

UNITING FIRE AND SECURITY
WITH A DEPENDABLE FIRE SAFE SOLUTION

UNITY / GROUP
UNITY / DOORS JCK / JOINERY

BRINGING YOU MORE THAN JUST FIRE DOORS

At Unity Group, we're dedicated to delivering a complete and dependable fire door solution. For over 20 years we've been the preferred choice for an extensive client base. Today we're driven by innovation and continue to carry out primary testing to underpin and expand our certification.

SERVING YOUR INDUSTRY

Housing developer, new build, housing association, local authority... Whomever your end client, you can look forward to the highest quality solid core composite FD30s doorsets, as well as timber FD30s and FD60s doors all with fully assured third party accreditation for fire and security.

MADE IN BRITAIN

We're proud to be Made in Britain members. As part of this esteemed network, you can be certain of our investment in UK manufacturing.

Quality is very much a cornerstone of our ethos, from the doors we manufacture, through to our service and support, you can depend on a robust and reliable solution.

THIRD-PARTY CERTIFICATION

- ✓ Association of Composite Door Manufacturers
- ✓ CHAS

FD30S FIRESAFE DOORS DESIGNED TO PERFORM

YOUR CHOICE FOR PREMIUM PERFORMANCE

With extensive experience of supplying fire doorsets for major contractors, housing associations and local authorities, you can be confident in our commitment to compliance.

Engineered Hardwood Timber

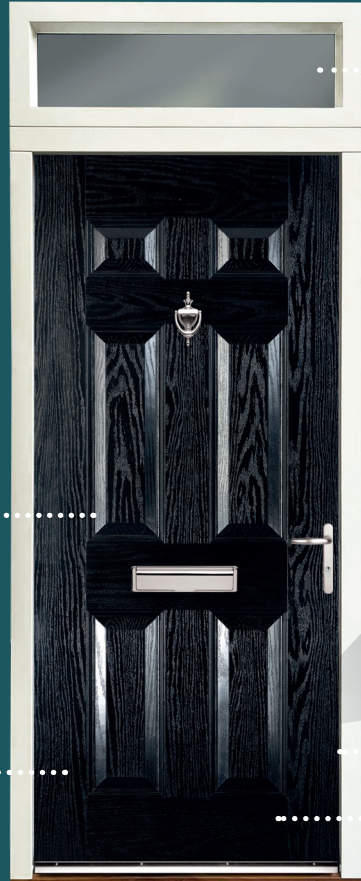

Regardless of the size of your fire door, the thickness of the hardwood will always be 41mm either side, thereby protecting the integrity of the fire resistance, with all doorslabs manufactured in-house.

Reinforced, certified hinges

Tested and certified reinforced hinges offer fire resistance certified to EN1935

Grade 13 stainless steel ball bearing butt hinges

Doorsets pre-hung for easy installation

UNITY DOORS PARTNERS WITH DOOR DATA SYSTEMS

THE LEADING SOLUTION IN FIRE DOOR TRACEABILITY

We're pleased to share that our new partnership with Door Data Systems allows us to offer a Golden Thread Solution. A unique embedded door data tag within each Unity Door ensures complete transparency and access to all relevant fire door manufacture, installation, and maintenance information.

By embedding unique compliance data into every fire door, we can offer a 'Golden Thread' solution. All of which offers peace of mind for our customers and helps to improve fire safety standards throughout the industry. //

Liam Kelleher, Commercial Director

Specialist Fire Resistant Glass
Our FD30s firesafe range features double glazed fire-resistant glass fitted with metal retaining clips into a timber reinforced frame strengthened with corner brackets.

Intumescent seals

Featured around the door, intumescent seals expand when temperatures reach beyond 180°C to seal the gaps between the door and frame. Included around viewers, letterplates and all hardware.

Robust SMC external skin
Available in a range of colours

AMONGST THE FIRST TO ACHIEVE LATEST SBD REQUIREMENTS

As pioneers, we're constantly innovating at Unity Group and are proud to reveal that we're one of the first fire doorset manufacturers to achieve the latest Secured by Design fire requirements. Enhanced and improved, their new requirements stipulate third-party certification for smoke control in addition to security and fire performance. We firmly believe that this initiative is a major step forward and will result in improved levels of fire performance throughout the industry.

Neil Rodway, Technical & Quality Manager

FOCUSED ON FURTHER SUCCESS

We will be further enhancing both fire door ranges with continued research and development with our testing partners. Other improvements include introducing a higher grade Nico stainless steel fixed butt hinge and UAP Ltd Soterian Slim TS008 letterplate. The TS008 Soterian Slim letterplate will also be introduced to the Regency and Script non-fire rated door ranges.
