

PRESS RELEASE

6th January 2021

CPD accredited Switches for Video training now available - in conjunction with barox

Supporting installers and integrators to achieve optimum results for their IP camera installations, Clear Vision Technologies in conjunction with barox Kommunikation AG, the global technology leader and specialist manufacturer of 'Switches made for video networks', has launched a Continuing Professional Development (CPD) Certified training course.

Aimed at IP camera system newcomers, the CPD certified course explores the differences between standard data switches vs. video specific switches, and understanding IEE802 networking standards vs. high-capacity video specific standards.

Subjects covered within the CPD certified course include setting-up a Digital Management System (DMS), ring topology design, easy cable connection diagnostics, active camera tracking, and PoE consumption control. Attention is also focused on switch and network security, advanced switch configuration, port programming, and hi-power PoE distribution.

For those wishing to improve upon their existing skills, Clear Vision Technologies is inviting anyone interested in designing and extracting the most from their video networks to sign-up for the free-of-charge course, by visiting the CPD UK website.

The 1-hour training courses are now scheduled for January and February, with more dates being added. Currently the course schedule includes, 10am on Wednesday 13, 20 and 27 January, and at 10am on Wednesday 3, 10, 17 and 24 February.

“barox is supporting customers with the need to keep up to speed with the latest advances in technology and best practice video network design,” says Rudolf Rohr, barox Co-founder & Managing partner. “Designed for systems integrators and engineers who design, install, maintain or repair CCTV systems, the Clear Vision Technologies CPD Certified training course, supported by barox, explains how to capitalise on the powerful functionality of high-performance video switches and reveals many tips for planning reliable video systems with connected PoE devices.”

To register for the ‘Switches for Video’ CPD video network training courses, interested parties should visit: <https://cpduk.co.uk/directory/events/information-technology> or for more information, contact Clear Vision Technologies on 01622 232600 or email info@cv-tech
