---

## Create the perfect panel for the job

Customise your panel's coating, buttons, screws, and more... Go that extra mile by adding text, braille, or logos to the design.

Our VR panels are manufactured in-house at our production facility in Park Royal, West London.

Made from 2.5mm BS316 Stainless Steel, they are vandal-resistant, corrosion-resistant, and weatherproof.

---

Adding custom features will add character to your order, but it won't add any time

Our bespoke service is designed to allow you to fully customise your panels, in colour, or with any images. From screws, buttons, through to braille, and full-colour name & logo engraving, you can create some stand-out designs that are built to last.

Door Entry Direct offers the **fastest** lead times in the industry on **over 1,000 products** from these leading brands:
