

## CDVI Announces Secure Bluetooth Reader

**High Wycombe, UK, February 27, 2020** – CDVI, a leading access control manufacturer worldwide, announced a new secure Bluetooth reader compatible with ATRIUM Access Control.

*"The Bluetooth connectivity of the ASDR® allows a handsfree smartphone access to your ATRIUM Access Control system, while the advanced encryption (AES128 & AES256) gives your entire system extra security"* – Fiona Hotton, Senior Sales Manager.

### Top features of the ASDR®

- Slim and attractive design
- Multi-colour led feedback for door status controlled by ATRIUM
- Communicating over RS-485 featuring OSDP (Open Supervised Device Protocol)
- Secure connection (AES 128 / AES 256)
- Bluetooth communication for handsfree smartphone access
- Straightforward connection with only 4 wires
- Max distance of 1 kilometre between the ATRIUM door controller and the ASDR® reader
