

Fanvil Launches Nurse Call System, V1.0 Beta

Shenzhen, China, August 8th, 2024 — Building on the previous Alpha, Fanvil announces its latest update: Nurse Call System, V1.0 Beta, which is packed with new features to provide nurse call and emergency call solutions for caregivers, elders, and patients.

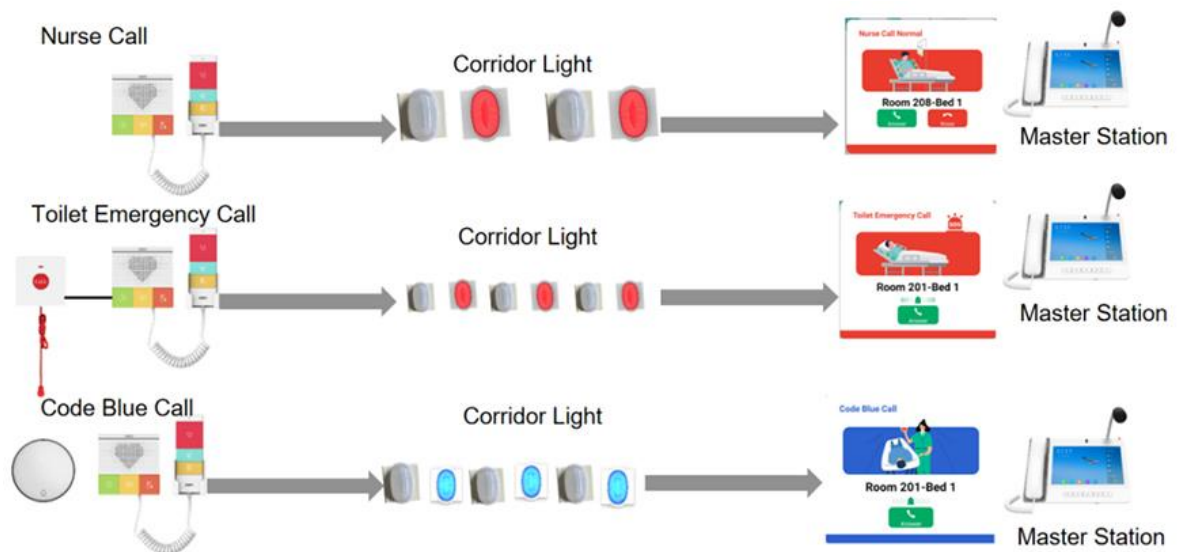

What is in the Beta:

- Nurse call from Y501 Series to Master Station A320/A320i
 - WC call in the bathroom by pressing the wireless/wired pull cord button KT30/KT31
 - Emergency call from wireless pendant KT10
 - Different colors and ringtones on Master Station A320/A320i for various incoming call types
- Additional Features:
- Corridor light supports displaying different colors for different call

types

- Integrated with PA system and intercom access control system
- Screen sharing capability for Master Station A320/A320i
- Easy addition of substations to the master station via scanning
- Simplified project information collection with the Config App, designed for project installation and deployment
- Call logs and staff presence logs available on the master station
