

## ATRIUM Counter Function

The ATRIUM Counter Function allows you to work in a safer environment by implementing social distancing and head counts per room or building.

### Area Capacity Management

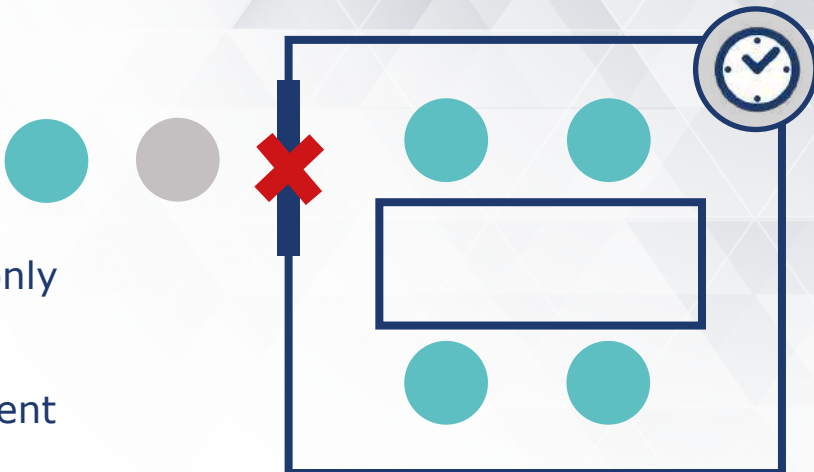

- Determine the number of people allowed in a certain area or room.
- Entrance is denied if the pre-defined number is reached.

### Presence Time & User Profiles

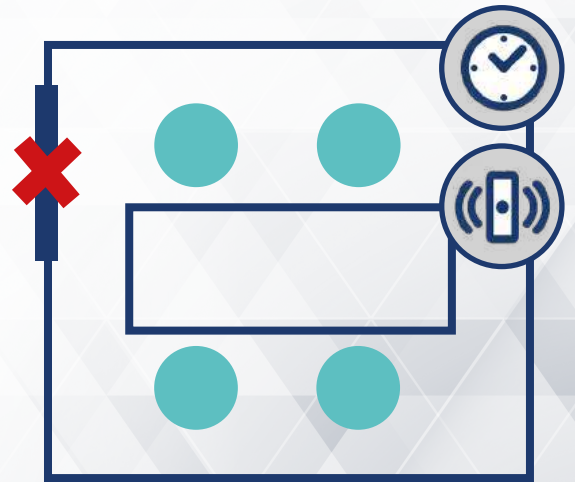

- Create user profiles to allow only designated people in.
- Report the number of time spent on site per user.

## Auto Relock

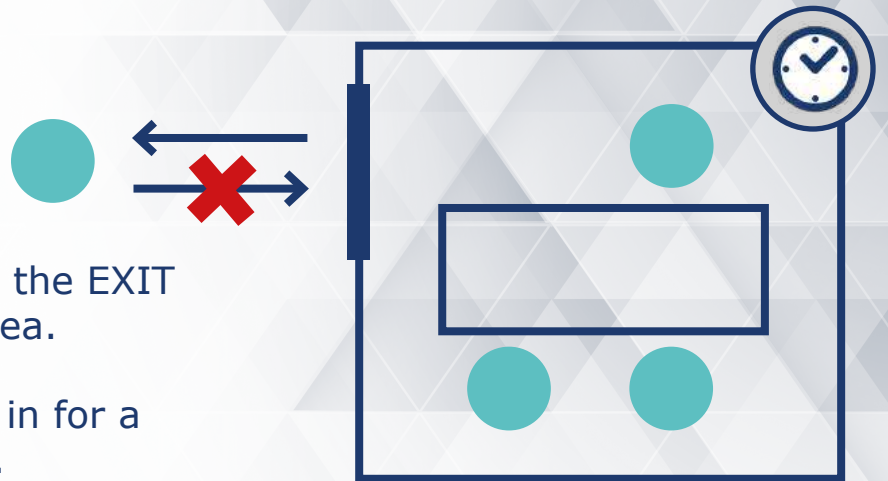

- Allow free access on a pre-defined schedule without entry tags.
- The door locks after the pre-defined schedule. Entry tags must then be used.

## Anti-Pass Back

- People present their tag to the EXIT reader when exiting the area.
- They are not allowed back in for a pre-defined period of time.

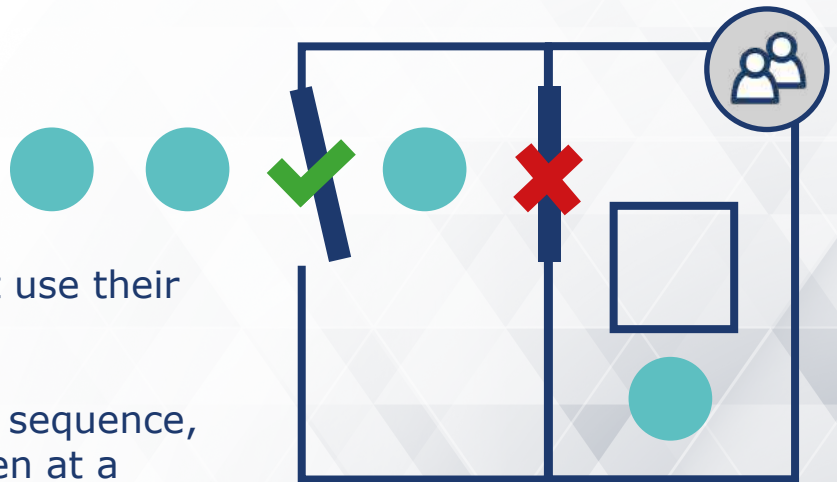

**GET BACK TO WORK SAFELY!**

## 2-Person Rule & Interlock

- Allow access to 2 people that use their access rights simultaneously.
- 2 doors can be arranged in a sequence, allowing only one door to open at a time.

## FUTURE DEVELOPMENT

## Video Surveillance Integration

- Integrate the access control system with a CCTV camera for extra security.
- Capture user photographs when a person tries to enter the door.
