

The full range of SilverNet iSITE industrial routers has arrived!  
**Introducing iSITE Lite, iSITE Connect and iSITE Switch**

The new SilverNet iSITE range offers three cost-effective, high performance options for every wireless industrial router requirement you may have. Each of the iSITE routers are manufactured by SilverNet here in Britain, made with only the highest quality components to ensure your wireless connections will be seamless, reliable and fast. Whether you require a basic router, a router that can do (almost) everything, or something in between, we have you covered!

—○ **iSITE Lite is...**

...our basic ethernet to 4G router, but that doesn't mean it isn't still high performance, reliable equipment! iSITE Lite is ideal for remote workers, signage or vending machine applications, to name a few.

—○ **iSITE Connect is...**

... a dual SIM ethernet to 4g router, with 2 fast ethernet ports and Wi-Fi 802.11b/g/n support. These capabilities can deliver users uninterrupted internet access and makes it the perfect choice for EV charging points, IoT and M2M applications.

—○ **iSITE Switch is...**

... a powerful industrial-grade 4G cellular router offering maximum flexibility, industrial toughness and a 30w PoE+ switch, which is useable for countless possible applications including remote camera monitoring, ANPR systems, data backup for failover, and more.

Explore the benefits and features of iSITE **Lite**, **Connect** and **Switch** below to discover which is best for you.
