

Winner of the GIT SECURITY AWARD 2020: WinGuard X4!

The Advancis team is pleased to announce that WinGuard X4 has been awarded first place in the category Security Management in regard to cyber security. The latest version of our software solution offers secure database and network encryption. In addition, securely stored file signatures protect against unauthorised manipulation.

Thank you very much for voting for our open integration PSIM platform WinGuard X4. We will continue to further optimise our software in the future aiming to remain the first choice with regard to security and building management systems.
