# Calipsa and Immix

Filter over 90% of false alarms in just one click

With a seamless integration between the Immix platform and Calipsa's deep learning technology, it's never been easier to access the benefits of False Alarm Filtering

Summary

Calipsa and Immix are proud to work together to help central alarm monitoring stations improve the efficiency of their video monitoring services. By consolidating the two platforms - Immix CS and Calipsa's False Alarm Filtering Platform - Immix customers have the option to add Calipsa's False Alarm Filtering solution to their cameras directly via Immix CS.

The streamlined solution allows central stations to achieve significant levels of false alarm reduction at the click of a button - without even leaving the Immix CS platform.

False Alarm Filtering

How it works

Using Calipsa with Immix couldn't be simpler

1 When configuring devices in Immix CS, check the option to '**Enable AI Verification**'

2 Select **Calipsa's** '**AI Verification**' on each camera as required

3 Alarms are received by Immix CS, then instantly sent to Calipsa where deep learning analytics determine whether the alarm is true or false

4 Calipsa filters out false alarms and highlights alarms requiring human verification, with true alarms being presented to operators as normal in Immix CS

# The benefits for central alarm monitoring stations

Enjoy a range of technical, operational and performance benefits

Reduce false alarms by over 90% with the addition of Calipsa False Alarm Filtering

Manage sites, cameras and false alarm filtering analytics via one single platform

Improve operator efficiency by minimising the number of alarms requiring verification

Seamlessly integrate the latest AI technology into your monitoring operations

Minimise the time and resource required to add analytics to your cameras

Access to reliable technical infrastructure and support from both Immix and Calipsa

About Calipsa

Calipsa is video analytics software with a difference. Using the latest deep learning technology, Calipsa's cloud-based False Alarm Filtering Platform removes up to 90% of false alarms; recognising the cause of the alarm, filtering out any that are not caused by human or vehicle movement. As the global leader in false alarm reduction, whether you monitor, install or design CCTV, Calipsa is there to help you to better detect and prevent crime. Calipsa integrates seamlessly into existing monitoring operations; adding a critical layer of video analytics to enhance monitoring efficiency.

About Immix CS

Immix is a global provider of software that improves the ability of commercial central stations and monitoring centers to manage and respond to security events as well as deliver a variety of video-centric managed services to customers. The software is deployed successfully across a wide array of environments servicing commercial, residential and enterprise markets. Immix supports the largest third-party product integration library in the industry, enabling ease of deployment and system administration for a broad spectrum of organisations across the globe. Immix® is UL Certified in the USA and BS8418 compliant in Europe.
