Protect and monitor large sites in minutes and be alerted of events as they happen with high-definition video

webeyeGO
PORTABLE VIDEO SECURITY

✔ **PORTABLE BASE STATION**

✔ **BATTERY-POWERED**

✔ **SOLAR POWERED**

✔ **CLOUD STORAGE**

webeyeGO, in tandem with the webeyeCMS video alarm handling & management platform, is the most powerful portable CCTV solution when you need complete site protection - **quickly!**

webeyeGO is an ultra-rapid deployment solution that combines battery-powered equipment re-charged by efficient solar panels for trouble-free operation. You'll be remotely monitoring vulnerable sites in minutes, and the extensive battery life means fewer call-outs. The complete, end-to-end video security solution is small enough to transport in a small vehicle, so just one person can quickly move and set up in new locations when needed.

Monitor from anywhere. Once triggered, webeyeGO sends a video clip of the intrusion to your webeyeCMS browser or app then live-link to view the event in real time.

- **2MP Weatherproof battery-powered cameras charged by 10W solar panels**
- **Portable and weatherproof base station box including lithium-ion battery pack, router and tracker re-charged by 50W solar panel**
- **Arm / disarm function**
- **Battery health notifications/indicator**
- **Built-in anti-theft GPS tracker**
- **Low-cost video monitoring**
- **Unlimited cloud storage**
- **Optional false alarm filtering**
- **System health check**
- **No integration costs**
- **AWS cloud-hosted for compliance, resilience and easy regional access**

✔ 100MB SIM Card* for the tracker and 12GB SIM Card* for the router

✔ Mounting brackets and fixings for the solar panels and cameras

✔ All heavy-duty connecting cables, fuses and mains power connectors

* Webeye has amongst the lowest price SIM deals in the UK

webeye™

webeyeGO EZVIZ app
Download the free app to configure the system, such as remotely set the camera's PIR sensitivity or check for wi-fi and battery strength.

webeyeCMS video alarm handling & management platform
Your video alarm notifications are sent via the webeyeCMS cloud and viewed and managed through your webeyeCMS browser or app.

webeyeCMS is a cloud VSaaS platform that takes the hassle out of managing alarms with no installation charges, no annual licencing fee or minimum contract. It is a complete automation platform that, for a small monthly fee per system, has the power to handle all your video alarms and can be used as a self-monitoring solution or escalated to one of our approved monitoring stations.
