated as a result of using CAFM Explorer mean that it's already paid for itself."
