

## **Integrated Primary Alarm Communications - Coming to the UK in April 2022**

Connecting Premier Elite control systems to leading Alarm Receiving Centres (ARCs) is about to get a whole lot easier.

Launching in April 2022 (UK only), Texecom Monitor offers seamless, effortless and fully integrated primary alarm communications for Premier Elite systems. Faster installation, scalable, expandable.

### **Register your interest and receive your first SP2 connection free for a year\***

Offering signalling to SP2, SP2 radio, DP2, DP3 and DP4, Texecom Monitor makes adding primary alarm communications simple and easy. Texecom Monitor brings alarm signalling plug-and-play to the professional alarm installer.

### **Your One Stop Shop For Leading Security Solutions**

Texecom Monitor is accessed from Premier Elite systems via SmartCom communicators. Our dual-path communicator, SmartCom 4G, provides connectivity to all the major UK telecommunication networks, including O2, EE, 3 (H3G) and Vodafone.

### **Powered by Texecom Cloud**

Texecom's cloud-based architecture powers Texecom Monitor, providing layers of resiliency and redundancy – ensuring reliable communications, cyber protection, and setup via your existing Texecom Cloud account.

With dual path, fully roaming 4G communications backed up with multi-redundant cloud connectivity, Texecom Monitor is a service you can depend on.

### **Register your interest today!**

By registering your interest, you'll receive the latest updates on availability, access exclusive Texecom Academy training modules, and receive your first SP2 connection free for the first year!

\*Complimentary 12-month Grade 2 Single Path Connection available to qualifying intruder alarm companies only. Limited to one connection per company.

Texecom hardware and ARC contract purchased separately.

Only available in the UK where Texecom Monitor is currently available.

Texecom's decision is final. All rights reserved.
